**Front-End Vision and Multi-Scale Image Analysis** Bart M. Haar Romeny, 2008-10-24 Many approaches have been proposed to solve the problem of finding the optic flow field of an image sequence. Three major classes of optic flow computation techniques can be discriminated (see for a good overview Beauchemin and Barron [Beauchemin19951]): gradient based (or differential) methods; phase based (or frequency domain) methods; correlation based (or area) methods; feature point (or sparse data) tracking methods; In this chapter we compute the optic flow as a dense optic flow field with a multi scale differential method. The method, originally proposed by Florack and Nielsen [Florack1998a] is known as the Multiscale Optic Flow Constraint Equation (MOFCE). This is a scale space version of the well known computer vision implementation of the optic flow constraint equation, as originally proposed by Horn and Schunck [Horn1981]. This scale space variation, as usual, consists of the introduction of the aperture of the observation in the process. The application to stereo has been described by Maas et al. [Maas 1995a, Maas 1996a]. Of course, difficulties arise when structure emerges or disappears, such as with occlusion, cloud formation etc. Then knowledge is needed about the processes and objects involved. In this chapter we focus on the scale space approach to the local measurement of optic flow, as we may expect the visual front end to do. 17. 2 Motion detection with pairs of receptive fields As a biologically motivated start, we begin with discussing some neurophysiological findings in the visual system with respect to motion detection.

**Calligraphic Drawing** Schin Loong,2018-11-13 Calligraphic Drawing, written and illustrated by artist Schin Loong, is a step-by-step guide to the pictorial side of calligraphy. Learn how to make calligraphic flourishes, then apply the technique to draw 15 different flourished animals. You'll also find instructions for embellishing letters and drawing ornamental cartouches. In the past, masters of penmanship advertised their copperplate skills by shaping their calligraphy and flourishes into elaborate pictorial designs. Now the art of the flourish is back! With her fresh approach to this age-old art form, Schin will take you confidently through each step, from choosing your pen, nib, and ink, to creating calligraphic animals that express your own imagination and artistry. The basic steps for the strokes are simple, but as you learn each new pattern and stroke, you'll watch your drawings develop into ever more complex and beautiful compositions. By following the step-by-step instructions, you can create stunning drawings of a pigeon, swan, crane, rooster, jellyfish, goldfish, peacock, parrot, owl, raccoon, elephant, puppy, rabbit, fox, and zebra. Each exercise includes a photo of the animal, followed by an illustration and written guidance for each numbered step. You'll find helpful tips and encouragement throughout. At the back, a gallery showcase provides examples of Schin's own artwork to inspire you in your own flourishing pursuits. Whether you're a designer, calligrapher, doodler, or just picked up a pen, this guide to drawing with flourishes will enlighten and inspire.
