Alphabet Letter Tracing Worksheets Adam Pros, 2020-04-11 Most children begin recognizing some letters between the ages of 2 and 3 and can identify most letters between 4 and 5. This means that you can start teaching your child the alphabet when he's around 2 -- but don't expect full mastery for some time. What's more, toddlers learn differently from older children, so don't pull out the flashcards and audiotapes just yet. Instead, rely on visual aids such as colorful alphabet picture books -- your child will have a great time pointing out the letters he knows, as well as colors, shapes, animals, and other objects in the book. The first step in teaching the alphabet is getting your child interested in listening to stories. At around age 2 or 3, children who are frequently read to get the idea that books contain print, which is made up of letters.
