Baseline Selling Dave Kurlan, 2005-11 *Baseline Selling - How to Become a Sales Superstar by Using What You Already Know About the Game of Baseball*, will dramatically change the way we approach the sales process, replacing the gratuitous complexity advocated by today's sales experts with an elegant and very effective simplicity. Studies have shown that the selling techniques of the last two decades have had very little impact on most of the sales population less than 75 percent of all salespeople, to be exact. Why? Because of the complexity, learning curve and difficulty in applying the concepts in these systems. In response to the urgent need for a flexible, innovative process that will enable people to grasp the essential skills necessary to close a sale in any situation, *Baseline Selling* reemphasizes the fundamentals of selling in a fresh, memorable way that modern sales professionals can relate to and utilize, and above all, one that complements and enriches advanced sales methodologies. Salespeople who read this book and put its wisdom to work will succeed at acquiring more opportunities as they learn to get appointments more easily. They will excel at creating opportunities with prospects who are not interested. They'll sell at higher margins by using the Rule of Ratios. Their closing percentages will improve dramatically as they implement the simple Inoffensive Close. Salespeople selling commodities, struggling to differentiate themselves, will love *Commodity Busters* and every salesperson will be able to shorten their sell cycle by *Taking a Lead*. Quite simply, *Baseline Selling* introduces a way for salespeople to visualize and touch all the sales bases without over-complicating the process.

The Sales Acceleration Formula Mark Roberge, 2015-02-24 Use data, technology, and inbound selling to build a remarkable team and accelerate sales The Sales Acceleration Formula provides a scalable, predictable approach to growing revenue and building a winning sales team. Everyone wants to build the next \$100 million business and author Mark Roberge has actually done it using a unique methodology that he shares with his readers. As an MIT alum with an engineering background, Roberge challenged the conventional methods of scaling sales utilizing the metrics-driven, process-oriented lens through which he was trained to see the world. In this book, he reveals his formulas for success. Readers will learn how to apply data, technology, and inbound selling to every aspect of accelerating sales, including hiring, training, managing, and generating demand. As SVP of Worldwide Sales and Services for software company HubSpot, Mark led hundreds of his employees to the acquisition and retention of the company's first 10,000 customers across more than 60 countries. This book outlines his approach and provides an action plan for others to replicate his success, including the following key elements: Hire the same successful salesperson every time — The Sales Hiring Formula Train every salesperson in the same manner — The Sales Training Formula Hold salespeople accountable to the same sales process — The Sales Management Formula Provide salespeople with the same quality and quantity of leads every month — The Demand Generation Formula Leverage technology to enable better buying for customers and faster selling for salespeople Business owners, sales executives, and investors are all looking to turn their brilliant ideas into the next \$100 million revenue business. Often, the biggest challenge they face is the task of scaling sales. They crave a blueprint for success, but fail to find it because sales has traditionally been referred to as an art form, rather than a science. You can't major in sales in college. Many people question whether sales can even be taught. Executives and entrepreneurs are often left feeling helpless and hopeless. The Sales Acceleration Formula completely alters this paradigm. In today's digital world, in which every action is logged and masses of data sit at our fingertips, building a sales team no longer needs to be an art form. There is a process. Sales can be predictable. A formula does exist.
