Building a Business Website with HubSpot CMS: How to Create a Website, Landing Page, or Blog for Marketing & Sales Growth Jacob Lett, 2022-12-12

Want to Create a Blog or Website for Your Business Marketing and Sales Strategy? I have been a part of many website redesign projects, which often take much time and can be expensive. If your company doesn't have the skills in-house, you must spend time vetting service providers and setting up the contract with legal and accounting. Then you must spend time with discovery meetings, design meetings, strategy meetings, etc. Sometimes, this lengthy web development process is necessary, but what if you know what you want but don't have the technical web development skills or time to create it? This is a Book on How to Create Your Own Website in Less Time and Complexity. And with No Code. I have seen business owners, marketers, and web designers build websites and landing pages in days or weeks using no-code page builders. There is a growing trend in website page builders like Webflow, Wix, Squarespace, WordPress, and HubSpot CMS. These platforms provide visual page editors and themes to dramatically increase the speed and simplicity of building a website. Instead of fussing about the web design before any content is written, you can use a theme close to what you need. After you add the content, you can hire a developer to make customizations to fine-tune your website, saving you considerable time and money. Questions I will help you answer in this book: What is a CMS content management system? How do I choose one? WordPress vs. Wix vs. HubSpot CMS - Which is the best free website builder? What about free web hosting? Why does my business need a website? How do you create templates and themes on HubSpot CMS? How to create a blog for your business? In this building a business website book, I will walk you through making a free website for your business. This will become a central component of your marketing plan and strategy.

Then about seven years ago, I worked at a company that used HubSpot. At first, it wasn't obvious because it was a whole new workflow and a new coding language HubL. But over time, I saw HubSpot CMS continually improve and how marketers loved using it. Play Bigger Al Ramadan, Dave Peterson, Christopher Lochhead, Kevin Maney, 2016-06-14 The founders of a respected Silicon Valley advisory firm study legendary category-creating companies and reveal a groundbreaking discipline called category design. Winning today isn't about beating the competition at the old game. It's about inventing a whole new game—defining a new market category, developing it, and dominating it over time. You can't build a legendary company without building a legendary category. If you think that having the best product is all it takes to win, you're going to lose. In this farsighted, pioneering guide, the founders of Silicon Valley advisory firm Play Bigger rely on data analysis and interviews to understand the inner workings of “category kings”— companies such as Amazon, Salesforce, Uber, and IKEA—that give us new ways of living, thinking or doing business, often solving problems we didn't know we had. In Play Bigger, the authors assemble their findings to introduce the new discipline of category design. By applying category design, companies can create new demand where none existed, conditioning customers' brains so they change their expectations and buying habits. While this discipline defines the tech industry, it applies to every kind of industry and even to personal careers. Crossing the Chasm revolutionized how we think about new products in an existing market. The Innovator's Dilemma taught us about disrupting an aging market. Now, Play Bigger is transforming business once again, showing us how to create the market itself.
