Inclusive Learning 365 Christopher Bugaj, Karen Janowski, Mike Marotta, Beth Poss, 2022-08-03 Designed to be read one day - and page - at a time, this book from four inclusive learning experts offers 365 strategies for implementing technology to design inclusive experiences. Educators across the world are working to design individualized instruction that empowers every student to become experts at learning. Technology and instructional interventions designed to support students with disabilities often eventually become mainstream and used by the masses. These practices provide a pathway for designing inclusive, equitable and accessible educational experiences that meet the needs of every individual learner. This engaging book includes daily strategies accompanied by examples of tools that can be implemented immediately to design meaningful instruction. Topics covered include role-playing games for social-emotional learning, building literacy through captioned video, coding to teach early literacy, text-to-speech for math and reading, and much more! Each daily strategy includes:

- Explanation of how to use the strategy to design inclusive educational experiences.
- Examples of tools that can be used to implement the strategy.
- Alternative ways to use the strategy to extend student learning.
- Images illustrating the strategy or tool.
- Identification of relevant ISTE Standards for Educators and ISTE Standards for Students. Related resources.

The heart of the book is the shift in mindset that occurs by exploring a different practical, inclusive strategy each day and infusing these strategies into everyday practice.

Building PowerPoint Templates Step by Step with the Experts Echo Swinford, Julie Terberg, 2012-09-28 Building PowerPoint Templates Supercharge your PowerPoint® presentations with custom templates and themes! Want to create presentations that are more consistent and cost-effective? Presentations that fully reflect your branding? Then don't settle for Microsoft's "out-of-the-box" templates and themes: create your own! In this easy, hands-on guide, two PowerPoint MVPs teach you every skill and technique you'll need to build the perfect template—from planning and design, through theme building, custom layouts, colors, and deployment. Echo Swinford and Julie Terberg have distilled their immense PowerPoint knowledge into simple, step-by-step techniques you can use right now, whether you're using PowerPoint 2010 or 2007 for Windows, or PowerPoint 2011 for Mac. Well-built templates are the backbone of great presentations—whether building them for your own use or designing for thousands of users, this book will guide you through the process of creating the most effective templates. Important Note: Upgrading from older versions of PowerPoint, such as PowerPoint 2003? Your old

templates may no longer work. This book will help you make the transition painlessly!

- Plan new templates and themes to maximize their business value for years to come
- Understand the differences between templates and themes, and how they work together
- Make better choices about color, fonts, and slide layouts
- Create efficient templates for individual users, teams, and large organizations
- Incorporate Notes and Handout Masters into your presentation templates
- Provide example slides and default settings that lead to better presentations
- Use Microsoft's little-known Theme Builder to create effects and background styles
- Work around hidden quirks in PowerPoint's advanced template and theme features

Echo Swinford, a Microsoft PowerPoint MVP since 2000, has been a featured speaker at the Presentatio Summit (formerly PowerPoint Live) since its inception. She is the expert voice and instructor behind PowerPoint 2010 LiveLessons (Video Training), the author of *Fixing PowerPoint Annoyances* and co-author of *The PowerPoint 2007 Complete Makeover Kit*. Julie Terberg is a Microsoft PowerPoint MVP and featured speaker at the Presentation Summit. She is the owner of Terberg Design and has been designing presentations since the mid-1980s. She is co-author of *Perfect Medical Presentations*. As contributing author for *Presentations Magazine*, she won awards for her Creative Techniques columns.

Transactions on Data Hiding and Multimedia Security IV Yun Q. Shi, 2009-07-24 Since the mid 1990s, data hiding has been proposed as an enabling technology for securing multimedia communication, and is now used in various applications including broadcast monitoring, movie fingerprinting, steganography, video indexing and retrieval, and image authentication. Data hiding and cryptographic techniques are often combined to complement each other, thus triggering the development of a new research field of multimedia security. Besides, two related disciplines, steganalysis and data forensics, are increasingly attracting researchers and becoming another new research field of multimedia security. This journal, *LNCS Transactions on Data Hiding and Multimedia Security*, aims to be a forum for all researchers in these emerging fields, publishing both original and archival research results. This fourth issue contains five contributions in the area of digital watermarking. The first three papers deal with robust watermarking. The fourth paper introduces a new least distortion linear gain model for halftone image watermarking and the fifth contribution presents an optimal histogram pair based image reversible data hiding scheme.

Google Apps for Seniors Scott La Counte, 2019-08-29 Remember when you used to pay for things?! When computer software was almost as much as your new computer. Times have certainly changed! Today many companies are giving you all that stuff you used to pay hundreds of dollars for—for free! What's the catch? There has to be a catch! Sometimes there definitely is a catch...it's free, but you have to watch a 30 second commercial every five minutes. Or it's free but you have to pay a subscription once you start to really like it. In the case of Google Apps, it truly is free. No annoying ads. No money grabs. Nothing. For the price of nothing you are getting online software that is on par with the Office suite you grew to love—and pay hundreds of dollars for. That means you get writing software, spreadsheet software, presentation software,

and more...and you don't pay a dime! Now you see why so many people are making the switch to Google Apps? Who wouldn't want to pay nothing for good software? If you are interested in learning more about it, or you are ready to make the leap and become a free user, then this guide will show you the ropes and get you started as quickly as possible. Let's get started! This book is not endorsed by Alphabet, Inc.

The Ridiculously Simple Guide to Google Apps (G Suite) Scott La Counte,2019-09-11 Chances are you grew up a Word and Office user. Maybe you were a rebel and committed your herd to OpenOffice, or, dare I say, WordPerfect—but for the majority of people, our lives were loyal to Microsoft. In 2005, a small little startup named Upstartle developed something unheard of at the time: a web-based word processor called Writely. It pioneered the idea of writing on the “cloud” and changed the way people thought about word processing. Google noticed the little upstart, and in 2006, they acquired the company. The software was abandoned and turned into what everyone knows today as Google Docs. It disrupted the industry—namely, Microsoft's industry. Today, Google has a whole suite of productivity apps; from documents to spreadsheets, you can do just about anything from the cloud. Microsoft and Apple have each made big attempts to create cloud-based environments of their own for office productivity, but Google pioneered the idea and its collaborative, online environment make it hard to beat. It's become so feature-rich that many businesses are finding it to be the preferred way to conduct business. If you are thinking about making the switch to Google, or have already made the switch but want to make sure you are using it correctly, then this guide will walk you through it. It will show you all the basic features to make sure you can get up and running as quickly as possible. It covers Google Drive, Google Docs, Google Slides, Google Sheets, and Google Forms. Let's get started!

Restoring Students' Innate Power Louise El Yaafouri,2022-03-31 This book explores the effects of trauma on newcomer students and presents stress-mitigating strategies that empower these multilingual students as they transition to a new environment. Diverse insights and experiences bring high-powered learning spaces to life. However, the cultural backgrounds of newcomer students and their families can be very different from the dominant norms of the new community, resulting in misalignments that constitute a persistent challenge. In addition, the process of arriving can exacerbate stress. Entering a new school or classroom means situating oneself within a new context of language, culture, community, and shifting personal identities. This transition shock contributes to a sense of diminished power. In serving these students, we can't afford to leave transition shock out of our conversations about trauma. We must not only stitch together pieces of culturally responsive practice and trauma-informed care but also become practitioners of stress-mitigating strategies that empower newcomer students. We must focus instruction on our students' unique identities. We must restore their power. In *Restoring Students' Innate Power*, newcomer educator and cultural competency expert Louise El Yaafouri presents * An understanding of transition shock and how stress and trauma affect recent arrivers. * The four pillars of transition shock and

how they affect learning. * How students see themselves and how the cultural aspects of their identities inform teachers' work in mitigating transition shock. * How social-emotional learning links to trauma-informed practice. This book isn't exclusively about trauma; it's about restoring power. The distinction is critical. Focusing on the trauma or traumatic event roots us in the past. Restoration of power moves us forward.

On the Shoulders of Giants Steven T. Bickmore, Shanetia P. Clark, 2019-12-30 This first book in a three volume series celebrates and examines the work of four African American authors of young adult literature. They are Virginia Hamilton, Julius Lester, Walter Dean Myers, and Mildred D. Taylor; they serve as the foundation of young adult literature and provide robust stories that center and illuminate African American youth. In addition, this volume also examines the role of the Coretta Scott King Award in promoting access and visibility to authors and illustrators who shine a spotlight on African American youth and society. The chapter authors--librarians and established and emerging scholars in the field of young adult literature--survey the work of Hamilton, Lester, Myers, or Taylor; their accolades; and how audiences initially responded to their work. Each chapter highlights a single work and discusses how it might be taught, providing pre, during, and post reading activities or, in some cases, individual, small group, or whole class activities. This volume is a resource for classroom teachers, teacher educators, reading specialists, librarians, and other educators who study, research, and read young adult literature. This first volume supplements studies in the foundations of African American authors of young adult literature and explorations of critical works by these authors.

Hands on PowerPoint 2000 Konrad King, 1999 Focuses on getting users to work right away by providing the practical information needed to master PowerPoint 2000. The book provides step-by-step instructions and covers the key operations such as creating, editing and printing a presentation. The companion CD-ROM includes sample presentations.

MindXpres: Conceptual and Technical Foundations for Next Generation Presentation Solutions Reinout Roels, 2019-05-27 Presentation tools such as PowerPoint were initially created to simulate physical slides and have inherited a lot of their limitations. In this dissertation we identify the shortcomings and unmet user needs in presentation software by

means of literature study, observations, a survey and the programmatic analysis of over 12000 PowerPoint documents. The results indicate that user needs are slowly evolving while existing software has hardly changed over the last 30 years. We motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well-integrated solutions for the identified shortcomings. The resulting MindXpres platform consists of a new conceptual framework, content model, information system and presentation engine. We present MindXpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented in the existing tools. We further demonstrate the flexibility of the MindXpres platform by discussing a wide range of proof-of-concept plug-in solutions for the identified shortcomings and unmet user needs.

Running Microsoft PowerPoint 4 for Windows Stephen W. Sagman,1994 PowerPoint has long been the bestselling presentation graphics program for Windows, but it hasn't been updated for a while. The ultimate tutorial/reference, Running PowerPoint 4.0 for Windows delves deeper into the subject than the Step by Step book and offers maximum power with minimal learning and development time.
