Building an Emergency Plan, 2000-02-03 Building an Emergency Plan provides a step-by-step guide that a cultural institution can follow to develop its own emergency preparedness and response strategy. This workbook is divided into three parts that address the three groups generally responsible for developing and implementing emergency procedures—institution directors, emergency preparedness managers, and departmental team leaders—and discuss the role each should play in devising and maintaining an effective emergency plan. Several chapters detail the practical aspects of communication, training, and forming teams to handle the safety of staff and visitors, collections, buildings, and records. Emergencies covered include natural events such as earthquakes or floods, as well as human-caused emergencies, such as fires that occur during renovation. Examples from the Barbados Museum and Historical Society, the Museo de Arte Popular Americano in Chile, the Mystic Seaport Museum in Connecticut, and the Seattle Art Museum show how cultural institutions have prepared for emergencies relevant to their sites, collections, and regions.

Embed EEP into the corporate culture - Begin your awareness campaign immediately, getting the message out to the community you are serving. Understand the environment - Explore which areas of the organization have emergency plans and which need to be covered in your overall EEP/ Agree upon an EEP strategy - Work closely with people who know the premises to identify threats that could trigger an emergency, and visit and evaluate potential exit points. Develop evacuation procedures - Look at the people, their probable locations, their existing challenges. Determine if you will need one plan or a suite of plans. Exercise and maintain the EEP- Run regular exercises to familiarize everyone with plans and choices - as often as needed to accommodate changing personnel and individual needs.
