**Student-Centered Learning by Design** Jacquelyn Whiting,2021-03-15 Current research is pushing schools to adopt more student-centered approaches to the classroom experience, and educators—librarians and classroom teachers alike—are being challenged to revise their curricula and instruction to be student-centered, personalized, and differentiated. This book empowers librarians, teachers, and administrators to be empathic problem-solvers and decision-makers. By reframing the challenges that members of a learning community face as opportunities to better meet teaching and learning needs, readers will find that adoption of a mindset focused on users—namely, design thinking—elevates and creates opportunities for innovating pedagogy. Moreover, it can enhance school culture as well as build channels of communication among various stakeholders in schools and districts. When educators of any subject or discipline apply design thinking skills to their curriculum implementation, authentic student-centered learning experiences become the core of the learning experience. The case studies shared in this book provide examples of student-centered approaches being used in elementary, middle, and high schools, so that readers have many models on which to base their work and from which to build confidence in shifting their pedagogy to keep the student at the center of teaching and learning decisions.

**MULTIMODAL DISCOURSE INFORMATION PROCESSING IN ENGLISH CLASSROOM INSTRUCTION FOR LEGAL PURPOSES** YANMEI HUAI,2021-02-22 English for Law (also called Legal English Teaching) is a big challenge for EFL/ESL teachers worldwide. Multimodal teaching and learning may engage law students with legal content and the English language by using multiple communication modes and mediums. But what are the multi-modes and multi-mediums specific to the ESP (English for Specific Purposes) course? How would teachers deal with that complicated multimodal information? How would teachers intrigue students' interest, focus their attention, and guide them to follow, respond, analyze, extend, and comment? And how would teachers build students' critical thinking skills and shape international elites' dispositions? This book would discuss more in-depth the above questions. The new analysis framework of MDIP (Multimodal Discourse Information Processing) could decode classroom participants' interactive intentions from their multimodal presentation

discourses, could focus LCTA (Legal Critical Thinking Abilities) as the primary training purpose of Legal English Teaching, and could provide Legal English Teaching with discursive, cognitive, and communicative information strategies. With the help of MDIP strategies, teachers are clearer at how to extract the legal documents' genres, how to create the lecture schemata, how to generate visualized tree discourses, how to build hierarchies among multimodal information, how to allocate teaching, learning, and assessing tasks in classroom instruction, etc. As a result, Legal English Teaching's course design will become much less challenging for EFL/ESL teachers.
