Cause and Effect, Conditionals, Explanations Richard L Epstein, 2018-11-05 This series of books presents the fundamentals of reasoning well, in a style accessible to both students and scholars. The text of each essay presents a story, the main line of development of the ideas, while the footnotes and appendices place the research within a larger scholarly context. The essays overlap, forming a unified analysis of reasoning, yet each essay is designed so that it may be read independently of the others. The topic of this volume is the evaluation of reasoning about cause and effect, reasoning using conditionals, and reasoning that involves explanations. The essay Reasoning about Cause and Effect sets out a way to analyze whether there is cause and effect in terms of whether an inference from a claim describing the purported cause to a claim describing the purported effect satisfies specific conditions. Different notions of cause and effect correspond to placing different conditions on what counts as a good causal inference. An application of that method in The Directedness of Emotions leads to a clearer understanding of the issue whether every emotion need be directed at something. In the essay Conditionals various ways of analyzing reasoning with claims of the form if . . . then . . . are surveyed. Some of those uses are meant to be judged as inferences that are not necessarily valid, and conditions are given for when we can consider such inferences to be good. In Explanations verbal answers to a question why a claim is true are evaluated in terms of conditions placed on inferences from the explaining claims to the claim being explained. Recognizing that the direction of inference of such an explanation is the reverse of that for an argument with the very same claims is crucial in their evaluation. Explanations in terms of functions and goals are also investigated.

The Better Writing Breakthrough Eleanor Dougherty, Laura Billings, Terry Roberts, 2016 Every teacher knows the challenge of trying to engage reluctant readers and struggling writers--students whose typical response to a writing prompt is a few sentence fragments scribbled on a sheet of paper followed by an elaborate shrug of the shoulders. The best way to engage less confident readers and writers is to give them something powerful to think about. The Discourse and Writing Cycle explores writing as a means to focus student thinking, fuel deeper learning, and build complex understanding in English, social studies, math, and science. This field-tested approach from well-respected experts Eleanor Dougherty, Laura Billings, and Terry Roberts is designed for use in grades 4-12. The book explores the three interrelated sequences of the cycle--the Discourse Sequence, the Transition to Writing Sequence, and the Writing Sequence--and includes classroom examples and sample lesson plans from across the content areas. The cycle will inspire you as a teacher and help you to inspire your students to write with confidence and competence. How often we dim or extinguish the creative sparks that can come from good writing! William Butler Yeats proclaimed that 'Education is not the filling of a pail, but the lighting of a fire.' This book lights the fire for the teaching of writing. --John Hattie, author of the Visible Learning books
