Prison Recipes and Prison Cookbooks A.E. Stearns, 2024-04-24 *Prison Recipes and Prison Cookbooks* provides an innovative exploration of U.S.-based prison cookbooks using a narrative criminological approach. The book relies on the voices of prison cookbook authors to argue that cookbook narratives are a form of communication with the free world. Further, the book undertakes thematic analyses of prison cookery and narratives to illuminate the intersections of incarceration with abolition, gender, literacy, and dehumanization. The reader is introduced to the power and symbolism of cell made food, as well as the agency and resourcefulness of those who cook, bake, and write about food behind bars. *Prison Recipes and Prison Cookbooks* is of interest to instructors of courses covering the sociology of food, criminology, human geography, and anthropology. The book is also appropriate for prison and probation services, health organizations, and anyone engaged in the criminal-legal system, abolition movements, or social reform.

Disorders shows that effective solutions begin at home and cost little more than a healthy investment of time, effort, and love. Based on exciting new research, it differs from similar books in several key ways. Instead of concentrating on the grim, expensive hospital stays of patients with severe disorders, the authors focus on the family, teaching parents how to examine and understand their family's approach to food and body-image issues and its effect their child's behavior. Parents learn to identify an eating disorder early, to establish healthy attitudes toward food at a young age, and to intervene in a nonthreatening, nonjudgmental way. The authors concentrate on teens, the age group most often affected by eating disorders, as well as younger children. Individual chapters cover boys at risk, relapse training, dealing with friends, school, and summer camp, and much more. The book includes an appendix and sections on further reading, organizations and websites, residential and hospital programs, and references.

Tradeoff Decisions in System Design A. Terry Bahill, Azad M. Madni, 2016-12-14 This textbook is about three key aspects of system design: decision making under uncertainty, trade-off studies and formal risk analyses. Recognizing that the mathematical treatment of these topics is similar, the authors generalize existing mathematical techniques to cover all three areas. Common to these topics are importance weights, combining functions, scoring functions, quantitative metrics, prioritization and sensitivity analyses. Furthermore, human decision-making activities and problems use these same tools.

Therefore, these problems are also treated uniformly and modeled using prospect theory. Aimed at both engineering and business practitioners and students interested in systems engineering, risk analysis, operational management, and business process modeling, Tradeoff Decisions in System Design explains how humans can overcome cognitive biases and avoid mental errors when conducting trade-off studies and risk analyses in a wide range of domains. With generous use of examples as a common thread across chapters this book. "This book provides an excellent road map for designing and producing competitive products."
