The Forever Prisoner Cathy Scott-Clark, Adrian Levy, 2022-04-12 Some argued it would save the U.S. after 9/11. Instead, the CIA's enhanced interrogation program came to be defined as American torture. *The Forever Prisoner*, a primary source for the recent HBO Max film directed by Academy Award winner Alex Gibney, exposes the full story behind the most divisive CIA operation in living memory. Six months after 9/11, the CIA captured Abu Zubaydah and announced he was number three in Al Qaeda. Frantic to thwart a much-feared second wave of attacks, the U.S. rendered him to a secret black site in Thailand, where he collided with retired Air Force psychologist James Mitchell. Arguing that Abu Zubaydah had been trained to resist interrogation and was withholding vital clues, the CIA authorized Mitchell and others to use brutal "enhanced interrogation techniques" that would have violated U.S. and international laws had not government lawyers rewritten the rulebook. In *The Forever Prisoner*, Cathy Scott-Clark and Adrian Levy recount dramatic scenes inside multiple black sites around the world through the eyes of those who were there, trace the twisted legal justifications, and chart how enhanced interrogation, a key "weapon" in the global "War on Terror," metastasized over seven years, encompassing dozens of detainees in multiple locations, some of whom died. Ultimately that war has cost 8 trillion dollars, 900,000 lives, and displaced 38 million people—while the U.S. Senate judged enhanced interrogation was torture and had produced zero high-value intelligence. Yet numerous men, including Abu Zubaydah, remain imprisoned in Guantanamo, never charged with any crimes, in contravention of America's ideals of justice and due process, because their trials would reveal the extreme brutality they experienced. Based on four years of intensive reporting, on interviews with key protagonists who speak candidly for the first time, and on thousands of previously classified documents, *The Forever Prisoner* is a powerful chronicle of a shocking experiment that remains in the headlines twenty years after its inception, even as US government officials continue to thwart efforts to expose war crimes. Silenced by a CIA pledge to keep him imprisoned and incommunicado forever, Abu Zubaydah speaks loudly through these pages, prompting the question as to whether he and others remain detained not because of what they did to us but because of what we did to them.

The Book of Honor Ted Gup, 2001-05-01 A national bestseller, this extraordinary work of investigative reporting uncovers the identities, and the remarkable stories, of the CIA secret agents who died anonymously in the service of their country. In the entrance of the CIA headquarters looms a huge marble wall into which seventy-one stars are carved—each representing an

agent who has died in the line of duty. Official CIA records only name thirty-five of them, however. Undeterred by claims that revealing the identities of these nameless stars might compromise national security, Ted Gup sorted through thousands of documents and interviewed over 400 CIA officers in his attempt to bring their long-hidden stories to light. The result of this extraordinary work of investigation is a surprising glimpse at the real lives of secret agents, and an unprecedented history of the most compelling—and controversial—department of the US government.

Pandora's Trap Thomas Preston,2011-09-16 How important is presidential personality and leadership style in foreign policy decisions? To answer this question, Thomas Preston takes readers inside the Bush administration's decision-making process and use of intelligence to better understand how administration officials justified the Iraq War—and how they sought to avoid blame for the consequences of their actions. Based on extensive interviews with key Bush administration officials, Preston offers students of American foreign policy, presidential decision making, the dynamics of blame avoidance, and future practitioners with an in depth examination of how presidential personality and leadership style impacted Bush's central foreign policy failure. In addition, Preston looks critically at the oft-cited comparisons of Iraq to Lyndon Johnson's leadership during the Vietnam War, exploring where the analogy fits and a number of important differences. He shows how both presidents' styles exacerbated their managerial weaknesses in these cases and the limits of blame avoidance strategies. Importantly, the book provides a cautionary tale for future leaders to consider more carefully the long-term consequences of satisfying their short term policy desires by lifting the lid to any new Pandora's trap.

Using the IBM Security Framework and IBM Security Blueprint to Realize Business-Driven Security Axel Buecker,Saritha Arunkumar,Brian Blackshaw,Martin Borrett,Peter Brittenham,Jan Flegr,Jaco Jacobs,Vladimir Jeremic,Mark

Johnston, Christian Mark, Gretchen Marx, Stefaan Van Daele, Serge Vereecke, IBM Redbooks, 2014-02-06 Security is a major consideration in the way that business and information technology systems are designed, built, operated, and managed. The need to be able to integrate security into those systems and the discussions with business functions and operations exists more than ever. This IBM® Redbooks® publication explores concerns that characterize security requirements of, and threats to, business and information technology (IT) systems. This book identifies many business drivers that illustrate these concerns, including managing risk and cost, and compliance to business policies and external regulations. This book shows how these drivers can be translated into capabilities and security needs that can be represented in frameworks, such as the IBM Security Blueprint, to better enable enterprise security. To help organizations with their security challenges, IBM created a bridge to address the communication gap between the business and technical perspectives of security to enable simplification of thought and process. The IBM Security Framework can help you translate the business view, and the IBM Security Blueprint describes the technology landscape view. Together, they can help bring together the experiences that we gained from working with many clients to build a comprehensive view of security capabilities and needs. This book is intended to be a valuable resource for business leaders, security officers, and consultants who want to understand and implement enterprise security by considering a set of core security capabilities and services.

The Hundred-Year Marathon Michael Pillsbury,2015-02-03 One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise - and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping

the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the China Dream is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, *The Hundred-Year Marathon* reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the hawks in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders - as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped - sometimes unwittingly and sometimes deliberately - to make this China Dream come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. *The Hundred-Year Marathon* is a wake-up call as we face the greatest national security challenge of the twenty-first century.

A Great Place to Have a War Joshua Kurlantzick, 2017-01-24 The untold story of how America's secret war in Laos in the 1960s transformed the CIA from a loose collection of spies into a military operation and a key player in American foreign policy. January, 1961: Laos, a tiny nation few Americans have heard of, is at risk of falling to communism and triggering a domino effect throughout Southeast Asia. This is what President Eisenhower believed when he approved the CIA's Operation Momentum, creating an army of ethnic Hmong to fight communist forces there. Largely hidden from the American public—and most of Congress—Momentum became the largest CIA paramilitary operation in the history of the United States. The brutal war lasted more than a decade, left the ground littered with thousands of unexploded bombs, and changed the nature of the CIA forever. With “revelatory reporting” and “lucid prose” (*The Economist*), Kurlantzick provides the definitive account of the Laos war, focusing on the four key people who led the operation: the CIA operative whose idea it was, the Hmong general who led the proxy army in the field, the paramilitary specialist who trained the Hmong forces, and the State Department careerist who took control over the war as it grew. Using recently declassified records and extensive interviews, Kurlantzick shows for the first time how the CIA's clandestine adventures in one small, Southeast Asian country became the template for how the United States has conducted war ever since—all the way to today's war on terrorism.

Developing Digital Detectives Jennifer LaGarde, Darren Hudgins, 2021-09-28 From the authors of the bestselling *Fact vs.*

Fiction, this book offers easy-to-implement lessons to engage students in becoming media literacy “digital detectives,” looking for clues, questioning motives, uncovering patterns, developing theories and, ultimately, delivering a verdict. The current news landscape is driven by clicks, with every social media influencer, trained and citizen journalists chasing the same goal: a viral story. In this environment, where the race to be first on the scene with the most sensational story often overshadows the need for accuracy, traditional strategies for determining information credibility are no longer enough. Rather than simply helping students become savvy information consumers, today’s educators must provide learners with the skills to be digital detectives – information interrogators who are armed with a variety of tools for dissecting news stories and determining what’s real and what isn’t in our “post-truth world.” This book:

- Shares meaningful lessons that move beyond traditional “fake news” protocols to help learners navigate a world in which information can be both a force for good and a tool used to influence and manipulate.
- Includes resources and examples to support educators in the work of facilitating engaging, relevant (and fun!) instructional opportunities for K-12 learners, in both face-to-face and digital learning environments.
- Unpacks the connection between social-emotional learning and information literacy.
- Includes access to the Digital Detective’s Evidence Locker, an online collection of over 100 downloadable and remixable resources to support the lessons in the book. As the authors state: “Remember, the detective’s job is NOT to prove themselves correct. Their job is to detect the truth!” This statement reflects the way they approach the lessons in this book, providing clear and practical guidance to help educators address and overcome this ever-expanding issue.

How to Change Your Mind Michael Pollan, 2019-05-14 Now on Netflix as a 4-part documentary series! “Pollan keeps you turning the pages . . . cleareyed and assured.” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism.

By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's mental travelogue is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.
