*The Science of College* Patricia S. Herzog,Casey T. Harris,Shauna A. Morimoto,Jill G. Wheeler,2020 This book aids entering college students - and the people who support college students - in navigating college successfully. In an environment of information overload, where bad advice abounds, this book offers readers practical tips and guidance. The up-to-date recommendations in this book are based upon real students, sound social science research, and the collective experiences of faculty, lecturers, advisors, and student support staff. The central thesis of the book is that the transition to adulthood is a complex process, and college is pivotal to this experience. This book seeks to help young people navigate the college process. The student stories in this book highlight how the challenges that college students can encounter vary in important ways based on demographics and social backgrounds. Despite these varied backgrounds, getting invested in the community is crucial for college success, for all students. Universities have many resources available, but students need to

learn when to access which resources and how best to engage with people serving students through different roles and with distinct expertise. There is no single template for student success. Yet, this book highlights common issues that many students face and provides science-based advice for how to navigate college. Each chapter is geared toward college students with a focus on the life stage that many entering college students are in: emerging adulthood. In addition to the student-focused chapters, the book includes an appendix for parents and for academics, along with supplemental website materials of instructional activities related to the content of the book.--

*The Case against Education* Bryan Caplan,2019-08-20 Why we need to stop wasting public funds on education Despite being immensely popular—and immensely lucrative—education is grossly overrated. Now with a new afterword by Bryan Caplan, this explosive book argues that the primary function of education is not to enhance students' skills but to signal the qualities of a good employee. Learn why students hunt for easy As only to forget most of what they learn after the final exam, why decades of growing access to education have not resulted in better jobs for average workers, how employers reward workers for costly schooling they rarely ever use, and why cutting education spending is the best remedy. Romantic notions about education being good for the soul must yield to careful research and common sense—The Case against Education points the way.

**College Admission Essentials** Ethan Sawyer,2020-07-21 You can get into the perfect school! You may think that getting an acceptance letter from selective colleges and universities is a mad dash to the top that only the very best students survive, and those who make it are just the lucky ones. Stress levels soar as it feels like the bar is rising higher and everything is out of your control. But that's not true! You can take control, and you can do it in a way that's as effective as it is empowering. From describing your extracurriculars to interviews with admission officers, it comes down to two questions: What matters most to you? How does it manifest in your life? The answers will give direction to every part of the admission process. Ethan Sawyer (the College Essay Guy), along with dozens of top admission experts, will help you stand out by showing colleges and universities how your values and your drive will change you, your alma mater, and the world. Broaden your analysis. Use pivot tables, slicers, and timelines to examine your data from different perspectives. Import data. Pull data from a variety of sources, including website data feeds and corporate databases. Work from the Web. Launch and manage your workbooks on the road, using the new Excel Web App. Share your worksheets. Store Excel files on SkyDrive and collaborate with colleagues on Facebook, Twitter, and LinkedIn. Master the new data model. Use PowerPivot to work with millions of rows of data. Make calculations. Review financial data, use math and scientific formulas, and perform statistical analyses.

**168 Hours** Laura Vanderkam,2011-05-31 It's an unquestioned truth of modern life: we are starved for time. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or if we don't make excuses, we make sacrifices- taking time out from other things in order to fit it all in. There has to be a better way...and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. When plans go wrong and they run out of time, only their lesser priorities suffer. Vanderkam shows that with a little examination and prioritizing, you'll find it is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter.

**Family Oral History Across the World** Mary Louise Contini Gordon,2023-11-30 Family Oral History Across the World presents a process for memorializing family histories, bringing together established oral history standards, exploratory

research, and narrative data analysis. Based on and using a prequestionnaire and over 40 recorded interviews with people from across six continents, the analysis system used in the book presents material from these interviews that brings alive the experience of the family history journey. One of the guiding principles is to encourage readers to interview family members, but also others outside the family unit, and to produce a family history in whatever format works. The book illustrates this through the inclusion of many unusual formats and stories uncovered. The book is divided into a number of themes that emerged through the analysis of numerical questionnaire and narrative interview data. Parts I, II, and III cover changing family demography, case studies, and factors such as memory, emotion, and ethics. Part IV offers a pliable process and practice guide with input and examples from interviews. It also discusses developing approaches to presenting oral histories from both oral historians and other interviewers and writers, such as journalists. With case studies as well as example guidelines and templates, this volume is ideal both for academics interested in family history as well as professional genealogists and families themselves.
