Compensation Schemes for Damages Caused by Healthcare and Alternatives to Court Proceedings Dobrochna Bach-Golecka,2021-05-16 The book discusses compensation mechanisms and other non-judicial means that offer alternatives to court proceedings, designed and provided for within national legal regimes. Such schemes are primarily of a civil or administrative character and are mainly intended to supplement criminal liability for medical negligence. As such, the book

focuses on medical malpractice and prospective medical harm from a civil law perspective. It examines the contemporary perspective of a patient-physician relationship, which has evolved from a relation of a quasi-patrimonial character into a partnership of quasi-equal parties, dealing with a medical treatment procedure as a scientific endeavor. It also reviews the extra-legal conditions that are taken into account in compensation arrangements, particularly the need to satisfy a psychological urge for conciliation and empathy on the part of medical personnel. Lastly, the book explores the responsibility of public authorities and healthcare providers to guarantee access to healthcare that is of a sufficient quality, based upon standards provided for in international (and European) law.

Debt Collection Letters & Forms Michelle Dunn, 2014-06-09 You can use these letters as they are, modify them to suit your needs or your business or just use one sentence from a letter. Each letter should be on your company letterhead and include your company name, address, phone and fax, web address, email and any other contact information. The letters that get the best results are not form letters. If a letter looks like a form letter it loses some of its punch. The most effective letters are short, to the point and easy to read. Try to avoid long or confusing words and sentences. The more direct, the fewer misunderstandings. Have someone read your letter and see if they totally understand it. If they do, then chances are your debtor will, too. Your letter is a reflection of your business; keep it professional. Remember that your letter is to persuade someone to send you money. Your wording and tone are critical, especially if this is a customer you want to continue to do business with. Always assume the debtor will pay. Enclosing an envelope for payment is always a good idea. You can also include an envelope with postage. The easier you make it for the debtor to make payment, the better your chances are of receiving that payment. Collection letters should do two things: retain customer good will and help you get paid. You know a letter works well when you do a mailing and your phone rings off the hook when everyone receives their letters. If you send out a letter and there is no response, you need to re-work your letter.

Defending the indefensible Great Britain: Parliamentary and Health Service Ombudsman, 2011-09-14 This report concerns a complaint by Mr A (now deceased) and his siblings, who were British civilians interned by the Japanese in Singapore in 1945. In 2000 they applied to the compensation scheme set up by the British Government to recognise the 'debt of honour' owed by the UK to British prisoners of war and civilian internees. They were initially denied compensation because they did not have a close enough link to the UK to qualify, but received a £500 payment and an apology following the Ombudsman's intervention. In 2007, the MoD set up a further scheme to compensate those whose applications to the original scheme were wrongly rejected. Mr A's family was invited to apply to this second scheme, but their application was refused and they were told that the previous apology and payment had been given to them in error. The investigation found that Mr A and his siblings were subjected to prolonged and aggravated distress by the British Government during the 10 years that they struggled to resolve their compensation claims with the MoD. The MoD mismanaged the administration of the second

compensation scheme and had incorrectly and offensively retracted a previous apology issued to them. The Secretary of State for Defence should apologise personally to the family and pay them the compensation wrongly denied to them (£4,000 each) plus a further £5,000 each in recognition of the distress they suffered. The MoD has accepted all the recommendations and will launch its own review of what went wrong

Professional Negligence Litigation in Practice City Law School (London, England), The City Law School, 2008 Professional Negligence Litigation in Practice has been specifically written to provide students with a detailed introduction to the complex legal issues surrounding professional negligence disputes. Concentrating on two specific areas of professional negligence; clinical negligence and solicitors' negligence, this manual examines and provides practical guidance on how such a case might be most effectively prepared and presented. Split into five distinct parts; the first part of the manual covers selected areas of the substantive law as it relates to professional negligence, namely clinical negligence and solicitors' negligence. Part II deals with the crucial procedural aspects relating to professional negligence cases, building on students' existing knowledge of the Civil Procedural Rules and examining the pre-action protocols and the role of the case management conference. Part III reflects the pragmatic approach adopted by the manual, and has been specifically designed to develop students' drafting skills to the advanced level required in professional negligence cases, and considering in particular the various stages associated with drafting Particulars of Claim and a Defense. Part IV equips students with a guide to the various legal principles, rules, practice directions, codes of guidance, and other sources, which govern the collection, preparation, and delivery of expert and non-expert evidence in clinical and solicitors' negligence cases. The final part of the manual focuses on providing students with an introduction to the key people and bodies whom they will commonly encounter in this area of practice. It also provides consideration of the availability and impact of funding arrangements on professional negligence cases and alternative dispute resolution. This manual will be an invaluable guide for students wishing to practice in civil common law chambers, particularly in the areas of professional negligence or personal injury.

Clinical Trials in Belgium Caroline Trouet,2004 In line with its strong position in clinical research, Belgium is one of the first European Member States where the implementing regulation of the Clinical Trials Directive is fully operational. The specific conditions provided for in the new law concerning experiments on the human person (May 7, 2004) reinforce Belgium as a very attractive host for clinical trials, ensuring a lasting environment for innovative research. pharma.be, the Belgian Pharmaceutical Industry Association, wants to contribute its part to research in Belgium by clarifying the practical implications of the new regulations. At its request, dr. iur. Caroline Trouet wrote an Operational Guidance, which analyses

the new Belgian law from the perspective of the sponsor of a clinical trial, but addresses the roles and tasks of all parties involved in clinical trials. In order to assist everyone involved in clinical trials in the practical implementation of the new law, the Guidance provides for a short and comprehensive overview and insight into the process flows of the submission to and evaluation by the competent authority and the ethics committee of a clinical trials application. In addition, standard templates for the most important documents are added. The text is useful, both for study sponsors and for all other actors in the field of medical research and development such as members of ethics committees, physicians, pharmacists, administrators etc.; by those who have had access to the manuscript, it is already qualified as the standard textbook on the new EU legal framework and its transposition into Belgian law.
