Construction Forms & Contracts Craig Savage, Karen Mitchell, 1994 Donation/No CD with book.

The Construction Contracts Book Daniel S. Brennan, 2008 Most construction lawyers are familiar with the American Institute of Architects (AIA), Engineers Joint Contract Documents Committee (EJCDC) forms of agreements, and the newer ConsensusDOCS forms. The ConsensusDocs forms replace many of the forms previously issued by the Associated General Contractors of America (AGC). Now completely revised, this invaluable resource offers a topic-by-topic comparison of these forms by providing: - An easy-reference guide to how the AIA, ConsensusDOCS and EJCDC forms treat the most significant issues in owner/contractor/subcontractor and owner/design professional agreements - Proposed alternative language for situations where the form contract approach may not provide the best solution - List comparing the most significant provisions from each of these forms (on the CD-ROM)

Understanding and Negotiating Construction Contracts Kit Werremeyer, 2023-07-19 Understanding and Negotiating Construction Contracts The complexities of construction contracts are made easy with this thorough and readable guide Construction contracts can be complex for both owners and contractors. For contractors, negotiating fair and balanced commercial terms in contracts is just as important as properly managing projects; a properly negotiated contract can mitigate unnecessary risk and unnecessary risk transfer. This, in turn, reduces exposure to financial liability for the contractor and for avoidance of contract claims and disputes. Understanding and Negotiating Construction Contracts provides a comprehensive and readable introduction to the world of construction contracts. Providing, for example, coverage of the four most common types of contracts—lump sum/fixed-price, cost-plus, time-and-materials, and unit-pricing—it promises to reduce uncertainty and allow contractors to enter contractual negotiations with greater confidence to be able to achieve a fair and balanced contract. This updated new edition reflects the up-to-date best practices to understand how to better negotiate the commercial terms and conditions in construction contracts. Readers of the second edition of Understanding and Negotiating Construction Contracts will also find: Updated information on indemnity, insurance, and negotiation An all-new chapter with a contract analysis checklist Real-world examples drawn from small residential, retail, large commercial, and international projects Understanding and Negotiating Construction Contracts is essential for construction professionals and college students studying construction contracts and the liabilities arising out of them.

Contract Documentation for Contractors Vincent Powell-Smith,John H. M. Sims,Christopher Dancaster,2008-04-30 The JCT standard forms of building contract require a thorough understanding of their procedural requirements, as well as their legal implications. They require both the contractor and the architect, on behalf of the employer, to send a wide range of notices and letters if each party is to protect its legitimate interests. The main contract forms are also supported by complex sub-contract documentation. Therefore, it is not surprising that when this book of specimen letters, notices and forms was first published, it was widely welcomed by the construction industry. The book provides examples of documentation likely to be required for a contract under the following JCT forms: the Standard Form of Building Contract the Intermediate Form of Building Contract the Agreement for Minor Building Works the Standard Form of Building Contract With Contractor's Design It includes a commentary on the practical implications of the various documents and highlights the points to be watched. The new edition takes into account the wide range of amendments to the latest editions of the standard forms following the Housing Grants, Construction and Regeneration Act 1996, and in particular, the new payment and adjudication provisions. For the first time it features documentation for use with the JCT design and build form.

Alternative Clauses to Standard Construction Contracts James E. Stephenson,1990 This valuable reference, edited by one of the most respected names in construction law, presents the modifications and alternative clauses used by experienced attorneys in changing the most frequently discussed and controversial sections of the standard forms. In presenting selected alternative contract clauses to the AIA contracts, this book addresses the concerns of owners, developers, contractors, subcontractors and others who wish to supplement or modify the standard forms, and provides a complete rationale for each suggested modification. Attorneys for the various parties, on a variety of construction projects, can now easily shift project risks and liabilities to better project client interests by employing proven alternative clauses for contracts between owners and architects, and owners and contractors are included, and certain improvements to AIA's cost-plus construction contract forms are presented. The outstanding contributors to this work also address payment disputes that delay damage issues and other frequently contested and amended 'hot spots.' The most comprehensive sourcebook of its kind, Alternative Clauses to Standard Construction Contracts points up the benefits and limitations of each clause as seen from the standpoint of each party involved.
