*Building Integrated Websites with IBM Digital Experience* Bernd Beilke,Darren Cacy,Dmitri Nevedrov,Dineshababu Ramakrishnan,JayaPrasad Thambuganipalle,Basem Zaben,IBM Redbooks,2016-01-22 A digital experience is a personalized experience that provides employees, customers, business partners, and citizens with a single point of interaction with people, content, and applications anywhere, anytime, and from any device. The IBM® Digital Experience is a platform that is used to build powerful contextual websites. The strengths of the platform include the ability to mix applications and web content into a coherent user experience. Developers can build upon a prescriptive standard to build reusable building bricks, which can be used by line-of-business (LOB) users in a flexible way. LOB users can assemble pages from these building bricks and from rich web content. The page creation is performed inline by easy drag-and-drop operations without requiring sophisticated IT skills. This IBM Redbooks® publication describes how a team can build a website starting from a new installation of Digital Experience. The book provides examples of the basic tasks that are needed to get started with building a proof-of-concept (PoC) website example. The resulting example website illustrates the value and key capabilities of the Digital Experience suite, featuring IBM WebSphere® Portal and IBM Web Content Management. The target audiences for this book include the following groups: Decision makers and solution architects considering Digital Experience as a platform for their internal or external facing website. Developers who are tasked to implement a PoC and must be enabled to start quickly and efficiently, which includes the integration of existing back-end systems. A wide range of IBM services and sales professionals who are involved in selling IBM software and designing client solutions that include Digital Experience.

Culture and Content in French Aurélie Chevant-Aksoy,2022-04-14 Instructors in today's language classrooms face the challenge of preparing globally competent and socially responsible students with transcultural aptitude. As classroom content shifts toward communication, collaboration, and problem solving across cultural, racial, and linguistic boundaries, the teaching of culture is an integral part of foreign language education. This volume offers nontraditional approaches to teaching culture in a complex time when the internet and social networks have blurred geographical, social, and political borders.The authors offer practical advice about teaching culture with kinesthetics, music, improvisation, and communication technologies for different competency levels.The chapters also explore multi-literacies, project-based learning, and discussions on teaching culture through literature, media, and film.The appendices share examples of course syllabi, specific course activities, and extracurricular projects that explore culinary practices, performing arts, pop culture, geolocation, digital literacy, journalism, and civic literacy.

*Hugo in Action* Atishay Jain,2022-05-17 Build and deploy a live website in just 30 minutes using Hugo. The Hugo engine lets you rapidly deliver static sites that are low maintenance, high performance, and feature rich. In Hugo in Action you will learn: Building web pages with Hugo and Jamstack Creating content using Markdown Content management with Hugo Designing new Hugo themes Using the Go template language Managing dependencies with Hugo modules Accessing APIs

with Jamstack Adding a shopping cart using JavaScript Content tagging with markup Sometimes, simple is better. Static websites—sites with fixed content—are easier to create and maintain, and inherently more secure than dynamic pages. Hugo in Action is a hands-on guide to using the Hugo static site engine to render these websites in milliseconds. Working with a complete example website and source code samples, you'll learn how to build and host a site that will wow users and stay stable without a third-party server. Full coverage of the Jamstack (Javascript, APIs, Markdown) shows how easy it is to add complex features to super-simple sites, including eCommerce shopping carts, dynamic forms, and multilingual options. About the technology Because they load pre-built pages, static websites are simple, secure, and incredibly fast. With the Hugo static site generator you can build and render a website in seconds without the grind of hand coding the pages. Hugo takes a directory of content and templates and renders it as a full HTML and CSS website—perfect for blogs, documentation, and other sites that don't require real-time updates. About the book In Hugo in Action you'll learn step-by-step how to build efficient, low-maintenance static web sites. You'll use Hugo as a CMS and web development environment, create custom pages, and design your own Hugo themes. And you won't stop there! Moving beyond the basics, you'll incorporate the Jamstack model to add capabilities like eCommerce and your own APIs. The result: rich websites that are flexible and incredibly stable. What's inside Building web pages with Hugo and Jamstack Using the Go template language Managing dependencies with Hugo modules Content tagging with markup About the reader For web developers with a basic knowledge of JavaScript. **Handbook of Research on Credential Innovations for Inclusive Pathways to Professions** Huang, Yi, 2021-09-24 With increasingly interconnected educational and employment ecosystems, credential innovations are trailblazing multiple pathways to professions at a pivotal moment of rapid change. In the current state of credential proliferation, the quest for simultaneous improvement of quality and value reflects heightened cross-sector interests, while at the same time the quest for concurrent enhancement of access and success remains. With the evolving educational models, technologies, and organizations, credential innovations will continue to serve as powerful catalysts in realizing the great promise for inclusive pathways to professions. The Handbook of Research on Credential Innovations for Inclusive Pathways to Professions surveys the state of credential innovations, examines trends and issues, and explores models and strategies with case studies across

sectors and disciplines. The 21 chapters are organized in three sections. Section I, Credential Innovations Amid Evolving Ecosystems, features a powerful array of change theories-in-action with topics ranging from conceptual re-visioning to organizational restructuring and programmatic reengineering within evolving ecosystems. Section II, Credential Innovations and Propositions Across Sectors, spotlights diverse approaches to and propositions of credentials within complex socio-economic landscapes across education, business, and technology industries. Section III, Credential Innovation Models and Strategies, showcases institutional innovations ranging from model developments, pedagogical approaches, and personalized engagements to outcome measurements and strategies for sustainable implementation. Lessons learned and implications are explored to share promising practices, inform current development, and influence future policies toward inclusive excellence in education and the workplace.
