Lynn Stacy-Smith

The Weather Experiment Peter Moore, 2015-06-02 A history of weather forecasting, and an animated portrait of the nineteenth-century pioneers who made it possible. By the 1800s, a century of feverish discovery had launched the major branches of science. Physics, chemistry, biology, geology, and astronomy made the natural world explicable through experiment, observation, and categorization. And yet one scientific field remained in its infancy. Despite millennia of observation, mankind still had no understanding of the forces behind the weather. A century after the death of Newton, the laws that governed the heavens were entirely unknown, and weather forecasting was the stuff of folklore and superstition. Peter Moore's *The Weather Experiment* is the account of a group of naturalists, engineers, and artists who conquered the elements. It describes their travels and experiments, their breakthroughs and bankruptcies, with picaresque vigor. It takes readers from Irish bogs to a thunderstorm in Guanabara Bay to the basket of a hydrogen balloon 8,500 feet over Paris. And it captures the particular bent of mind—combining the Romantic love of Nature and the Enlightenment love of Reason—that allowed humanity to finally decipher the skies.

Love, Laugh, Woof Lynn Stacy-Smith, 2016-08-09 From the time she was five years old, author Lynn Stacy-Smith has lived side by side with dogs as her best friends and constant companions. *Love, Laugh, Woof*, a memoir and guide to being a compassionate forever dog owner, shares a collection of stories from the author's life with her dogs as a tribute to how her dogs brought joy and adventure into her childhood and later life. It segues from her memories into a training manual and pet care book that helps potential pet owners decide if a dog is right for them, and the importance of training and teaching the dog the rules of living in a human world. Smith shares the responsibilities involved in bringing a pet into their lives, and she strives to help people become more compassionate and understanding dog owners. A combination of anecdotes and instructional materials, *Love, Laugh, Woof* offers a look at Smith's philosophy on dog ownership. *Love, Laugh, Woof* is a way of life and a set of beliefs that she follows to be a loving, thoughtful and fair dog owner.

The Framework for Teaching Evaluation Instrument, 2013 Edition Charlotte Danielson,2013 The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

Generative and Component-Based Software Engineering Krzysztof Czarnecki, Ulrich W. Eisenecker, 2000-09-27 In the past two years, the Smalltalk and Java in Industry and Education Conference (STJA) featured a special track on generative programming, which was organized by the working group \Generative and Component-Based Software Engineering of the \Gesellschaft für Informatik FG 2.1.9 \Object-Oriented Software Engineering. This track covered a wide range of related topics from domain analysis, software system family engineering, and software products, to extendible compilers and active libraries. The talks and keynotes directed towards this new software engineering paradigm received much attention and interest from the STJA audience. Hence the STJA organizers suggested enlarging this track, making it more visible and open to wider, international participation. This is how the GCSE symposium was born. The first GCSE symposium attracted 39 submissions from all over the world. This impressive number demonstrates the international interest in generative programming and related fields. After a careful review by the program committee, fifteen papers were selected for presentation. We are very grateful to the members of the program committee, all of them renowned experts, for their dedication in

preparing thorough reviews of the submissions. Special thanks go to Elke Pulvermuller and Andreas Speck, who proposed and organized a special conference event, the Young Researches Workshop (YRW). This workshop provided a unique opportunity for young scientists and Ph.D.
