**Understanding by Design** Grant P. Wiggins,Jay McTighe,2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Wiggins and McTighe provide an expanded array of practical tools and strategies for designing curriculum, instruction, and assessments that lead students at all grade levels to genuine understanding. Thousands of educators have used the *Understanding by Design* (UbD) framework to answer these questions and create more rigorous, engaging curriculums. Now, this expanded 2nd edition gives you even more tools and strategies for results-oriented

teaching: \* An improved template for creating curriculum units based on the breakthrough backward design method. \* More specific guidelines on how to frame the big ideas you want students to understand. \* Better ways to develop the essential questions that form the foundation of high-quality curriculum and assessment. \* An expanded toolbox of instructional approaches for obtaining the desired results of a lesson. \* More examples, across all grade levels and subjects, of how schools and districts have used the UbD framework to maximize student understanding. The text first discusses Perceptive Teaching: the belief that teachers must know themselves and their students while cultivating culturally sensitive, safe, and inviting spaces for learning for all students. Next, five unique approaches to lesson planning are explored: behaviorist, constructivist, aesthetic, ecological, and integrated social-emotional learning. Each chapter provides the rationale for the approach, its theoretical background, practical applications, and critiques and considerations. Chapters end with a sample lesson that can be compared across approaches. Book Features: A comprehensive examination of multiple approaches to lesson planning. Guidance for teachers on when to choose various approaches, as well as how they might mix and match and blend ideas. User-friendly lesson plan templates, sample lessons, and discussion questions. An

appendix with lesson plan examples written by practicing teachers across content areas and age groups.

In the complex and challenging environment, that is the classroom in the Knowledge Age, having the personal capacity to design the classroom curriculum so that all students make the required learning gains is the today's benchmark for teaching success. The authors provide an insight into how to design the classroom curriculum so that all students make the required learning gains.
