[The Role of Procurement Professionals in Industrial Projects](#) Mario Büsch,2014-04-23 This doctoral-thesis deals with the role of procurement professionals in industrial projects. The role of procurement in industrial manufacturing has attracted considerable attention over the last several years; however, the role of procurement in projects is rather underresearched.

From a project management point of view, procurement is mainly considered a transactional task, and remarkably few project management standards consider procurement at all. To overcome this gap, a Procurement Project Involvement Matrix has been developed. Building on this matrix, a Project Procurement Organisation Model for procurement experts involved into industrial projects was developed, too. In general, the project procurement job tasks framework as well as the Project Procurement Organisation Model will help to implement, improve and audit the involvement level of procurement in projects.

Conceptual Modeling Gillian Dobbie, Ulrich Frank, Gerti Kappel, Stephen W. Liddle, Heinrich C. Mayr, 2020-10-29 This book constitutes the refereed proceedings of the 39th International Conference on Conceptual Modeling, ER 2020, which was supposed to be held in Vienna, Austria, in November 2020, but the conference was held virtually due to the COVID-19 pandemic. The 28 full and 16 short papers were carefully reviewed and selected from 143 submissions. This event covers a wide range of topics, and the papers are organized in the following sessions: foundations of conceptual modeling; process mining and conceptual modeling; conceptual modeling of business rules and processes; modeling chatbots, narratives and natural language; ontology and conceptual modeling; applications of conceptual modeling; schema design, evolution, NoSQL; empirical studies of conceptual modeling; networks, graphs and conceptual modeling; and conceptual modeling of complex and data-rich systems.

The Semantic Web - ISWC 2004 Sheila A. McIlraith, Dimitris Plexousakis, Frank van Harmelen, 2004-10-19 The 3rd International Semantic Web Conference (ISWC 2004) was held November 7-11, 2004 in Hiroshima, Japan. If it is true what the proverb says: "Once by accident, twice by habit, three times by tradition," then this third ISWC did indeed firmly establish a tradition. After the overwhelming interest in last year's conference at Sanibel Island, Florida, this year's conference showed that the Semantic Web is not just a one-day wonder, but has established itself firmly on the research agenda. At a time when special interest meetings with a Semantic Web theme are springing up at major conferences in numerous areas (ACL, VLDB, ECAI, AAAI, ECML, WWW, to name but a few), the ISWC series has established itself as the primary venue for Semantic Web research. Response to the call for papers for the conference continued to be strong. We solicited submissions to three tracks of the conference: the research track, the industrial track, and the poster track. The research track, the premier venue for basic research on the Semantic Web, received 205 submissions, of which 48 were accepted for publication. Each submission was evaluated by three program committee members whose reviews were coordinated by members of the senior program committee. Final decisions were made by the program co-chairs in consultation with the conference chair and the senior program committee. The industrial track, soliciting papers describing industrial research on the Semantic Web, received 22 submissions, of which 7 were accepted for publication.

Commercial Delivery Methodology Robin Hornby,2019-11-12 The Commercial Delivery Methodology, or CDM, is offered as an effective means for vendor organizations to formalize their professional services business. It documents the CDM as an instance of a business lifecycle appropriate for the larger services firm with the need to bid and manage a relatively high percentage of large, fixed price, and potentially higher risk projects. The chapters describe each phase of the business lifecycle in the management of project opportunities and contracts. The CDM is a much-needed tool of business management, incorporating many project management practices, and operates alongside the project, or application, lifecycle familiar to project managers and their team. Large format (8½ x11), 39 templates, 5 deployment charts, 5 process diagrams, 17 IPO diagrams, Glossary.

Ship Sale and Purchase Iain Goldrein, Matt Hannaford, Paul Turner, 2023-09-04 Ship Sale and Purchase is the essential working guide for anyone involved in the business of making ship sale and purchase agreements and also in the resolution of disputes arising out of such agreements. The seventh edition of Ship Sale and Purchase contains a detailed clause-by-clause analysis of SHIPSALE 22, the new standard form Memorandum of Agreement for ship sales and purchases published by BIMCO in 2022. This clause-by-clause analysis is supplemented by commentary on the corresponding provisions of the other leading standard forms used in the global shipping markets - SALEFORM 2012 (the latest version of the longstanding standard form produced by the Norwegian Shipbrokers' Association), SINGAPORE SHIP SALE FORM 2011 and NIPPONSALE 1999 - and the main differences between these forms and SHIPSALE 22. This edition of Ship Sale and Purchase also contains a comprehensive description of the many ways in which standard form agreements may be modified, through amendments to the printed terms and the use of additional clauses, to suit the particular requirements of the parties to individual transactions. In addition, it analyses relevant decisions of the English courts and arbitration tribunals and explains the implications of these decisions for ship sale and purchase transactions. The seventh edition also includes commentary on changes in working practices such as the use of electronic signatures, the practice of remote closings, payment mechanisms and the impact of sanctions and anti-corruption legislation. As with previous editions, the seventh edition of Ship Sale and Purchase seeks to provide legal analysis, market insight and practical guidance for all those involved in the business of buying and selling second-hand ships.
