Parenting Plan Evaluations Kathryn Kuehnle,Leslie Drozd,2012 When conducting parenting plan evaluations, mental health professionals need to be aware of a myriad of different factors. More so than in any other form of forensic evaluation, they must have an understanding of the most current findings in developmental research, behavioral psychology, attachment theory, and legal issues to substantiate their opinions. With a number of publications on child custody available, there is an

essential need for a text focused on translating the research associated with the most important topics within the family court. This book addresses this gap in the literature by presenting an organized and in-depth analysis of the current research and offering specific recommendations for applying these findings to the evaluation process. Written by experts in the child custody arena, chapters cover issues associated with the most important and complex issues that arise in family court, such as attachment and overnight timesharing with very young children, dynamics between divorced parents and children's potential for resiliency, co-parenting children with chronic medical conditions and developmental disorders, domestic violence during separation and divorce, gay and lesbian co-parents, and relocation, among others. The scientific information provided in these chapters assists forensic mental health professionals to proffer empirically-based opinions, conclusions and recommendations. Parenting Plan Evaluations is a must-read for legal practitioners, family law judges and attorneys, and other professionals seeking to understand more about the science behind child custody evaluations.

Child Custody Mimi E. Lyster, Mimi Lyster Zimmelman, 1995 LAW It is difficult to imagine a situation more fraught with potential conflict than that of divorcing parents discussing custody of their children. Professional mediator Lyster claims that despite the inflexibility that often accompanies family breakups, parents can put together custody agreements that are better than those mandated by a court. She aims here to provide guidance for constructing a parenting agreement that favors the child's needs while defusing the tension that can accompany negotiations. Lyster covers everything from medical care to allowing underage marriage to dealing with the parents' new partners. Compromises and creative solutions are suggested; Lyster also offers techniques for keeping the negotiations civil and productive. There is an interesting discussion on parenting arrangements in all kinds of nontraditional families, and important distinctions among states in regard to custody are noted. Legal and family counseling professionals will shiver at Lyster's assertion that the book can be used without professional intervention, but she is careful to provide advice on finding lawyers, custody evaluators, and counselors. A list of support organizations and the clear, pragmatic approach typical of the publisher's books make this a recommended choice for all popular law collections. Joan Pedzich, Harris, Beach & Wilcox, Rochester, N.Y.--LJ 06/15/1995.

Creating Effective Parenting Plans John Hartson, Brenda Payne, 2006 According to these pediatric psychologists, the best interest of the child calls for a developmentally appropriate parenting plan—that is, custody that accurately reflects the child's physical and psychological development. Even now this concept often faces courtroom challenges as it can conflict with the traditional lawyer-client relationship. This book explores developing alternate parenting schedules (or custody) with the child's best interest and developmental needs considered first.
