Beta maritima enrico biancardi, Leonard W. Panella, Robert T. Lewellen, 2011-12-07 Along the undisturbed shores, especially of the Mediterranean Sea and the European North Atlantic Ocean, is a quite widespread plant called Beta maritima by botanists, or more commonly sea beet. Nothing, for the inexperienced observer's eye, distinguishes it from surrounding wild vegetation. Despite its inconspicuous and nearly invisible flowers, the plant has had and will have invaluable economic and scientific importance. Indeed, according to Linnè, it is considered the progenitor of the beet crops possibly born from Beta maritima in some foreign country. Recent molecular research confirmed this lineage. Selection applied after domestication has created many cultivated types with different destinations. The wild plant always has been harvested and used both for food and as a medicinal herb. Sea beet crosses easily with the cultivated types. This facilitates the transmission of genetic traits lost during domestication, which selection processes aimed only at features immediately useful to farmers and consumers may have depleted. Indeed, as with several crop wild relatives, Beta maritima has been successfully used to improve cultivated beet's genetic resistances against many diseases and pests. In fact, sugar beet cultivation currently would be impossible in many countries without the recovery of traits preserved in the wild germplasm. Dr. Enrico Biancardi graduated from Bologna University. From 1977 until 2009, he was involved in sugar beet breeding activity by the Istituto Sperimentale per le Colture Industriali (ISCI) formerly Stazione Sperimentale di Bieticoltura (Rovigo, Italy), where he released rhizomania and cercospora resistant germplasm and collected seeds of Mediterranean sea beet populations as a genetic resource for breeding and ex situ conservation. Retired since 2009, he still collaborates with several working breeders, in particular, at the USDA Agricultural Research Stations, at the Chinese Academy of Agricultural Science (CAAS), and at the Athens University (AUA). He has edited books, books chapters and authored more than 150 papers. Dr. Lee Panella is a plant breeder and geneticist with the USDA-ARS at Fort Collins, Colorado. He earned his B.S. in Crop and Soil Science from Michigan State University, an M.S. in Plant Breeding from Texas A&M University, and a Ph.D. in genetics from the University of California at Davis. His research focus is developing disease resistant germplasm using sugar beet wild relatives. He is chairman of the USDA-ARS Sugar Beet Crop Germplasm Committee and has collected and worked extensively with sea beet. Dr. Robert T. Lewellen was raised on a ranch in Eastern Oregon and obtained a B.S. in Crop Science from Oregon State University followed by a Ph.D. from Montana State University in Genetics. From 1966 to 2008 he

was a research geneticist for the USDA-ARS at Salinas, California, where he studied the genetics of sugar beet and as a plant breeder, often used sea beet as a genetic source to produce many pest and disease resistant sugar beet germplasm and parental lines, while authoring more than 100 publications.

The AWK Programming Language Alfred V. Aho,Brian W. Kernighan,Peter J. Weinberger,2023-09-20 Awk was developed in 1977 at Bell Labs, and it's still a remarkably useful tool for solving a wide variety of problems quickly and efficiently. In this update of the classic Awk book, the creators of the language show you what Awk can do and teach you how to use it effectively. Here's what programmers today are saying: I love Awk. Awk is amazing. It is just so damn good. Awk is just right. Awk is awesome. Awk has always been a language that I loved. It's easy: Simple, fast and lightweight. Absolutely efficient to learn because there isn't much to learn. 3-4 hours to learn the language from start to finish. I can teach it to new engineers in less than 2 hours. It's productive: Whenever I need to do a complex analysis of a semi-structured text file in less than a minute, Awk is my tool. Learning Awk was the best bang for buck investment of time in my entire career. Designed to chew through lines of text files with ease, with great defaults that minimize the amount of code you actually have to write to do anything. It's always available: AWK runs everywhere. A reliable Swiss Army knife that is always there when you need it. Many systems lack Perl or Python, but include Awk. Register your book for convenient access to downloads, updates, and/or corrections as they become available. See inside book for details.

Programming Pearls Jon Bentley,2016-04-21 When programmers list their favorite books, Jon Bentley's collection of programming pearls is commonly included among the classics. Just as natural pearls grow from grains of sand that irritate oysters, programming pearls have grown from real problems that have irritated real programmers. With origins beyond solid engineering, in the realm of insight and creativity, Bentley's pearls offer unique and clever solutions to those nagging problems. Illustrated by programs designed as much for fun as for instruction, the book is filled with lucid and witty descriptions of practical programming techniques and fundamental design principles. It is not at all surprising that *Programming Pearls* has been so highly valued by programmers at every level of experience. In this revision, the first in 14 years, Bentley has substantially updated his essays to reflect current programming methods and environments. In addition, there are three new essays on testing, debugging, and timing set representations string problems All the original programs

have been rewritten, and an equal amount of new code has been generated. Implementations of all the programs, in C or C++, are now available on the Web. What remains the same in this new edition is Bentley's focus on the hard core of programming problems and his delivery of workable solutions to those problems. Whether you are new to Bentley's classic or are revisiting his work for some fresh insight, the book is sure to make your own list of favorites.

Fault Lines Voddie T. Baucham, 2021-04-06 The death of George Floyd at the hands of police in the summer of 2020 shocked the nation. As riots rocked American cities, Christians affirmed from the pulpit and in social media that "black lives matter" and that racial justice "is a gospel issue." But what if there is more to the social justice movement than those Christians understand? Even worse: What if they've been duped into preaching ideas that actually oppose the Kingdom of God? In this powerful book, Voddie Baucham, a preacher, professor, and cultural apologist, explains the sinister worldview behind the social justice movement and Critical Race Theory—revealing how it already has infiltrated some seminaries, leading to internal denominational conflict, canceled careers, and lost livelihoods. Like a fault line, it threatens American culture in general—and the evangelical church in particular. Whether you're a layperson who has woken up in a strange new world and wonders how to engage sensitively and effectively in the conversation on race or a pastor who is grappling with a polarized congregation, this book offers the clarity and understanding to either hold your ground or

reclaim it.

The Last Centurion John Ringo,2009-08-25 In the second decade of the twenty-first century the world is struck by two catastrophes, a new mini-ice age and, nearly simultaneously, a plague to dwarf all previous experiences. Rising out of the disaster is the character known to history as “Bandit Six” an American Army officer caught up in the struggle to rebuild the world and prevent the fall of his homeland—despite the best efforts of politicians both elected and military. The Last Centurion is a memoir of one possible future, a world that is a darkling mirror of our own. Written “blog-style,” it pulls no punches in its descriptions of junk science, bad strategy and organic farming not to mention all three at once.

Improving Employee Performance Through Appraisal and Coaching Donald L. KIRKPATRICK,2006-01-25 Author Donald Kirkpatrick is one of the leading voices on human resources and training and development. For more than forty years, Kirkpatrick's four-level performance evaluation model has been the standard throughout the world, and has revolutionized the way enterprises manage, monitor, and optimize employee performance. The new edition of *Improving Performance Through Appraisal and Coaching* contains all the wisdom and step-by-step processes of the original, with all the guidance and tools you'll need to implement a program that gets maximum results. The book starts with a 40-question test about your organization and its processes and attitudes regarding performance appraisal and coaching. Taking the test both before and after reading the first section of the book will highlight exactly where your existing initiatives can be improved and new ones put in place. Kirkpatrick then goes on to describe in detail how a culture of coaching builds and enhances performance, and how to build this culture across the entire organization. Examples and eye-opening Notes from the Field both reinforce and complement the author's sage recommendations, illustrating how his approaches can be adopted in their entirety or deployed piecemeal, depending on your organization's specific needs. The case studies, both from major employers, prove the overarching value of a proactive performance appraisal program and vibrant coaching environment. The book is packed with ready-to-use forms and, more important, instructions and observations on their effective use. Plus, every chapter is designed for practical application, featuring accessible charts and figures, lists of key points, specific suggestions, cause-and-effect relationships, and much more. While workplaces and jobs have changed dramatically, some truths seem everlasting. One is that in order to obtain exceptional employee performance, you need to build a thorough and consistent appraisal mechanism and coaching program. The other is that there is no one more knowledgeable about how to do it than Donald Kirkpatrick.
