A Business Plan Template for Small Business Allard Colley,2013-06-12 Do you need to write a business plan for your small business? Let's face it, writing a business plan is boring! Most people would rather go to the dentist for a root canal than sit down and write a business plan. But if you run your own business, it's going to be hard to get anywhere without a plan. Want a business loan? The bank manager will want to read your plan and look at where you will spend the money. Want to expand? Your potential partners will want to read your plan and understand how will take market share from your competitors. Want to sell? Your buyers will want to read your plan and find out what the business is really worth. You get the picture; if you are in business, you need a business plan. Now just because writing a business plan is boring does not mean it has to be hard. You can take the hard work out of planning by using a business plan template. In this book, Allard Colley gives you six different business plan templates. These plans cover just about any business that you need to plan for. Allard starts out with a simple questionnaire to decide which is the best plan for you. He then guides you through your plan, step by step. All you need to do is answer the questions and fill in the blanks - it is a simple as that. Before you know it, you have completed your first draft without even trying.

How to Write a Retail Store Business Plan in Ten Steps Paul Borosky MBA,2019-12-12 As a professional business consultant and business plan writer, I am often asked by entrepreneurs, What is the first step to starting a retail store business?When I first started out as a business consultant, I would explain to my client their place in the entrepreneurial process. I then support this analysis with proven academic and practicing business theory, along with recommending specific steps to start or expand their retail store operations.After going through this process time and time again with retail store entrepreneurs, it dawned on me that the first step I ALWAYS recommend is writing a business plan.Unfortunately, most retail store entrepreneurs do not know how to write a professionally polished and structured business plan. Hell, most owners don't know how to write any type of business plan at all. Because of this systemic issue, I decided to write this book focused on a ten-step process for writing a well-structured business plan. The retail store business plan writing steps include all aspects of the business plan writing process, beginning with developing an executive summary to constructing a polished funding request. In each step, I introduce you to a different business plan section. Next, I explain, in layman's terms, what the section means, offer a retail store-specific business plan sample, and analyze the example to help you understand it. The objective of this detailed process is to ensure a full understanding of each segment, with the goal of you being able to write a

professional retail store business plan for yourself, by yourself! IF you still need help writing your business plan, at the end of the book, I ALSO supply you with a professionally written sample retail store business plan AND a retail store business plan template for you to use. To put a proverbial cherry on top, I have conducted and included preliminary retail store market research for you to use in your personalized plans! In the end, I am supremely confident that this book, with its numerous tools and tips, will help you develop a retail store business plan to fit your individual needs.

24-hour Business Plan Template Steven Fies, 2015-09-03 Writing a business plan should be simple, dynamic, and straightforward. More importantly, it must be a FUNCTIONAL tool that advances you forward towards your goals -- rather than holding you back due to endless tinkering and perfecting of your plan without taking action. Enter the 24 Hour Business Plan Template, your functional tool to get you there as efficiently as possible. This is a complete guide that includes a downloadable pre-formatted business plan template and cash flow spreadsheet to help you get started. In the book, I lay out the method I personally used to plan my own business - and in doing so, leave my full-time job and start my business on a full-time basis within seven months. My plan itself was constructed in under 24 hours on January 1, 2015 as my new years resolution; the remainder of the time spent was executing this plan over time. In the book you'll learn how to do the same, or close to it at the very least - and you'll begin to understand why this efficiency in the beginning is so important. To reiterate, it's important to get to the action-taking phase as soon as possible. This cannot be overstated enough. Successful entrepreneurs and authors like Eric Ries, Gabriel Weinberg, and Justin Mares tout this very principle in their books *The Lean Startup* and *Traction* -- the simple fact is, it's much easier to make progress by taking action and adapting over time vs. trying to get everything perfect the first time around. Too much time can be spent getting stuck in your head due to information paralysis or perfectionism, only to wake up one day realizing you've actually done nothing concrete at all to advance your goals. Don't be this person! Get up out of your chair and take action to make your goals happen. Realize that it may take several iterations of creating a business plan, or cycling through various ideas, before you feel confident in moving forward with one in particular. This is okay -- and in fact, it's the exact reason why you need to be efficient during the initial planning and evaluation stage. Much better to spend one or two weeks cycling through 5-10 ideas than an entire year getting nowhere. In this book, we'll cover the following topics: -The importance of validation, and how to validate your business idea. -The key elements of designing an amazing cover page for your business plan. -How to write an executive summary, and why it must be written last after everything else. -The proper elements that make up your Company Objectives section. -The right approach to laying out your Products & Services section. -How to setup a target customer profile including the right questions to ask. -Websites and tables that will greatly simplify your industry and competitor analyses. -Several possibilities for getting started with sales and marketing, and the difference between each. -The key elements that will comprise your operational plan and any business logistics. -What roles need to be defined in your Management section. -The preferred

formats and metrics to use in your business capitalization (initial funding) section. -How to lay out your financial plan, both for your business and your personal finances. Please know fat was trimmed from every section of this book to ensure you can get through it and understand the key principles quickly and move on to actually creating your own plan. Only the critical elements were left in, with additional explanation added at key junctions to ensure comprehension. Whether you're venturing out for your first time as an entrepreneur, or you're a seasoned veteran looking for a no-nonsense way to manage the planning process for your next venture, 24 Hour Business Plan Template belongs on your tool belt.

After all, a business plan is just a document. But to make your business a success, you will have to do it in the real world. So when you try to figure out how to create a business plan, don't just focus on the business plan document. Instead, focus on a plan for the real world with actionable and effective strategies. Get the book now, and start planning your business today.
