Ajax on Rails Scott Raymond,2007-01-03 Learn to build dynamic, interactive web applications using the two most important approaches to web development today: Ajax and the phenomenally efficient Ruby on Rails platform. This book teaches intermediate to advanced web developers how to use both Ajax and Rails to quickly build high-performance, scalable applications without being overwhelmed with thousands of lines of JavaScript code. More than just recipes, you also get a thorough, low-level understanding of what's happening under the hood. Ajax on Rails includes three fully worked out Rails/Ajax applications, and quick reference sections for Prototype and script.aculo.us. Testing lessons show you how to eliminate cross-browser JavaScript errors and DOM debugging nightmares using a combination of Firebug, and Venkman. Advanced material explains the most current design practices for Ajax usability. You'll learn to avoid user experience mistakes with proven design patterns. Beyond the how-to, Ajax on Rails helps you consider when Ajax is (and isn't) appropriate, and the trade-offs associated with it. For those new to Rails, this book provides a quick introduction, the big picture, a walk through the installation process, and some tips on getting started. If you've already started working with Rails and seek to deepen your skill set, you'll find dozens of examples drawn from real-world projects, exhaustive reference for every relevant feature, and expert advice on how to Ajaxify your applications.

Using ICT to Enhance Teaching and Learning in Chemistry Steve Lewis, 2004 Information and Communications Technology has revolutionised the ways we process, access and use information and, as computers and other devices become ever more powerful, and information becomes more readily available, the next generation will need to be able to interact with digital media effectively to exploit these amazing new technologies to their full potential for the benefit of society. It is therefore imperative that teachers become familiar with ICT and its true potential and can present information with a perspective similar to that which the present generation of young people is using to develop their interests in their everyday life. This resource from the RSC gives teachers of chemistry the practical help needed to integrate ICT into their teaching and stimulate the enthusiasm of a new generation of scientists in the exciting new areas of chemistry that are opening up such as Nanoscience and Nanotechnology. Furthermore, it will be highly effective in developing the new ethos of sustainability that will be a major driving force behind the next advances in chemistry that are vital if we are to survive the manifold problems confronting society in the next few decades. This resource is ideal for all secondary teachers of chemistry, trainee teachers and university lecturers.

Symposium on Physiological Psychology United States. Office of Naval Research, 1955 This is the report of a symposium representing the research program of the Physiological Psychology Branch of the Office of Naval Research. Host for the occasion on 10-11 March 1955 was the U.S. Naval School of Aviation Medicine where many ONR contractors in the fields of physiology and aviation psychology have integrated their research with that conducted by the Navy. The physical setting for the symposium provided other ONR contractors with an opportunity to acquaint themselves with research being

conducted at Pensacola, while Pensacola personnel enjoyed the stimulating exchange of information and theories which characterized the sessions. The many outstanding scientists attending represented such diverse fields as physiology, psychology, neuroanatomy, psychophysics, psychoacoustics, and biochemistry. This multiplicity of disciplines provided a rich source of stimulation as each specialist became better aware of the techniques, contributions, and problems of the other, and the relationship of his own efforts to the search for a broader knowledge of the human organism.--Foreword
