*Revolutionizing K-12 Blended Learning through the i<sup>2</sup>Flex Classroom Model* Avgerinou, Maria D.,Gialamas, Stefanos P.,2016-06-20 Blended learning has gained significant attention recently by educational leaders, practitioners, and researchers. i<sup>2</sup>Flex, a variation of blended learning, is based on the premise that certain non-interactive teaching activities, such as lecturing, can take place by students without teachers' direct involvement. Classroom time can then be used for educational activities that fully exploit teacher-student and student-student interactions, allowing for meaningful personalized feedback and scaffolding on demand. Revolutionizing K-12 Blended Learning through the i<sup>2</sup>Flex Classroom Model presents a well-rounded discussion on the i<sup>2</sup>Flex model, highlighting methods for K-12 course design, delivery, and evaluation in addition to teacher performance assessment in a blended i<sup>2</sup>Flex environment. Emphasizing new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, and educational technology developers.

**Doing What Works** James William Martin,2011 This book will help you achieve goals based on your personal needs and values. It uses a simple and highly visual method called the 10-Step Goal Acceleration Process (GAP) to enable you to immediately apply its topics to relevant issues in your life. Key concepts build on those introduced in earlier chapters. Its other benefits include: - Highly visual and easy to understand. - Uses simple templates, so you can create a highly personalized improvement plan. - Provides a logical road map for achieving goals. - Goals can modified as your needs change. - Encourages you to immediately begin applying key concepts in each chapter. - Shows shortcuts for achieving goals to save

time. - Helps to more effectively resolve personal conflicts. - Helps balance goals to avoid becoming stressed and frustrated. - Provides a useful framework from which to organize your life's activities. - Enables you to lead a more satisfying and successful life. In summary, as you read this book, you will have a much clearer idea of which personal goals are important for improving your life. The 10-Step GAP process will also help you make sense of the complexity that surrounds your life. Complexity tends to inhibit personal success by distracting people from identifying and achieving the things important to them. You also learn how to create realistic plans for achieving important goals. Don't be surprised if, at the end of the book, your final goals are different from the ones earlier ones. This approach for achieving personal goals will help you lead a more productive life. This is what successful people do differently!

The Road Ahead D. Hunter, K. Storey, 2013-12-11 Successful transition from school to adult life has always been difficult for people with disabilities, especially in the area of employment. The vast majority of people with disabilities are either unemployed or underemployed with low wages and few benefits, and many governments are struggling to find a way of providing employment and benefits to people with disabilities without creating disincentives to work. This book provides strategies and ideas for improving the lives of people with disabilities, exploring new ways of enabling a successful transition to an integrated adult working life by providing effective instruction and support. Following an introduction which outlines the importance of transition services and meaningful outcomes, topics covered in the remaining chapters include: Person Centered Transition Planning; Enhancing Competence and Independence; Employment Assessment and Career Development; Collaboration between Agencies for a Seamless Transition; Independent Living and Supported Living; and Community Functioning Skills. The book will be of interest to all those who work with transition age students as well as those who work with adults with disabilities and want to enable them to have the best life possible. To paraphrase Helen Keller people with disabilities not only need to be given lives, they need to be given lives worth living.

*The New Template for Recovery* Portman, 2010-08 The New Template for Recovery is for people who believe they have

the ability to make important changes in their lives-including quitting drinking. It is designed for those who want to succeed at sobriety but want something different than, or in addition to, what standard treatment programs and AA have to offer. If you want to pursue a forward-going approach to recovery and to become excited, rather than depressed, about life without alcohol, this book may be the place for you to find the motivation, the knowledge, and the pathway to succeed. If you are drawn to the idea of an independent recovery from an alcohol use problem, know that you are not alone, and rest assured that millions of people gain lasting sobriety on their own. Indeed, an irrepressible body of research finds that many, possibly most, people in successful recovery manage to quit drinking on their own. The New Template for Recovery provides a clear and practical, self-directed guide to sobriety and a better life by the use of a template for recovery that can be crafted and followed according to each person's needs. Learn: The level of alcohol use problem that you have How to safely manage alcohol withdrawal Why you are not to blame The pros and cons of AA and standard treatment programs The psychological and physical addiction processes and effects Discover: The forward-going template model for recovery How to focus on the life-areas of recovery that are important to you Powerful relapse prevention strategies The motivation to recreate your life, your way T. Christopher Portman, Ph. D. earned his doctorate at the University of Oregon. He has directed both outpatient and inpatient treatment programs and has taught many addiction courses and seminars in the Pacific Northwest. He presently lives in Bellingham, Washington, where his practice focuses on the treatment of addictions and related mental health and relationship problems.

**Leading For Regeneration** John Hardman, 2013-07-03 This book presents the regenerative leadership framework that has emerged from doctoral research and consulting work with successful sustainability leaders and their organizations in business, education, and community. The framework synthesizes the levels of awareness, the leadership styles and behaviours, and the organizational arrangements that correlate most significantly across these domains. Most importantly, the overwhelming majority of the leaders in this work agree that individual and collective consciousness development is critical to transforming the culture of organizations for sustainability and beyond. The term regenerative has not been chosen arbitrarily, but to provide an alternative to the notion of sustainability, which many of the leaders featured here indicate has become insufficient to describe what needs to be done, economically, socially, and environmentally, if we are to ensure a flourishing world for present and future generations. This work in turn has led to the development of the Regenerative Capacity Index (RCI), a tool designed to assess an organization's readiness to engage in regenerative practice. From this evaluation of an organization's regenerative capacity, it becomes possible to design a strategy for regeneration that considers all levels of its environmental, social, and economic impact, both internally and externally, in the local and global community. Among its major findings, the book argues that the more evolved sustainability leaders are becoming increasingly dissatisfied with the construct of sustainability, and indicate the need for a profound cultural shift towards

regenerative human systems. In this framework, regenerative organizations are driven by a sense higher purpose, and leadership is exercised horizontally and collaboratively. Leaders and followers engage in generative conversations to create desirable futures which are then 'backcasted' to eliminate unanticipated consequences. Throughout, leaders emphasize the critical importance of engaging in personal and collective consciousness development or inner work in order to make regenerative practices possible.

**Transforming Academic Culture and Curriculum** Mitchell R. Malachowski,Elizabeth L. Ambos,Kerry K.

Karukstis,Jillian L. Kinzie,Jeffrey M. Osborn,2024-02-23 Institutions across the higher education landscape vary, and each navigates change in its own way. This volume describes how institutions and departments influence the success of structural and cultural transformations to advance curricular reform. A product of the Council on Undergraduate Research Transformations project, a six-year, longitudinal research study funded by the United States National Science Foundation, this text features the goals, strategies, and outcomes that evolved from the experiences at 12 diverse colleges and universities in creating innovative undergraduate curricula and campus cultures that maximize student success. With the goal of achieving departmental transformations in both student learning and academic culture - by backward-designing and scaffolding research into and across undergraduate curricula - editors include scholarly findings, step-by-step guides, and a toolkit section, with plentiful online resources, to help readers develop and execute personalized change processes on their own campuses. Designed to span both theory and practice for departments and institutions to transform undergraduate education to increase student success, this book is vital for all higher education scholars, practitioners, faculty, staff, and leaders interested in creating research-rich curricula and change more broadly. Visit the Council on Undergraduate Research website here: <https://www.cur.org/>.

*Teaching with Poverty in Mind* Eric Jensen,2010-06-16 In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school

success stories, Teaching with Poverty in Mind reveals \* What poverty is and how it affects students in school; \* What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain); \* Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and \* How to engage the resources necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.
