Building a Business Website with HubSpot CMS: How to Create a Website, Landing Page, or Blog for Marketing & Sales Growth Jacob Lett, 2022-12-12

Want to Create a Blog or Website for Your Business Marketing and Sales Strategy? I have been a part of many website redesign projects, which often take much time and can be expensive. If your company doesn't have the skills in-house, you must spend time vetting service providers and setting up the contract with legal and accounting. Then you must spend time with discovery meetings, design meetings, strategy meetings, etc. Sometimes, this lengthy web development process is necessary, but what if you know what you want but don't have the technical web development skills or time to create it? This is a Book on How to Create Your Own Website in Less Time and Complexity. And with No Code. I have seen business owners, marketers, and web designers build websites and landing pages in days or weeks using no-code page builders. There is a growing trend in website page builders like Webflow, Wix, Squarespace, WordPress, and HubSpot CMS. These platforms provide visual page editors and themes to dramatically increase the speed and simplicity of building a website. Instead of fussing about the web design before any content is written, you can use a theme close to what you need. After you add the content, you can hire a developer to make customizations to fine-tune your website, saving you considerable time and money. Questions I will help you answer in this book: What is a CMS content management system? How do I choose one? WordPress vs. Wix vs. HubSpot CMS - Which is the best free website builder? What about free web hosting? Why does my business need a website? How do you create templates and themes on HubSpot CMS? How to create a blog for your business? Then about seven years ago, I worked at a company that used HubSpot. At first, it wasn't obvious because it was a whole new workflow and a new coding language HubL. But over time, I saw HubSpot CMS continually improve and how marketers loved using it. Web Design & Development Nicolae Sfetcu, A guide for developing web sites by means of conceptualization, planning, modeling, and execution of electronic media delivery via Internet. Web development is a broad term for any activities related to developing a web site for the World Wide Web or an intranet. This can include e-commerce business development, web design, web content development, client-side/server-side coding, and web server configuration. However, among web professionals, web development usually refers only to the non-design aspects of building web sites, e.g. writing markup and coding. Web development can range from developing the simplest static single page of plain text to the most complex web-based internet applications, electronic businesses, or social network services. Web design is a process of conceptualization, planning, modeling, and execution of electronic media delivery via Internet in the form of Markup language suitable for interpretation by Web browser and display as Graphical user interface (GUI).
