Number Sense Routines Jessica Shumway,2023-10-10 In this groundbreaking and highly practical book,Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3, author Jessica Shumway proposes that all children have innate number sense which can be developed through daily exercise. Shumway created a series of math routines designed to help young students strengthen and build their facility with numbers. These quick 5, 10, or 15 minute exercises are easy to implement as an add-on to any elementary math curriculum. Understanding Number Sense: Students with strong number sense understand numbers, how to subitize, relationships among numbers, and number systems. They make reasonable estimates, compute fluently, use reasoning strategies, and use visual models to solve problems. Number Sense Routines supports the early learner by instilling the importance of daily warm-ups and explains how they benefit developing math minds for long-term learning. Real Classroom Examples: Shumway compiled her classroom observations from around the country. She includes conversations among students who practice number sense routines to illustrate them in action, how children's number sense develops with daily use, and math strategies students learn as they develop their numerical literacy through self-paced practice. Assessment Strategies: Number Sense Routines demonstrates the importance of listening to your students and knowing what to look for. Teachers will gain a deeper understanding of the underlying math skills and strategies students learn as they develop numerical literacy. Shumway writes, As you read, you will step into various classrooms and listen in on students' conversations, which I hope will give you insight into the power of number sense routines and the impact they have on students' number sense development. My hope is that going into the classroom, into students' conversations, and into their thought processes, you will come away with new ideas and tools to use in your own classroom.

Trace Numbers from 1 To 50 Mini Book, 2020-03-09 Learn to write the numbers for 4 years The great exercise book for kindergarten and preschool - child's play numbers from 0 - 10 learning to write - in English - perfect for practicing! Would you like to teach your child to write the numbers and practice the numbers together? Then this exercise book is just right for you. The daily use of numbers is a matter of course for many adults - including the writing of the different numbers. However, children of kindergarten age must first have access to the world of numbers. This is best done in a child-friendly way. The book treats the numbers from 0-10 step by step, whereby the independent learning of numbers is the highest learning goal. Ideally, your child will set the pace of learning numbers by spending enough time on a number. As soon as your son / daughter knows and can write the respective number well, the next number is the learning content. The exercise book provides the following steps for each number: 1. Repaint the number Your child may have tried to write numbers from time to time. This is a good sign as it seems to be interested in numbers. The book is accompanied by targeted repainting of a certain number with the support of the lines. It makes sense to calmly repeat the number in different colors - until your child feels safe. 2. Independent number writing Now your offspring is well prepared for the free writing of the respective number: The

corresponding exercise pages are only provided with guidelines that determine the amount of the number. Otherwise, the number artist has a free hand. Number by number and step by step, your child has the opportunity to learn the numbers from 0-30. Knowing the number range from 0-30 is an important preparation for preschool and primary school. What you get in this book at a glance:> Gradual getting to know and write the numbers from 0 - 10> Learn numbers in English> Promotion of fine motor skills, concentration and hand-eye coordination> Ideal preparation for preschool, elementary school> Child-friendly design> Extra exercise pages - enough space to practice!> Suitable for children from 4 years> A4 format - ideal size to take it with you> Ideal as a gift for all new school students coming to school soon> Learning fun guaranteed> ... and much more!
