Empires, Nations, and Natives Benoît de L'Estoile, Federico Neiburg, Lygia Maria Sigaud, 2005-09-22 Empires, Nations, and Natives is a groundbreaking comparative analysis of the interplay between the practice of anthropology and the politics of empires and nation-states in the colonial and postcolonial worlds. It brings together essays that demonstrate how the production of social-science knowledge about the “other” has been inextricably linked to the crafting of government policies. Subverting established boundaries between national and imperial anthropologies, the contributors explore the role of anthropology in the shifting categorizations of race in southern Africa, the identification of Indians in Brazil, the implementation of development plans in Africa and Latin America, the construction of Mexican and Portuguese nationalism, the genesis of “national character” studies in the United States during World War II, the modernizing efforts of the French colonial administration in Africa, and postcolonial architecture. The contributors—social and cultural anthropologists from the Americas and Europe—report on both historical and contemporary processes. Moving beyond controversies that cast the relationship between scholarship and politics in binary terms of complicity or autonomy, they bring into focus a dynamic

process in which states, anthropological knowledge, and population groups themselves are mutually constructed. Such a reflexive endeavor is an essential contribution to a critical anthropological understanding of a changing world. Students and technicians will require additional training for the safe handling and transportation of these refrigerants. The Low GWP refrigerant program manual covers: Refrigerant safety Introduction to Low GWP refrigerants Refrigerant properties and characteristics The refrigeration cycle Working with refrigerant blends Proper installation and service guidelines Flammable refrigerant considerations Explanation of the associated codes and standards for A2L refrigerants

EPA 608 Study Guide Hvac Training 101, 2019-12-06 HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications

varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.
