Print Punch. Artefacts from the Punch Card Computing Era ,2020 Data used to be physical. In an era when 1s and 0s seem to hover above our heads, 'Print Punch' returns to the heyday of the punch card?to a time when you could touch (and punch) data. The aesthetics of this early move towards automation represent a unique moment in our history, when we designed for machines instead of human beings. Rigorous constraints, inherent in punch card technology, unwittingly birthed a coherent design language: rhythm in grids, punched absences and presences, and the patterns in them dancing to their

own machine logic. Now obsolete, punch cards were the primary method of data storage and processing from the 1890s until the late 1970s; spanning almost a century of ubiquitous utility, the artefacts of that era sit between these pages to be examined anew.0Featuring over 200 punch cards, 150 archival images and essays by Steven E Jones, Sandra Rendgen and John L Walters.

MiniEco Kate Lilley,2013 MiniEco is the sensational craft blog of Kate Lilley. With over 250,000 followers it has taken on cult status in the international craft community, and that is purely down to Kates fresh, contemporary and beautifully explained and executed craft projects. With a book for children already under her belt, this publication focuses more on adults with 33 pieces including paper gems, an origami lampshade, macrame hangings, pop-up pixel cards, hama bead candle holders, and tie-dyed furoshiki cloths. The ideas range in complexity from the simple to the advanced, but each one is totally unique and has never before been published. The look of the book will reflect the immaculate, Japanese-inflected minimalism of the MiniEco website, with some high-end production finishes including a die-cut, dust-jacketed paperback binding and boldly pared-back photography. QR codes will link to animated gifs of the craft being made.

Knockout Networking for Financial Advisors and Other Sales Producers Michael Goldberg,2020-03-31 90% of financial advisors fail at being financial advisors. Why? Because advisors, brokers, reps, and agents need to see more people to make more sales appointments. And nobody in their firm, agency, branch, or shop trains them how! Knockout Networking for Financial Advisors is the only book written for sales producers in the financial services industry focused on making more connections through networking In the wake of the COVID 19 pandemic, networking, developing relationships, generating referrals, and making important connections are as important as ever. The ideas and approaches in Knock Out Networking for Financial Advisors can be applied immediately to virtual meetings, online networking groups, social media, podcasts, and of course, phone calls. The problem is, most advisors and sales producers are not born networkers; they develop the skills and confidence through education, training, practice, and having a positive attitude. Knockout Networking for Financial Advisors covers everything you need to know about going to the right places (virtual or not!), saying the right things, and

meeting the right people—essential skills for a financial advisor or sales producer that's serious about making more and better connections! The result? More prospects, more referrals, and more business. Author Michael Goldberg is a networking specialist, speaker, trainer, author (and boxer!) focused on helping financial advisors, brokers, agents, reps, wholesalers, and other sales producers grow their business or practice through networking. In this must read if you're a financial advisor book, you will learn how to: Confidently meet and greet new people in business settings Further define your Target Market to establish more and better connections Deliver a knockout elevator speech (not a script!) Generate more prospects and referrals from current client base Establish important relationships generating more business opportunities Bottom line, networking is the most effective way to attract more prospects, more referrals, and more business to your corner. Remember keep the left up!

Card Keeper Eric Epstein, 2016-08-09 Featuring lovely Art Nouveau-inspired designs, this timeless album invites users to collect and organize memorable cards, from birthday wishes and special announcements to postcards collected over the years. With acid-free pages, roomy sleeves to hold cards of different sizes, and space in the margins to jot down notes, this keepsake makes it easy to preserve cherished mementos for years to come.

Why I Love Homeschooling Mary Jo Tate, Tina Nahid, Kathy Oaks, 2020-07-04 Because of the COVID-19 pandemic, millions of families worldwide have been thrust into schooling remotely at home. Some parents look forward to sending their kids back to school, but others have found they prefer schooling at home. They've noticed things like, My child has learned more at home with me in the last 2 months than in the past 2 years at school! Or, I kind of like spending so much time with my kids and learning alongside them. Many parents are considering continuing homeschooling beyond the pandemic, and this book is here to help them make an informed decision about their children's education. Homeschooling is not about trying to reproduce a school environment at home. It's not hours and hours sitting at a desk with a parent or in front of an online class. Homeschooling is about creating an environment outside of the school structure that fosters a love of learning, creativity, family closeness, and flexibility. There is no one size that fits all in homeschooling; every family is different, and approaches homeschooling and parenting in their own unique way. In this book, 24 seasoned homeschooling families share their experiences. The authors include both religious and secular homeschooling parents from all walks of life. They represent a variety of homeschooling styles (from self-directed learning/unschooling to more formal approaches), abilities and disabilities, marital statuses, educational achievements, job statuses, races, and socioeconomic levels. The authors have children of all ages, from babies, preschoolers, and kindergarteners, to students in elementary school, middle school, or high school. And some have children who are now adults. They discuss what they love about homeschooling and also the challenges they've overcome. We hope that this book will inspire and encourage those who are considering homeschooling, as well as those who are already on their homeschooling journey. And we hope it will expand your ideas about the concept of

education, and what's possible for yourselves and your children.

Parenting by God's Promises Joel R. Beeke, 2011 In *Parenting by God's Promises*, Dr. Joel R. Beeke explores what nurture and admonition look like and offers gems of practical wisdom for parents on topics such as family worship, teaching children, modeling faithful Christian living, and exercising discipline.

Product-Led Growth Bush Wes, 2019-05 *Product-Led Growth* is about helping your customers experience the ongoing value your product provides. It is a critical step in successful product design and this book shows you how it's done. - Nir Eyal, Wall Street Journal Bestselling Author of *Hooked*

Creative Business Cards Carmen Fong, Shantell Chen, 2014 Business cards are a statement of identity. Capable of conveying much more than contact information, they represent the creativity or style of a company in a very portable format. As an historical artifact in the digital age, they are constantly in danger of obsolescence and only those that truly stand out are memorable. One way to achieve the note

Solving Elliptic Problems Using ELLPACK John R. Rice, Ronald F. Boisvert, 2012-12-06 ELLPACK is a many faceted system for solving elliptic partial differential equations. It is a forerunner of the very high level, problem solving environments or expert systems that will become common in the next decade. While it is still far removed from the goals of the future, it is also far advanced compared to the Fortran library approach in common current use. Many people will find ELLPACK an easy way to solve simple or moderately complex elliptic problems. Others will be able to solve really hard problems by digging a little deeper into ELLPACK. ELLPACK is a research tool for the study of numerical methods for solving elliptic problems. Its original purpose was for the evaluation and comparison of numerical software for elliptic problems. Simple examples of this use are given in Chapters 9-11. The general conclusion is that there are many ways to solve most elliptic problems, there are large differences in their efficiency and the most common ways are often less efficient, sometimes dramatically so.

Quilling for Scrapbooks & Cards Susan Lowman, 2005 The old art of quilling, sometimes known as paper filigree, gets a new guide specially applied to the fast-growing crafts of scrapbooking and handmade greeting cards. Quilling is the simple art of rolling, shaping, and arranging strips of paper to make beautiful designs. It's easy and fun to do, and the supplies are easily available and inexpensive. Some of the designs work for a variety of themes--flowers, alphabets, numbers, and geometric shapes, as well as golf clubs, fishing poles, footballs, hearts, and shamrocks. The 25 card and 20 scrapbook projects emphasize special occasions: a birthday cake with candles, a beautiful bouquet for Mother's Day, a graduation cap with tassel, and tiny feet for sending congratulations to parents of newborns.
