**The Template-makers of the Paris Basin** John James,1989 The 12th- and 13th-century early Gothic churches from the region around Paris which form the basis of this study were large-scale undertakings. Dr James draws on evidence which suggests that work proceeded in a series of projects, when funding, technical problems (for example, slow-setting mortar), and the work of other trades (such as roofing and centring) allowed. Within each project there were generally a number of separately organised phases, or 'campaigns', and it is from close study of these campaigns that the author proceeds to an identification of the characteristics of the individual master masons, the template-makers.

**Human Dimension and Interior Space** Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Outside Lies Magic John R. Stilgoe, 2009-05-26 Outside Lies Magic is a book about the acute observation of ordinary things, about becoming aware in everyday places, about seeing in utterly new ways, about enriching your life unexpectedly. For more than 20 years, John R. Stilgoe has developed and practiced the art of exploring the everyday world around us, where so much lies hidden just beneath the surface, offering uncommon knowledge if we but know what to look for. In this remarkable book, Stilgoe inspires us to become explorers on our own-on foot or on bicycle-and by so doing to reap the

benefits of escaping, even temporarily, the traps of our programmed lives. Exploration encourages creativity, serendipity, invention, he writes. And while sharing his insights on how to explore, Stilgoe provides a fascinating pocket history of the American landscape, as striking in its originality as it is revealing. Stilgoe dissects our visual surroundings; his observations will transform the way you see everything. Through his eyes, an abandoned railroad line is redolent of history and future promise; front lawns recall our agrarian past; vacant lots hold cathedrals of potential. From the electrical grid overhead to fences, malls, and main streets, Stilgoe offers a fresh understanding of the links and fractures in our society. After reading *Outside Lies Magic*, your world will never look the same again.

*Photoshop Elements 4 One-on-one* Deke McClelland, Galen Fott, 2005 *Photoshop Elements 4 One-on-One* marks a landmark in computer publishing. In addition to offering 12 lessons of project-based tutorials with all sample files included, each lesson starts with a video introduction, hosted by the author himself, Deke McClelland. And these are no ordinary videos. Produced by Adobe's official video training partner, Total Training, each video measures 960 by 540 pixels and plays at 30 frames per second, with no interlacing. That's a play rate of 15.5 million pixels per second, making this the first computer publication to include high-definition video, playable on any modern PC with a DVD-ROM drive. The picture is so crystal clear, it's like watching the world-reknowned expert work right along with you. In addition to the video -- all new recordings created exclusively for this title -- the book has been completely revamped for *Photoshop Elements 4*. Inside the full-color pages are new exercises devoted to color-correcting skin tones, auto-tagging images with faces, isolating foreground subjects, extracting people and objects from their backgrounds, creating custom slide shows, correcting red-eye, and sharing images online. Every bit as wildly ambitious and brass-tacks practical as the best-selling image editor itself, *Photoshop Elements 4 One-on-One* will have you gasping with amazement at your own creations. Deke puts the magic of digital imaging squarely where it belongs -- in your hands.
