Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Romancing the Beat Gwen Hayes, 2016 What makes a romance novel a romance? How do you write a kissing book? Writing a well-structured romance isn't the same as writing any other genre—something the popular novel and screenwriting guides don't address. The romance arc is made up of its own story beats, and the external plot and theme need to be braided to the romance arc—not the other way around. Told in conversational (and often irreverent) prose, *Romancing the Beat* can be read like you are sitting down to coffee with romance editor and author Gwen Hayes while she explains story structure. The way she does with her clients. Some of whom are regular inhabitants of the New York Times and USA Today bestseller lists. *Romancing the Beat* is a recipe, not a rigid system. The beats don't care if you plot or outline before you write, or if you pants your way through the drafts and do a beat check when you're revising. Pantsers and plotters are both welcome. So sit down, grab a cuppa, and let's talk about kissing books.

Designing Experiences J. Robert Rossman, Mathew D. Duerden, 2019-07-23 In an increasingly experience-driven economy, companies that deliver great experiences thrive, and those that do not die. Yet many organizations face difficulties implementing a vision of delivering experiences beyond the provision of goods and services. Because experience design concepts and approaches are spread across multiple, often disconnected disciplines, there is no book that succinctly explains to students and aspiring professionals how to design them. J. Robert Rossman and Mathew D. Duerden present a comprehensive and accessible introduction to experience design. They synthesize the fundamental theories and methods from multiple disciplines and lay out a process for designing experiences from start to finish. Rossman and Duerden challenge us to reflect on what makes a great experience from the user's perspective. They provide a framework of experience types, explaining people's engagement with products and services and what makes experiences personal and fulfilling. The book presents interdisciplinary research underlying key concepts such as memory, intentionality, and dramatic structure in a down-to-earth style, drawing attention to both the macro and micro levels. Designing Experiences features detailed instructions and numerous real-world examples that clarify theoretical principles, making it useful for students and professionals. An invaluable overview of a growing field, the book provides readers with the tools they need to design innovative and indelible experiences and to move their organizations into the experience economy. Designing Experiences features a foreword by B. Joseph Pine II.

Story Engineering Larry Brooks,2011-01-27 What makes a good story or a screenplay great? The vast majority of writers begin the storytelling process with only a partial understanding where to begin. Some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry. But the truth is, unless you are master of the form, function and criteria of successful storytelling, sitting down and pounding out a first draft without planning is an ineffective way to begin. Story Engineering starts with the criteria and the architecture of storytelling, the engineering and design of a story--and uses it as the basis for narrative. The greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page. When rendered artfully, they become a sum in excess of their parts. You'll learn to wrap your head around the big pictures of storytelling at a professional level through a new approach that shows how to combine these six core competencies which include: • Four elemental competencies of concept, character, theme, and story structure (plot) • Two executional competencies of scene construction and writing voice The true magic of storytelling happens when these six core competencies work together in perfect harmony. And the best part? Anyone can do it!
