Next Stop Everywhere Elissa Title, 2021-10-02 NEXT STOP EVERYWHERE is a two-year long project that Elissa undertook, inspired by a professor, to document her travels. Previously, she had combined her love of writing with photography into her Globetrotting Elissa blog but nothing compares to holding a physical book. With a BFA in Graphic Design from Chapman University, she decided she'd design, write, and publish a photography book entirely from scratch. Once the design was done, she went back through the entire book to make sure everything was cohesive, lined up, and exceeding her nit picky design standards. Two years later, she is proud to share the final product with you and she hopes it inspires you to explore the world... whether your local wilderness or someplace more exotic. Her passport is always ready. Where to next?

**Architectural Presentation** Bert Bielefeld, 2014 Students of architecture are confronted at the beginning of their studies with a wealth of different ways in which to visually present their designs. Expressing ideas in the form of drawings and models is usually required in the early stages of studying: learning by doing is the only way for students to quickly develop a repertoire for their design work. However, there are important issues to consider between the phases of devising the spatial concept and recreating it in a two- or three-dimensional drawing or physical model: How to construct a perspective freehand drawing? What plan drawings are necessary to present my design? What scale should my model be and what materials should I use to construct it? *Basics architectural presentation* conveys possible ways to present architectural projects throughout the various project phases. In an informative and practical approach, the publication discusses the basics of architectural representation from freehand drawing, which is especially important in the design phase, to the plan drawing, model, and architecture photography.
