Laziness Does Not Exist Devon Price,2022-01-04 A social psychologist uncovers the psychological basis of the laziness lie, which originated with the Puritans and has ultimately created blurred boundaries between work and life with modern technologies and offers advice for not succumbing to societal pressure to do more.

Art of the Cut Steve Hullfish,2017-02-24 Art of the Cut provides an unprecedented look at the art and technique of contemporary film and television editing. It is a fascinating virtual roundtable discussion with more than 50 of the top editors from around the globe. Included in the discussion are the winners of more than a dozen Oscars for Best Editing and the nominees of more than forty, plus numerous Emmy winners and nominees. Together they have over a thousand years of editing experience and have edited more than a thousand movies and TV shows. Hullfish carefully curated over a hundred hours of interviews, organizing them into topics critical to editors everywhere, generating an extended conversation among colleagues. The discussions provide a broad spectrum of opinions that illustrate both similarities and differences in techniques and artistic approaches. Topics include rhythm, pacing, structure, storytelling and collaboration. Interviewees include Margaret Sixel (Mad Max: Fury Road), Tom Cross (Whiplash, La La Land), Pietro Scalia (The Martian, JFK), Stephen Mirrione (The Revenant), Ann Coates (Lawrence of Arabia, Murder on the Orient Express), Joe Walker (12 Years a Slave, Sicario), Kelley Dixon (Breaking Bad, The Walking Dead), and many more. Art of the Cut also includes in-line definitions of editing terminology, with a full glossary and five supplemental web chapters hosted online at www.routledge.com/cw/Hullfish. This book is a treasure trove of valuable tradecraft for aspiring editors and a prized resource for high-level working professionals. The book's accessible language and great behind-the-scenes insight makes it a fascinating glimpse into the art of filmmaking for all fans of cinema. Customer Co-Design Stefan R. Thallmaier, 2014-10-15 Stefan R. Thallmaier's investigation enables mass customization businesses to better understand how co-design increases customers' value perception. He focuses on the increasing proliferation of service channels (online, mobile and in-store) and digital media (toolkits, social media and live help) at the co-design interface. Based on qualitative and quantitative research, the author examines how this proliferation impacts customers' value perception in the different stages of the co-design process. The research shows that customers' value perception profits from varying levels of social presence throughout the co-design process. The work helps researchers and practitioners with surprising insights as well as hands-on recommendations to improve and adapt interfaces for customer co-design.

Consumer-Brand Relationships Susan Fournier, Michael Breazeale, Marc Fetscherin, 2012-03-29 The creation and management of customer relationships is fundamental to the practice of marketing. Marketers have long maintained a keen interest in relationships: what they are, why they are formed, what effects they have on consumers and the marketplace, how they can be measured and when and how they evolve and decline. While marketing research has a long tradition in the study of business relationships between manufacturers and suppliers and buyers and sellers, attention in the past decade has expanded to the relationships that form between consumers and their brands (such as products, stores, celebrities, companies or countries). The aim of this book is to advance knowledge about consumer-brand relationships by disseminating new research that pushes beyond theory, to applications and practical implications of brand relationships that businesses can apply to their own marketing strategies. With contributions from an impressive array of scholars from around the world, this volume will provide students and researchers with a useful launch pad for further research in this blossoming area.

Latent Variable Path Modeling with Partial Least Squares Jan-Bernd Lohmöller, 2013-11-11 Partial Least Squares (PLS) is an estimation method and an algorithm for latent variable path (LVP) models. PLS is a component technique and estimates the latent variables as weighted aggregates. The implications of this choice are considered and compared to covariance structure techniques like LISREL, COSAN and EQS. The properties of special cases of PLS (regression, factor scores, structural equations, principal components, canonical correlation, hierarchical components, correspondence analysis, three-mode path and component analysis) are examined step by step and contribute to the understanding of the general PLS technique. The proof of the convergence of the PLS algorithm is extended beyond two-block models. Some 10 computer

programs and 100 applications of PLS are referenced. The book gives the statistical underpinning for the computer programs PLS 1.8, which is in use in some 100 university computer centers, and for PLS/PC. It is intended to be the background reference for the users of PLS 1.8, not as textbook or program manual.

Forestry Applications of Airborne Laser Scanning Matti Maltamo,Erik Næsset,Jari Vauhkonen,2014-04-08 Airborne laser scanning (ALS) has emerged as one of the most promising remote sensing technologies to provide data for research and operational applications in a wide range of disciplines related to management of forest ecosystems. This book provides a comprehensive, state-of-the-art review of the research and application of ALS in a broad range of forest-related disciplines, especially forest inventory and forest ecology. However, this book is more than just a collection of individual contributions - it consists of a well-composed blend of chapters dealing with fundamental methodological issues and contributions reviewing and illustrating the use of ALS within various domains of application. The reviews provide a comprehensive and unique overview of recent research and applications that researchers, students and practitioners in forest remote sensing and forest ecosystem assessment should consider as a useful reference text.

Gambling Theory and Other Topics Mason Malmuth,1999 Absolutely must reading for all serious gamblers. Most people who gamble are basically attracted by the action and the excitement that this form of entertainment offers. But a small number of people are quite successful at it. How is this so? What helps these few to make decisions that devastate their opponents? And what do you need to do to become successful at this extremely challenging occupation? This text attempts to answer these questions. You will be introduced to the dynamic concept of non-self-weighting strategies and shown how these strategies apply not only at the very exciting gaming tables but in real life as well. In addition, risk and fluctuations are discussed in terms of the standard deviation and their relationship to each other and to your bankroll. Some of the other topics addressed are bankroll requirements, win-rate accuracy, free bets, which blackjack count is best, lottery fallacies, dangerous ideas, poker tournament strategies (including when it is correct to rebuy), settling up in tournaments, pai gow poker, super pan nine, the world's greatest gamblers, and building pyramids.

Semi-Supervised Learning Olivier Chapelle,Bernhard Scholkopf,Alexander Zien,2010-01-22 A comprehensive review of an area of machine learning that deals with the use of unlabeled data in classification problems: state-of-the-art algorithms, a taxonomy of the field, applications, benchmark experiments, and directions for future research. In the field of machine

learning, semi-supervised learning (SSL) occupies the middle ground, between supervised learning (in which all training examples are labeled) and unsupervised learning (in which no label data are given). Interest in SSL has increased in recent years, particularly because of application domains in which unlabeled data are plentiful, such as images, text, and bioinformatics. This first comprehensive overview of SSL presents state-of-the-art algorithms, a taxonomy of the field, selected applications, benchmark experiments, and perspectives on ongoing and future research. *Semi-Supervised Learning* first presents the key assumptions and ideas underlying the field: smoothness, cluster or low-density separation, manifold structure, and transduction. The core of the book is the presentation of SSL methods, organized according to algorithmic strategies. After an examination of generative models, the book describes algorithms that implement the low-density separation assumption, graph-based methods, and algorithms that perform two-step learning. The book then discusses SSL applications and offers guidelines for SSL practitioners by analyzing the results of extensive benchmark experiments. Finally, the book looks at interesting directions for SSL research. The book closes with a discussion of the relationship between semi-supervised learning and transduction.

Thyroid Ultrasound Alexander N. Sencha, Yury N. Patruncov, 2020-08-15 This book is a wide-ranging and up-to-date guide to the use of ultrasound for imaging of the thyroid that will meet the needs of novices while providing more experienced professionals with advanced information. All of the techniques employed in modern thyroid ultrasound are covered, from conventional grayscale and Doppler imaging to elastography and contrast-enhanced ultrasound, with a focus on practical aspects and with detailed analysis of their diagnostic value and limitations. The characteristic ultrasound findings of the normal thyroid and a wide range of thyroid diseases and disorders are described with the aid of hundreds of high-quality images. Diffuse changes and thyroid lesions are discussed in depth, paying close attention to aspects of importance for early detection and differential diagnosis. In this context the authors summarize their personal experiences in the use of qualitative parameters of compression elastography and quantitative data of shear-wave elastography. In addition, a practical approach to the risk stratification of thyroid nodules is proposed. The book concludes with a resumé of the main challenges and pitfalls in thyroid ultrasound.

The Entrepreneurial Librarian Mary Krautter,, Mary Beth Lock, Mary G. Scanlon, 2014-01-10 The old image of an entrepreneur as a scrappy, independent risk-taker has been replaced by the reality of individuals incorporating innovative ideas in more traditional settings. This collection of essays illustrates how librarians are infusing entrepreneurial principles in a variety of arenas, including public, private, academic, and special libraries. It chronicles how entrepreneurial librarians are flourishing in the digital age, advocating social change, responding to patron demands, designing new services, and developing exciting fundraising programs. Applying new business models to traditional services, they eagerly embrace

entrepreneurship in response to patrons' demands, funding declines, changing resource formats, and other challenges. By documenting the current state of entrepreneurship in libraries, this volume upends the public image of librarians as ill-suited to risky or creative ventures and places them instead on the cutting edge of innovations in the field.
