**Mapping selfies and memes as Touch** Fiona Andreallo, 2022-06-09 This open access book offers a rich and nuanced analysis of digitally networked socialities as culturally meaningful relationships of Touch. Focusing on the ways Touch is practised in everyday social interactions serves as a basis for how Touch is understood as multiply significant - physically, emotionally, intellectually and politically. Andreallo initiates a map of the fundamentals of Touch and how they can be considered for future research in considering digitally networked cultures. This map also serves as a basis for closely examining selfies and memes. Examining social networks of Touch, Andreallo focuses on a specific example of the PrettyGirlsUglyFaces meme and ugly selfies (uglies). Through this example, memes and selfies are mapped as Touch involving textures of both intimacy and violence. Andreallo also discusses technological seamlessness and cultural semefulness as conversations of social relationships of Touch, and proposes the term semeful sociabilities to describe how the everyday technological self engages in practices of Touch. This book is a compact, approachable insight into selfies and memes as everyday culturally networked Touch relationships that also offers a way forward in recognising technological relationships as culturally meaningful.

There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. *Dis/organization as Communication* Consuelo Vásquez, Timothy Kuhn, 2019-03-13 This book accounts for the transformation of organizations in a post-bureaucratic era by bringing a communicational lens to the ontological discussion on organization/disorganization, offering a conceptual and methodological toolbox for studying dis/organization as communication. Increasingly, scholars acknowledge that communication is constitutive of organization; because meaning is always indeterminate, communication also (and simultaneously) generates disorganization. The book synthesizes the major theoretical trends and empirical studies in communication that engage with dis/organization. Drawing on dialectics, relational ontologies, critical theory, systems theory, and affect thinking, the first part of the book offers communicational explanations of how dis/organization unfolds. The second part of the book grounds this theoretical reflection, providing empirical studies that mobilize diverse methodological and analytical frameworks (e.g., ethnography, situational, interactional and genre analysis) for studying the practices of dis/organization. Overall, the book exposes organizations (and organizing processes) as significantly messier, irrational (or a-rational), and paradoxical than scholars of organization typically think. It also offers readers the conceptual and methodological tools to understand these complex processes as communication. This book will be essential reading for scholars in organizational communication or management and organization studies, together with senior undergraduate and graduate students studying organizational communication, organizational discourse, discourse analysis (including rhetoric, semiotics, pragmatism, narratology) and courses in management studies. It will also be richly rewarding for organizational consultants, managers and executives.

**Give Way to Night** Cass Morris, 2021-10-19 Now in paperback, the second book of the Aven Cycle explores a magical Rome-inspired empire, where senators, generals, and elemental mages vie for power. Latona of the Vitelliae, mage of Spirit and Fire, is eager to wield her newfound empowerment on behalf of the citizens of Aven--but societal forces conspire to keep

her from exercising her gifts, even when the resurgence of a banished cult plots the city's ruin. To combat this threat, Latona must ally with Fracture mage Vibia, the distrustful sister of Sempronius Tarren. While Latona struggles to defend their home, Sempronius leads soldiers through wartorn provinces to lift the siege of Toletum, where Latona's brother Gaius is hemmed in by supernatural forces. Sempronius must contend not only with the war-king Ekialde and his sorcerers, but with the machinations of political rivals and the temptations of his own soul, ever-susceptible to the darker side of ambition. Though separated by many miles soon after their love affair began, Latona and Sempronius are united by passion as they strive to protect Aven and build its glorious future.

*The Revolt of The Public and the Crisis of Authority in the New Millennium* Martin Gurri ,2018-12-04 How insurgencies—enabled by digital devices and a vast information sphere—have mobilized millions of ordinary people around the world. In the words of economist and scholar Arnold Kling, Martin Gurri saw it coming. Technology has categorically reversed the information balance of power between the public and the elites who manage the great hierarchical institutions of the industrial age: government, political parties, the media. *The Revolt of the Public* tells the story of how insurgencies, enabled by digital devices and a vast information sphere, have mobilized millions of ordinary people around the world. Originally published in 2014, *The Revolt of the Public* is now available in an updated edition, which includes an extensive analysis of Donald Trump's improbable rise to the presidency and the electoral triumphs of Brexit. The book concludes with a speculative look forward, pondering whether the current elite class can bring about a reformation of the democratic process and whether new organizing principles, adapted to a digital world, can arise out of the present political turbulence.

**Post Memes** Daniel Bristow, Alfie Bown, 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. POST MEMES: SEIZING THE MEMES OF PRODUCTION takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. ABOUT THE EDITORS ALFIE BOWN is the author of several books including *The Playstation Dreamworld* (Polity, 2017) and *In the Event of Laughter: Psychoanalysis, Literature and Comedy* (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of *Joyce and Lacan: Reading, Writing, and Psychoanalysis* (Routledge, 2016) and *2001: A Space Odyssey and Lacanian Psychoanalytic Theory* (Palgrave, 2017). And if they succeeded, would the universe be better off? **THE LOCKED TOMB SERIES BOOK 1: Gideon the Ninth BOOK 2: Harrow the Ninth BOOK 3: Nona the Ninth BOOK 4: Alecto the Ninth** At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**NEUROEPISTEMOLOGY** YURI ZAMBRANO,2012-10-01 The Epistemologic study of the mind-mind problem (Mind-brain / ToM) and conscious cognition, can apply the Theory of Neuronal Epistemology (TNE) based on backpropagation of specific neural networks. For operating in functionalist terms and in a cognitive way, the TNE is supported by a connectionist model holding the algorithmic equation that includes probabilistic features, spatiotemporal units, computational components and fractal-geometric-tensorial variables. The main arguments of the TNE deal with the study of diverse neuronal lineages and their sophisticated specialization (Neuralism and the neurons knowledge). A second argument is the Protein Epistem determining this specialization degree, and the third is associated with connectionism. The essential unit of the TNE formula is the Fractal Coincidental Pattern (FCP) used for evaluating the multiple-vectorial probabilities of this small world during the quantal release of neurotransmitters.

**The Electric Meme** Robert Aunger,2013-07-30 From biology to culture to the new new economy, the buzzword on everyone's lips is meme. How do animals learn things? How does human culture evolve? How does viral marketing work? The answer to these disparate questions and even to what is the nature of thought itself is, simply, the meme. For decades researchers have been convinced that memes were The Next Big Thing for the understanding of society and ourselves. But no one has so far been able to define what they are. Until now. Here, for the first time, Robert Aunger outlines what a meme physically is, how memes originated, how they developed, and how they have made our brains into their survival systems. They are thoughts. They are parasites. They are in control. A meme is a distinct pattern of electrical charges in a node in our brains that reproduces a thousand times faster than a bacterium. Memes have found ways to leap from one brain to another.

A number of them are being replicated in your brain as you read this paragraph. In 1976 the biologist Richard Dawkins suggested that all animals -- including humans -- are puppets and that genes hold the strings. That is, we are robots serving as life support for the genes that control us. And all they want to do is replicate themselves. But then, we do lots of things that don't seem to help genes replicate. We decide not to have children, we waste our time doing dangerous things like mountain climbing, or boring things like reading, or stupid things like smoking that don't seem to help genes get copied into the next generation. We do all sorts of cultural things for reasons that don't seem to have anything to do with genes. Fashions in sports, books, clothes, ideas, politics, lifestyles come and go and give our lives meaning, so how can we be gene robots? Dawkins recognized that something else was going on. We communicate with one another and we get ideas, and these ideas seem to have a life of their own. Maybe there was something called memes that were like thought genes. Maybe our bodies were gene robots and our minds were meme robots. That would mean that what we think is not the result of our own creativity, but rather the result of the evolutionary flow of memes as they wash through us. What is the biological reality of an idea with a life of its own? What is a thought gene? It's a meme. And no one before Robert Aunger has established what it physically must be. This elegant, paradigm-shifting analysis identifies how memes replicate in our brains, how they evolved, and how they use artifacts like books and photographs and advertisements to get from one brain to another. Destined to inflame arguments about free will, open doors to new ways of sharing our thoughts, and provide a revolutionary explanation of consciousness, *The Electric Meme* will change the way each of us thinks about our minds, our cultures, and our daily choices.

**Human Programming** Scott Selisker, 2016-08-01 Do our ways of talking about contemporary terrorism have a history in the science, technology, and culture of the Cold War? *Human Programming* explores this history in a groundbreaking work that draws connections across decades and throughout American culture, high and low. Scott Selisker argues that literary, cinematic, and scientific representations of the programmed mind have long shaped conversations in U.S. political culture about freedom and unfreedom, and about democracy and its enemies. Selisker demonstrates how American conceptions of freedom and of humanity have changed in tandem with developments in science and technology, including media technology, cybernetics, behaviorist psychology, and sociology. Since World War II, propagandists, scientists, and creative artists have adapted visions of human programmability as they sought to imagine the psychological manipulation and institutional controls that could produce the inscrutable subjects of totalitarian states, cults, and terrorist cells. At the same time, writers across the political spectrum reimagined ideals of American freedom, democracy, and diversity by way of contrast with these posthuman specters of mental unfreedom. Images of such "human automatons" circulated in popular films, trials, travelogues, and the news media, giving form to the nebulous enemies of the postwar and contemporary United States: totalitarianism, communism, total institutions, cult extremism, and fundamentalist terrorism. Ranging from discussions of

The Manchurian Candidate and cyberpunk science fiction to the cases of Patty Hearst and the “American Taliban” John Walker Lindh, Human Programming opens new ways of understanding the intertwined roles of literature, film, science, and technology in American culture.
