Applying Restorative Justice to Campus Sexual Misconduct Kaaren M. Williamsen, Erik S. Wessel, 2023-07-03 While sexual misconduct on our college and university campuses, both public and private, is dismayingly widespread, it continues to be significantly underreported because most victims perceive that judicial recourse, with its legalistic adversarial approach, fails to address--in a healing way--the harms done to them. Fewer still file formal complaints, many for fear that they may lose agency and that the process may rekindle the trauma of their experience. Recognizing the reality that supermajority of sexual harms in higher education are rarely addressed through established legalistic practices, this book offers a range of alternative approaches based on restorative justice. Starting from the premise "What if we started with the goal of healing in mind", this book opens with an overview of common restorative practices and accounts of application and lessons learned by practitioners who have implemented a range of restorative justice and alternative-based approaches. Subsequent chapters cover procedural elements, recommendations around documentation, and interventions for individuals who have caused harm through sexual and gender-based misconduct. The book addresses facilitation; the need to pay attention to self, people, and systems, identities, and power dynamics; the considerations for working restoratively with both complainants and respondents; offers cases and adaptable examples of resolution; and concludes with reflections on institutional implementation from the perspectives of administrators, facilitators, and a student survivor. Recognizing there will always be a need for a formal investigatory approach to cases of sexual misconduct, the book offers a wide range of alternative options that empower those who are most directly affected to make the call for themselves. In doing so, it may increase reporting and, furthermore, in offering a healing justice that addresses individual and community needs, may work to reduce sexual misconduct on campus.

Barriers to Conflict Resolution Kenneth Joseph Arrow, 1995 Why can't we all just get along? In family life, schools, law, the business world, and domestic and international affairs, it is all too common for disputes to fester unresolved even when the parties are committed to a negotiated settlement. In this book members and associates of the Stanford Center on Conflict and Negotiation address the complex issues that protract disputes and turn potential win-win negotiations into conflicts that leave everyone worse off. Drawing on such diverse but related disciplines as economics, cognitive psychology, statistics, and game and decision-making theory, the book considers the barriers to successful negotiation in such areas as civil litigation,

family law, arms control, labor-management disputes, environmental treaty making, and politics. When does it pay for parties to a dispute to cooperate, and when to compete? How can third-party negotiators further resolutions and avoid the pitfalls that deepen the divisions between antagonists? Offering answers to these and related questions, this book is a comprehensive guide to the latest understanding of ways to resolve human conflict.

Dispute Resolution in Sport David McArdle, 2014-09-19 An increasing number of sport disputes are being resolved by way of arbitration. This is the first book to critically examine the processes and benefits of sport-specific arbitration as compared to litigation. The book explores, in depth, the development of alternative dispute resolutions in sports, paying particular attention to high-profile institutions such as the Court of Arbitration for Sport, the FIFA Football Dispute Resolution Panel and important national-level bodies, and their relationship with national and international-level actors such as the IOC, WADA and the European Union. It also examines in detail the legal frameworks within which sports arbitration systems operate, considers their similarities with other arbitral bodies and considers the extent to which ADR in sport can be seen as a consequence of, and perhaps a solution to, the 'juridification' of sports. Offering a theoretical basis with which to understand the relationship between arbitration and litigation, as well as providing guidance on key contemporary issues and best practice, this book is important reading for students, researchers and practitioners working in sports law, sports

management and administration, sports politics, sports ethics, and international organisation.
