Door to Door Real Estate Prospecting Linda Schneider,2014-04 Want More Real Estate Listings? Then go directly to the source...knock and ask home owners when they plan to move. Sounds simple, right? But of course the devil is in the details: what to say, how to dress, how to get them to talk, how to track results, how to get motivated, how to improve results, what to hand out, how to handle rejection, how to follow up, and most importantly, how to convert leads to appointments. This book was born of experience, not theory. The information comes from both successful and failed door-to-door real estate prospecting efforts. In these pages, you'll see how some agents make over half a million dollars a year from door knocking, and you'll see how others struggle -- giving you a chance to learn from their mistakes. You'll see how new agents got started, and how long it took them to get their first listing. You'll discover what's hard, and how to make it easy. Most importantly, you'll see that it is both possible and realistic to use door knocking as a real estate prospecting approach to generate 10 to 20 listings per year.

The Zones of Regulation Leah M. Kuypers,2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called

zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.
