Veg in One Bed Huw Richards, 2019-10-29 Gardening YouTube sensation Huw Richards shows how to inexpensively grow year-round vegetables from just one raised bed. Keyed to a temperate coastal climate but adaptable to variations in temperature and rainfall, Huw's clear, practical advice will help you produce a bountiful harvest with minimal space and effort. In just one raised bed, green thumb wunderkind Huw Richards shows you how to grow vegetables easily, organically, abundantly, and inexpensively so you have something to harvest every month of the year. Month by month, discover what you need to do and how to do it. Try it in your yard, a small garden, or even on a roof terrace. Everything is explained in clear, photographed steps: building your bed, growing from seed, planting, feeding, and harvesting. Huw shows how to guarantee early success by starting off young plants on a windowsill. He suggests what to grow in each part of the bed and provides alternative vegetables to swap in or out depending on what you like eating. No-dig gardening methods remove most of the back-breaking work, too. Veg in One Bed goes beyond the inspiring demonstrations on his YouTube channel Huw's Nursery. In this book, he organizes all of his ideas and suggestions into a blueprint for growing your own vegetables month by month. Very little growing experience? Only a small space? No matter--with Veg in One Bed, you can still eat food you have grown throughout the year.

Green Buildings and the Law Julie Adshead, 2011-04-12 In countries such as the UK, the energy used in constructing, occupying and operating buildings represents approximately fifty percent of greenhouse gas emissions. Pressure to improve the environmental performance of buildings during both construction and occupancy, particularly to reduce carbon emissions from buildings, has become intense. Understandably, legislation and regulation are driving green development and compliance. And this is happening in a wide variety of ways. This review of the law in key jurisdictions for the research community, lawyers, the construction industry and government examines some of the mechanisms in place - from the more traditional building regulation controls to green leases and the law relating to buildings and their natural environment. Members of the CIB TG69 research group on 'Green Buildings and the Law' review aspects of the law relating to green development in a range of jurisdictions.

Walper Jr., 2007-12-13 How the everyday investor can ramp up to multigenerational perpetual wealth There's a new standard of wealth today, and many people don't realize they're part of the club. More than thirty-three million American households are now "mass affluent," with a net worth between \$100,000 and \$1 million (not including the house they live in). Each year, McBreen and Walper's firm surveys more than five thousand millionaire and megamillionaire households, and conducts many in-person interviews, online research, and historical analysis. The authors know better than anyone who the megarich are, where they work, how they invest, and how they plan their estates. The lessons they draw from their research will surprise you. It turns out that there are many ways to get rich, but only two definitive ways to ensure perpetual wealth.
