Competition Demystified Bruce C. Greenwald, Judd Kahn, 2005-08-18 Bruce Greenwald, one of the nation's leading business professors, presents a new and simplified approach to strategy that cuts through much of the fog that has surrounded the subject. Based on his hugely popular course at Columbia Business School, Greenwald and his coauthor, Judd Kahn, offer an easy-to-follow method for understanding the competitive structure of your industry and developing an appropriate strategy for your specific position. Over the last two decades, the conventional approach to strategy has become frustratingly complex. It's easy to get lost in a sophisticated model of your competitors, suppliers, buyers, substitutes, and other players, while losing sight of the big question: Are there barriers to entry that allow you to do things that other firms cannot?

Built from Scratch Bernie Marcus, Arthur Blank, Bob Andelman, 2019-08-20 One of the greatest entrepreneurial success stories of the past twenty years When a friend told Bernie Marcus and Arthur Blank that “you’ve just been hit in the ass by a golden horseshoe,” they thought he was crazy. After all, both had just been fired. What the friend, Ken Langone, meant was that they now had the opportunity to create the kind of wide-open warehouse store that would help spark a consumer revolution through low prices, excellent customer service, and wide availability of products. Built from Scratch is the story of how two incredibly determined and creative people—and their associates—built a business from nothing to 761 stores and \$30 billion in sales in a mere twenty years. Built from Scratch tells many colorful stories associated with The Home Depot’s founding and meteoric rise; shows that a company can be a tough, growth-oriented competitor and still maintain a high sense of responsibility to the community; and provides great lessons useful to people in any business, from start-ups to the Fortune 500.

Influence Robert B. Cialdini,1988 *Influence: Science and Practice* is an examination of the psychology of compliance (i.e. uncovering which factors cause a person to say yes to another's request) and is written in a narrative style combined with scholarly research. Cialdini combines evidence from experimental work with the techniques and strategies he gathered while working as a salesperson, fundraiser, advertiser, and other positions, inside organizations that commonly use compliance tactics to get us to say yes. Widely used in graduate and undergraduate psychology and management classes, as well as sold to people operating successfully in the business world, the eagerly awaited revision of *Influence* reminds the reader of the power of persuasion. Cialdini organizes compliance techniques into six categories based on psychological principles that direct human behavior: reciprocity, consistency, social proof, liking, authority, and scarcity.
