*Keisai Eisen A Tōkaidō Board Game of Courtesans* Cristina Berna, Eric Thomsen, Introduction Keisai Eisen (1790 -1848) is especially known for his *bijin-ga*, pretty women, and landscapes. He is well known for his participation in the series 69 stations of the Nakasendō together with Hiroshige. The series A Tōkaidō Board Game of Courtesans, Fifty-three Pairings in the Yoshiwara use the Tōkaidō with landscape inserts as an excuse for showing courtesans and geisha, *bijin-ga*, to skirt the censorship. It was published 1821-1823. His *bijin-ga* are considered to be masterpieces of the decadent Bunsei Era (1818–1830). Most of them have impressive hairdo with many ornamental hairpins and combs. Their dress is extravagant with beautiful patterns and sublime embroideries. Their faces are elongated squares with long noses and small pouted painted mouths. Courtesans were desirable for their rich and splendid attire, not so much for their beauty and their names were actually like trademarks for a series of girls performing the name role with the brothel in question.

**Compositions in Architecture** Don Hanlon, 2009-03-23 Architecture Use the patterns of architectural composition to inspire creative design In *Compositions in Architecture*, Don Hanlon offers students an excitingly original path to discovering architectural composition, one that avoids the traditional either/or choice between theory and practice. By exploring the underlying patterns of organization in architecture, this book enables the reader to connect architectural theory with the design process. And by relating what happens in the design studio with how the architect thinks about architectural composition, the approach spurs creative thinking. With examples that range across diverse cultures and historical periods—from the famous to the obscure—the author reveals the universal compositional strategies that can be used to solve particular architectural problems. Readers will explore: The five formal properties of composition—number, geometry, proportion, hierarchy, and orientation How the plan conveys the central organizing strategy of a building Typological similarities of architectural forms that cut across cultural, social, historical, and geographic boundaries Enriched by a graphic approach that will appeal to visual learners, *Compositions in Architecture* reveals the formal structures in architecture throughout the world as well as through the ages and inspires architects to turn abstract ideas into real-world

design.
