Reading in the Wild Donalyn Miller, 2013-11-04 In *Reading in the Wild*, reading expert Donalyn Miller continues the conversation that began in her bestselling book, *The Book Whisperer*. While *The Book Whisperer* revealed the secrets of getting students to love reading, *Reading in the Wild*, written with reading teacher Susan Kelley, describes how to truly instill lifelong wild reading habits in our students. Based, in part, on survey responses from adult readers as well as students, *Reading in the Wild* offers solid advice and strategies on how to develop, encourage, and assess five key reading habits that cultivate a lifelong love of reading. Also included are strategies, lesson plans, management tools, and comprehensive lists of recommended books. Copublished with Editorial Projects in Education, publisher of *Education Week* and *Teacher* magazine, *Reading in the Wild* is packed with ideas for helping students build capacity for a lifetime of wild reading. When the thrill of choice reading starts to fade, it's time to grab *Reading in the Wild*. This treasure trove of resources and management techniques will enhance and improve existing classroom systems and structures. —Cris Tovani, secondary teacher, Cherry Creek School District, Colorado, consultant, and author of *Do I Really Have to Teach Reading?* With *Reading in the Wild*, Donalyn Miller gives educators another important book. She reminds us that creating lifelong readers goes far beyond the first step of putting good books into kids' hands. —Franki Sibberson, third-grade teacher, Dublin City Schools, Dublin, Ohio, and author of *Beyond Leveled Books* *Reading in the Wild*, along with the now legendary *The Book Whisperer*, constitutes the complete guide to creating a stimulating literature program that also gets students excited about pleasure reading, the kind of reading that best prepares students for understanding demanding academic texts. In other words, Donalyn Miller has solved one of the central problems in language education. —Stephen Krashen, professor emeritus, University of Southern California

Midnight Madness at the Zoo Sherryn Craig,2016-02-10 The bustle of the crowd is waning and the zoo is quieting for the night. The polar bear picks up the ball and dribbles onto the court; the nightly game begins. A frog jumps up to play one-on-one and then a penguin waddles in to join the team. Count along as the game grows with the addition of each new animal and the field of players builds to ten. Three zebras serve as referees and keep the clock, because this game must be over before the zookeeper makes her rounds.

Bracketology Joe Lunardi,David Smale,Mark Few,2021-03-02 Lunardi delves into the early days of Bracketology, details its growth, and dispels the myths of the process The NCAA Tournament has become one of the most popular sports events in the country, consuming fans for weeks with the run to the Final Four and ultimately the crowning of the champion of college hoops.? Each March, millions of Americans fill out their bracket in the hopes of correctly predicting the future. Yet, there is no true Madness without the oft-debated question about what teams should be seeded where—from the Power-5 Blue Blood with some early season stumbles on their resume to the mid-major that rampaged through their less competitive conference season—and the inventor of Bracketology himself, Joe Lunardi, now reveals the mystery and science behind the legend. While going in depth on his ever-evolving predictive formula, Lunardi compares great teams from different eras with intriguing results, talks to the biggest names in college basketball about their perception of Bracketology (both good and bad), and looks ahead to the future of the sport and how Bracketology will help shape the conversation. This fascinating book is a must-read for college hoops fans and anyone who has aspired to win their yearly office pool.

How March Became Madness Eddie Einhorn,Ron Rapoport,2006 Presents a look at how the NCAA basketball tournament became one of the most popular sporting events in America, providing the first-hand accounts of some of the sports greatest players and coaches.

The Enlightened Bracketologist Nigel Holmes,Richard Sandomir,Mark Reiter,2008-12-09 Every March, the NCAA men's basketball tournament blankets newspapers and the Internet, and attracts millions of television viewers over the course of three weeks. Will a perennial favorite like Duke win? Or will it be a dark horse like Gonzaga? The phenomenon known as March Madness galvanizes a nation of viewers as few other sports events can. The reason? Bracketology. America eagerly watches as 64 teams become 32, then 16, then 8, then 4, then 2, and finally #1. Now it's time to use the same rigorous method for everything that really matters in culture, people, history, the arts and more. In *The Enlightened Bracketologist* the editors have organized the world's most haunting and maddeningly subjective questions into a scheme of binary pairings that finally reveal what is truly the best in its class: La Tache or Chateau Latour? (1) Barry Bonds or Terrell Owens? (2) Vissi d'arte or Dove Sono? (3) OJ verdict or JFK assassination? (4) Top of the world, Ma or Nobody's perfect? (5) Two by two, *The Enlightened Bracketologist* pits our cultural mainstays against each other; only the finest survive. Every

double-page spread of this book will contain a series of brackets compiled by experts and celebrities, with text call-outs that highlight the reason why one competitor moves on and another doesn't. Already committed are Elvis Costello on popular songs; David Bouley on cookbooks; Leon Fleisher on piano music; René Fleming on opera arias; Henry Beard on French phrases; Joseph Ward on wine.

The Emperor of All Maladies Siddhartha Mukherjee,2011-08-09 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist’s precision, a historian’s perspective, and a biographer’s passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

Basketball on Paper Dean Oliver, 2020-02-15 Journey inside the numbers for an exceptional set of statistical tools and rules that can help explain the winning, or losing, ways of a basketball team. Basketball on Paper doesn't diagram plays or explain how players get in shape, but instead demonstrates how to interpret player and team performance. Dean Oliver

highlights general strategies for teams when they're winning or losing and what aspects should be the focus in either situation. He describes and quantifies the jobs of team leaders and role players, then discusses the interactions between players and how to achieve the best fit. Oliver conceptualizes the meaning of teamwork and how to quantify the value of different types of players working together. He examines historically successful NBA teams and identifies what made them so successful: individual talent, a system of putting players together, or good coaching. Oliver then uses these statistical tools and case studies to evaluate the best players in history, such as Magic Johnson, Wilt Chamberlain, Bill Russell, and Charles Barkley and how they contributed to their teams' success. He does the same for some of the NBA's oddball players-Manute Bol, Muggsy Bogues, and Dennis Rodman and for the WNBA's top players. Basketball on Paper is unique in its incorporation of business and analytical concepts within the context of basketball to measure the value of players in a cooperative setting. Whether you're looking for strategies or new ideas to throw out while watching the ballgame at a sports bar, Dean Oliver's Basketball on Paper will give you amazing new insights into teamwork, coaching, and success.
