Med/Surg Master Mapper Workbook Lena Emphyema, 2019-01-28 Once upon a Medical/Surgical ward in a community hospital, a Registered Nurse precepted countless nursing students and noticed a common problem throughout entire cohorts of nearby programs. Intelligent, book-smart students seemed to lack an understanding of how all of the concepts they had learned fit together. Each piece of information taught in nursing school is an important piece of a puzzle. Concept maps are one of the best ways to study how information fits together. But concept maps are time-consuming to create and fill with information... right? Introducing The Med/Surg Master Mapper, a color-coordinated workbook of concept map templates to assist in studying large amounts of information and memorizing the most pertinent facts and figures. Ideally, use this workbook either before or after class to fill out information in every box. Filling out concept maps for the disease processes being covered in lecture before you attend class allows you to highlight the information that your professors emphasize during class, which could help you during your next exam. Alternatively, filling out the concept maps after class facilitates a thorough review of each disease process before the exam, which can be equally beneficial in terms of memorizing information. Because each type of information (i.e., etiology, symptoms, labs...) is present in the same place on each page, this workbook streamlines the process of flipping through pages of information before an exam to easily pick out the data that is specific to a certain disease. Fill out the table of contents as you go to make studying a breeze. Write additional notes on the left side of each set of pages, and keep track of what you missed on exams to help you study for the final more thoroughly. Contents of the book include 48 blank concept maps for you to fill out and increase your comprehension. The opposing page across from each concept map allows you to take additional notes on the topic. 3 blank pages in the back of

the book prompt you to keep track of information with which you weren't completely familiar on unit exams, helping you work towards the ultimate goal of passing your final exam. Snag a new workbook for each class in nursing school to keep the (infinite) information organized. Why work harder when you can work smarter?

Digital Dental Implantology Jorge M. Galante,Nicolás A. Rubio,2021-04-26 This book describes the fusion of CBCT and CAD/CAM technologies for the purpose of surgical dental treatments and explains the advantages and applications of this digital approach for implant placement procedures and other oral surgical protocols. All aspects of computer-aided imaging and design are first covered in the textbook, including the creation of DICOM and STL files; followed by the process of virtual merging to obtain a combined image. Secondly, clinical tips for the use of digital wax up, software interactions and accurate template fabrication are explained, including subtractive and additive methods used for this manufacturing step. The remainder of the book is devoted to the application of technology fusion in implantology, guided bone regeneration, and maxillofacial surgery. Both static and dynamic guided surgeries are described. Materials characteristics and surgical instruments are also presented to define a correct selection criteria. The digital approach outlined in this textbook involves a paradigm shift in the way traditional oral surgery is conceived. Technology fusion aims to improve treatment accuracy, optimize clinical time and reduce patient morbidity. Clinicians will find this book to be a valuable guide for virtual surgical planning and a path to introduce themselves into the exciting world of digital dental surgery.

Major Incident Medical Management and Support Advanced Life Support Group (ALSG),2019-01-04 The new edition of Major Incident Medical Management and Support is a vital component in the blended learning course from Advanced Life Support Group (ALSG), which aims to provide hospital staff at all levels with essential information on the preparation, management and support elements of dealing with casualties in a major incident. Split into five sections, each focuses on the elements requisite in preparing for, and responding, to a major incident. The first section discusses the epidemiology and incidences of major incidents and the structured approach to the hospital response. The second section contains the preparation required in planning for major incidents, including equipment and training. The third section covers the management of a major incident, concentrating on the clinical, nursing and management hierarchies. The fourth includes the various stages of support in a major incident, including declaring an incident and activating the plan, the reception, triage, definitive care and recovery phases of an incident. The final section focuses on special incidents which require additional consideration, including those involving hazardous chemicals, burns and children. Written in collaboration with the National Emergency Planning, Major Incident Medical Management and Support is an invaluable reference in the emergency department and beyond for staff needing to prepare for the rare, but inevitable, hospital major incidence response.
