Ditch That Textbook Matt Miller, 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

*Meet Me in Madrid* Verity Lowell, 2021-10-26 A mature, honest, and erotic romance that will have readers admiring what these two smart and determined women accomplish." —Library Journal In this sexy, sophisticated romantic comedy, two women juggle romance and career across continents. Charlotte Hilaire has a love-hate relationship with her work as a museum courier. On the one hand, it takes her around the world. On the other, her plan to become a professor is veering dangerously off track. Yet once in a while, maybe every third trip or so, the job goes delightfully sideways... When a blizzard strands Charlotte in Spain for a few extra days and she's left with glorious free time on her hands, the only question is: Dare she invite her grad school crush for an after-dinner drink on a snowy night? Accomplished, take-no-prisoners art historian Adrianna Coates has built an enviable career since Charlotte saw her last. She's brilliant. Sophisticated. Impressive as hell and strikingly beautiful. Hospitable, too, as she absolutely insists Charlotte spend the night on her pullout sofa as the storm rages on. One night becomes three and three nights become a hot and adventurous long-distance relationship when Charlotte returns to the States. But when Adrianna plots her next career move just as Charlotte finally opens a door in academia, distance may not be the only thing that keeps them apart. *Carina Adores* is home to romantic love stories where LGBTQ+ characters find their happily-ever-afters.

Achievement Teams Steve Ventura,Michelle Ventura,2022-05-27 What if you had a collaborative process of looking at student data that could pinpoint student gaps in learning and suggest effective strategies to close those gaps? What if you knew not only what you should start doing to enhance student learning, but also what you should stop doing because it hasn't given you the hoped-for results? Enter Achievement Teams. This is not another program that's here today and gone tomorrow; it's a timeless approach that any school or district can replicate that focuses on the most significant variable in student achievement: teaching. In Achievement Teams, Steve Ventura and Michelle Ventura offer a framework based on John Hattie's Visible Learning research that makes teacher collaboration more efficient, rigorous, satisfying, and effective. Think of it as a systematic treasure hunt for best practices using real data on your students. The authors walk you through the Achievement Teams four-step meeting protocol: \* In Step 1, teams focus on the evidence from a pre-assessment to provide specific feedback to students and teachers about concepts and skills that students did and did not learn. \* In Step 2, teams use that evidence to establish SMART goals for both teachers and students. \* In Step 3, teams summarize the collected data and make inferences around students' mastery levels. \* In Step 4, teachers select high-impact strategies directly targeted to student needs. A post-assessment reveals what did and didn't work. The authors provide a plethora of resources along the way, including reflection activities to extend your thinking and a variety of helpful downloadable templates designed to facilitate the work. If you're a teacher or leader who is interested in maximizing student achievement, this book is for you.

Understanding by Design Grant P. Wiggins,Jay McTighe,2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of Understanding by Design. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools,

and examples from all subject areas, the book demonstrates how the research-based principles of Understanding by Design apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of Understanding by Design offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

*Talking about Learning* Kate Wall,Steve Higgins,Emma Packard,2013-08-25 Talking about Learning Using templates to find out pupils' views Research clearly shows that children who understand what they are trying to achieve, and who feel that they have ownership (and understanding) of their own learning, tend to be more successful. TALKING ABOUT LEARNING has been developed with classroom teachers and is a very practical resource. The book includes thirty templates which will act as a stimulus for discussion about learning, between children, and between children and adults. Using cartoon

representations, children will be encouraged to think about and discuss all aspects of learning and teaching, and their own learning and thinking processes. The insights that arise will help teachers to tailor teaching to meet different needs in the classroom. TALKING ABOUT LEARNING explains the thinking behind the templates, provides examples from teachers and suggests how the templates could be used in the classroom, with children of all ages. The authors Dr Kate Wall is a Lecturer in Education at Newcastle University. She is a former primary school teacher. Steve Higgins is Professor of Education at Durham University.
