Managing Services Alan Nankervis,Yuki Miyamoto,Ruth Taylor,John Milton-Smith,2005-10-27 The rapid increase in global services during the last few decades is without doubt one of the most challenging social, cultural, political, and especially economic, forces of our time. Services have supplanted agriculture, manufacturing and resources, as the primary source of international competitive advantage in many countries, providing wealth, employment, and almost unlimited future opportunities for growth, whether in traditional or more innovative forms. This book explores the strategic management of services through an Integrated Services Management Model which links operational, marketing, financial and human resource management functions, within a broad and diverse collection of international, regional, and local service contexts. It contains numerous case examples, student projects and exercises, designed to illustrate common problems and innovative approaches, with a particular focus on the Asia Pacific and Australasian regions.

Assessing Lawyers' Ethics Adrian Evans,2010-11-15 Legal practitioners operate in an environment of seemingly endless ethical challenges, and against a backdrop of diminishing public opinion about their morality. Based on extensive research, *Assessing Lawyers' Ethics* argues that lawyers' individual ethics can be assessed and measured in realistic frameworks. When this assessment takes place, legal practitioners are more likely to demonstrate better ethical behaviour as a result of their increased awareness of their own choices. This book advocates a variety of peer-administered testing mechanisms that have the potential to reverse damaging behaviours within the legal profession. It provides prototype techniques, questions and assessments that can be modified to suit different legal cultures. These will help the profession regain the initiative in ethical business practice, halt the decline in firms' reputations and reduce the risk of state-sponsored regulatory intervention.
