**Precarious Youth in Contemporary Graphic Narratives** María Porrás Sánchez, Gerardo Vilches, 2022-09-26 This volume explores comics as examples of moral outrage in the face of a reality in which precariousness has become an inherent part of young lives. Taking a thematic approach, the chapters devote attention to the expression and representation of precarious subjectivities, as well as to the economic and professional precarity that characterizes comics creation and production. An international team of authors, young and senior systematically examines the representation of precarious youth in graphic fiction and autobiographic comics, superheroes and precarity, market issues and spaces of activism and vulnerability. With this structure, the book offers a global perspective and comprehensive coverage of different aspects of a complex and multifaceted field of knowledge, with a special attention to minorities and liminal subjects. The comics analyzed function as examples of ethical solicitation that bear witness of the precarious existence younger generations endure, while at the same time creating images that voice their outrage and might move readers to act. This timely and truly interdisciplinary volume will appeal to comics scholars and researchers in the areas of media and cultural studies, modern languages, education, art and design, communication studies, sociology, medical humanities and more.

The Geologic Model of Religion Andrew Clifford, 2012-07-17 Men are haunted by the vastness of eternity The opening line of the film Troy captures the tragic essence of personal mortality: ones' passing into oblivion and fading from all memory. Since the prehistoric dawn of humanity death has shadowed everyone's footsteps. Even into the current scientific era religion has long been the only defense. The sole comfort against oblivion offering a promise of new life or even immortality. The Geologic Model of Religion is a sympathetic study of this defense from its ancient beginnings, drawing upon archaeology, anthropology and comparative religion to clearly explain one of the most complex subjects known. From the study a new model emerges which: \* Decomposes religion into its distinct worldview and afterlife paradigms \* Categorizes evidence of belief systems held by prehistoric hunter-gatherers, culminating in the Temples of Rebirth such as Gobekli Tepe \* Concludes that spirituality began in the Fertile Crescent 11,000 years ago, spreading with the Neolithic revolution throughout the world \* Shows why judgment in afterlife was the keystone in the emerging edifice of civilization, and how it enabled hierarchies overcoming Dunbar's number which limited village sizes \* Overviews the interaction between science and religion and projects the ultimate fate of religion itself There might be 100,000 books written about religion but the Geologic Model of

Religion is unlike any other. Drawing upon evidence from anthropology, archaeology and scripture religion is divided into worldviews and afterlife paradigms. This new model evidences several long lost prehistoric religious belief systems and explains the origin of spirituality in settled societies.

*When Money Talks* Frank L. Holt, 2021-06-03 Coinage--it is one of the most successful and consistent technologies ever invented. Nothing else we still use in everyday life has a history quite like it. Look around at all the things that would bewilder a Greek, Roman, or Renaissance ancestor; then, dig into your purse or pocket for that one artifact that they would immediately recognize as part of their world. Historian Frank L. Holt takes us on a lively journey through the history of numismatics, the study of coins--one of the oldest and most important contributions to the arts and humanities. For 2600 years, poets, economists, philosophers, historians, and theologians have pondered the mysteries of money. Who invented coins, and why? Does coinage function beyond our control as if it had a mind of its own? How has it changed world history and culture? What does numismatics reveal about our past that could never be discovered from any other source? How has numismatics advanced using modern science? Does it still suffer from racist ideas about physiognomy and phrenology? What does its future hold? The approach taken in this richly illustrated book is as multi-faceted as coined money itself. Coins are integral to our economic, social, political, religious, and cultural history. *When Money Talks: A History of Coins and Numismatics* explores each aspect of coinage, and takes a special interest in how coins have appeared in literature and pop culture, ranging in its analysis from Greek drama and the New Testament to T.V. sitcoms and meme theory.

*The Template-makers of the Paris Basin* John James, 1989 The 12th- and 13th-century early Gothic churches from the region around Paris which form the basis of this study were large-scale undertakings. Dr James draws on evidence which suggests that work proceeded in a series of projects, when funding, technical problems (for example, slow-setting mortar), and the work of other trades (such as roofing and centring) allowed. Within each project there were generally a number of separately organised phases, or 'campaigns', and it is from close study of these campaigns that the author proceeds to an identification of the characteristics of the individual master masons, the template-makers.

*The Warning (Animorphs #16)* K. A. Applegate, 2017-06-27 Jake's made a pretty amazing discovery. It seems like there may be other people who know about the alien invasion of Earth. Others who know about the Yeerks. Jake finds a website devoted to revealing the existence of the Yeerks, but he and the other Animorphs suspect it might be too good to be true. If they try to investigate the site and it's a trap, the Yeerks could find out who they are. If they don't check it out, they'll never know if they're the only ones fighting. Whatever Jake and the others decide to do, they've got to move quickly, because Visser Three isn't the only one dying to meet them.

**The Arden Research Handbook of Shakespeare and Adaptation** Diana E. Henderson, Stephen O'Neill, 2022-03-24 The Arden Research Handbook of Shakespeare and Adaptation explores the dynamics of adapted Shakespeare across a range of literary genres and new media forms. This comprehensive reference and research resource maps the field of Shakespeare adaptation studies, identifying theories of adaptation, their application in practice and the methodologies that underpin them. It investigates current research and points towards future lines of enquiry for students, researchers and creative practitioners of Shakespeare adaptation. The opening section on research methods and problems considers definitions and theories of Shakespeare adaptation and emphasises how Shakespeare is both adaptor and adapted. A central section develops these theoretical concerns through a series of case studies that move across a range of genres, media forms and cultures to ask not only how Shakespeare is variously transfigured, hybridised and valorised through adaptational play, but also how adaptations produce interpretive communities, and within these potentially new literacies, modes of engagement and sensory pleasures. The volume's third section provides the reader with uniquely detailed insights into creative adaptation, with writers and practice-based researchers reflecting on their close collaborations with Shakespeare's works as an aesthetic, ethical and political encounter. The Handbook further establishes the conceptual parameters of the field through detailed, practical resources that will aid the specialist and non-specialist reader alike, including a guide to research resources and an annotated bibliography.

Creativity and Innovation in Times of Crisis (COVID-19) Roni Reiter-Palmon, Min Tang, Zorana Ivcevic, 2022-04-06

12 Months to \$1 Million Ryan Daniel Moran, 2020-05-05 This is the road map to a seven-figure business . . . in one year or less The word entrepreneur is today's favorite buzzword, and any aspiring business owner has likely encountered an overwhelming number of so-called easy paths to success. The truth is that building a real, profitable, sustainable business

requires thousands of hours of commitment, grit, and hard work. It's no wonder why more than half of new businesses close within six years of opening, and fewer than 5 percent will ever earn more than \$1 million annually. 12 Months to \$1 Million condenses the startup phase into one fast-paced year that has helped hundreds of new entrepreneurs hit the million-dollar level by using an exclusive and foolproof formula. By cutting out the noise and providing a clear and proven plan, this roadmap helps even brand-new entrepreneurs make decisions quickly, get their product up for sale, and launch it to a crowd that is ready and waiting to buy. This one-year plan will guide you through the three stages to your first \$1 million: • The Grind (Months 0-4): This step-by-step plan will help you identify a winning product idea, target customers that are guaranteed to buy, secure funding, and take your first sale within your first four months. • The Growth (Months 5 - 8): Once you're in business, you will discover how to use cheap and effective advertising strategies to get your product to at least 25 sales per day, so you can prove you have a profitable business. • The Gold (Months 9-12): It's time to establish series of products available for sale, until you are averaging at least 100 sales per day, getting you closer to the million-dollar mark every single day. Through his training sessions at Capitalism.com, Ryan Daniel Moran has helped new and experienced entrepreneurs launch scalable and sustainable online businesses. He's seen more than 100 entrepreneurs cross the seven-figure barrier, many of whom go on to sell their businesses. If your goal is to be a full-time entrepreneur, get ready for one chaotic, stressful, and rewarding year. If you have the guts to complete it, you will be the proud owner of a million-dollar business and be in a position to call your own shots for life.

Cat lovers and office workers of the world: meet in the break room and unite!

**Paint and Programming** Rohan Agarwal, 2023-07-11 The software that changes the world will be human. While most software engineers focus on learning to code in languages like Python and Java, learning tools like AWS, and keeping up with trendy tech like AI, there is an overlooked fact: code must be meaningful. It must be human. Your career must fulfill you, and your products must fulfill your users. It's hard to achieve that. This book guides you through the thousands of years of history and philosophy of crafting meaning. In other words, art. We'll talk about Da Vinci, Picasso, Van Gogh, and dozens of others. By the end, you will understand how simple paint on a canvas has resonated with the hearts and minds of millions, served Gods and Kings, and sold for hundred of millions of dollars. It is a curious phenomenon, isn't it? We will understand art deeper than any other engineer or developer. Through art, we will discover unconventional, mind-bending, yet life-changing advice on writing amazing code, building valuable software, and taking advantage of the latest technology like artificial

intelligence. And we will know how to be fulfilled and successful with our work in technology. Author Rohan Agarwal is a FAANG software engineer, published AI researcher, and trained artist who exhibited in the Metropolitan Museum of Art.

**Re-Cording Lives** Ephraim Pörtner, 2021-05-31 Administrative asylum procedures are permeated by tensions between rationalities of legality, efficiency, and deterrence in asylum casework and their various effects on cases. Based on ethnographic research in the Swiss asylum administration, this book unveils the pragmatics and politics of rendering asylum cases resolvable by re-cording the lives of applicants in terms of asylum. With his reading of power and agency in administrations, Ephraim Pörtner offers a critical view of the intricate relationship between practices of asylum casework and the governmental need to resolve claims of people seeking protection.

**The Memeing of Mark Fisher** Mike Watson, 2021-09-24 The Frankfurt School meets Fisher in this critique of capitalism incorporating memes, mental illness and psychedelia into a proposed counterculture. Spring 2020 to 2021 was the year that did not take place. We witnessed a depression, not economically speaking, but in the psychological sense: A clinical depression of and by society itself. This depression was brought about not just by Covid isolation, but by the digital economy, fueled by social media and the meme. In the aftermath, this book revisits the main Frankfurt School theorists, Adorno, Horkheimer, Benjamin and Marcuse, who worked in the shadow of World War Two, during the rise of the culture industry. In examining their thoughts and drawing parallels with Fisher's Capitalist Realism, The Memeing of Mark Fisher aims to render the Frankfurt School as an incisive theoretical toolbox for the post-Covid digital age. Taking in the phenomena of QAnon, twitch streaming, and memes it argues that the dichotomy between culture and political praxis is a false one. Finally, as more people have access to the means for theoretical and cultural broadcasting, it is urged that the online left uses that access to build a real life cultural and political movement.

**Post Memes** Daniel Bristow, Alfie Bown, 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. POST MEMES: SEIZING THE MEMES OF PRODUCTION takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay

Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. ABOUT THE EDITORS ALFIE BOWN is the author of several books including *The Playstation Dreamworld* (Polity, 2017) and *In the Event of Laughter: Psychoanalysis, Literature and Comedy* (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of *Joyce and Lacan: Reading, Writing, and Psychoanalysis* (Routledge, 2016) and *2001: A Space Odyssey and Lacanian Psychoanalytic Theory* (Palgrave, 2017). He is also the co-creator with Alfie Bown of *Everyday Analysis*, now based at New Socialist magazine.

**Primal Roots of Horror Cinema** Carrol L. Fry, 2019-04-01 Why is horror in film and literature so popular? Why do viewers and readers enjoy feeling fearful? Experts in the fields of sociobiology and evolutionary psychology posit that behaviors from our ancestors that favored survival and adaptation still influence our actions, decisions and thoughts today. The author, with input from a new generation of Darwinists, explores six primal narratives that recur in the horror genre. They are territoriality, tribalism, fear of genetic assimilation, mating rituals, fear of the predator, and distrust or fear of the Other.
