The Playful Politics of Memes Mette Mortensen, Christina Neumayer, 2023-05-22 Memes work as rhetorical weapons and discursive arguments in political conflicts. Across digital platforms, they confirm, contest and challenge political power and hierarchies. They simultaneously create social distortion, hostility, and a sense of community. Memes thus not only reflect norms but also work as a tool for negotiating them. At the same time, memes meld symbolic and cultural elements with technological functionalities, allowing for replicability and remixing. This book studies how memes disrupt and reimagine politics in humorous ways. Memes create a playful activity that follows a shared set of rules and gives a (shared) voice, which may generate togetherness and political identities but also increase polarization. As their template travels, memes continue to appropriate new political contexts and to (re)negotiate frontiers in the political. The chapters in this book allow us to chart the playful politics of memes and how they establish or push frontiers in various political, cultural, and platform-specific contexts. Taken together, memes can challenge and regenerate populism, carve out spaces for new identity formations, and create togetherness in situations of crises. They can also, however, lead to the normalization of racist discourses. This book will be of interest to researchers and advanced students of Media and Communication Studies, Information Studies, Politics, Sociology, and Cultural Studies. It was originally published as a special issue of the journal, *Information, Communication & Society*.

Humour Translation in the Age of Multimedia Margherita Dore, 2020-11-02 This volume seeks to investigate how humour translation has developed since the beginning of the 21st century, focusing in particular on new ways of communication. The authors, drawn from a range of countries, cultures and academic traditions, address and debate how today's globalised communication, media and new technologies are influencing and shaping the translation of humour. Examining both how humour translation exploits new means of communication and how the processes of humour translation may be challenged and enhanced by technologies, the chapters cover theoretical foundations and implications, and methodological practices and challenges. They include a description of current research or practice, and comments on possible future developments. The contributions interconnect around the issue of humour creation and translation in the 21st century, which can truly be labelled as the age of multimedia. Accessible and engaging, this is essential reading for advanced students and researchers in Translation Studies and Humour Studies.

**Serial Killers in Contemporary Television** Brett A.B. Robinson,Christine Daigle,2022-06-13 This volume examines the significant increase in representations of serial killers as central characters in popular television over the last two decades. Via critical analyses of the philosophical and existential themes presented to viewers and their place in the cultural landscape of contemporary America, the authors ask: What is it about serial killers that incited such a boom in these types of narratives in popular television post-9/11? Looking past the serial format of television programming as uniquely suited for the presentation of the serial killer's actions, the chapters delve into deeper reasons as to why TV has proven to be such a fertile ground for serial killer narratives in contemporary popular culture. An international team of authors question: What is it about serial killers that makes these characters deeply enlightening representations of the human condition that, although horrifically deviant, reflect complex elements of the human psyche? Why are serial killers intellectually fascinating to audiences? How do these characters so deeply affect us? Shedding new light on a contemporary phenomenon, this book will be a fascinating read for all those at the intersection of television studies, film studies, psychology, popular culture, media studies, philosophy, genre studies, and horror studies.

**Just Here for the Comments** Gina Siple,2024-05-28 This book challenges the conventional perspective of what 'counts' as participatory online culture. Presenting 'lurking' on social media newsfeeds as a communication and literacy practice that resists dominant power structures, it offers an innovative approach to digital qualitative methods.

**Hamlet on the Holodeck, updated edition** Janet H. Murray,2017-04-07 An updated edition of the classic book on digital storytelling, with a new introduction and expansive chapter commentaries. I want to say to all the hacker-bards from every field—gamers, researchers, journalists, artists, programmers, scriptwriters, creators of authoring systems... please know that I wrote this book for you." —Hamlet on the Holodeck, from the author's introduction to the updated edition Janet Murray's Hamlet on the Holodeck was instantly influential and controversial when it was first published in 1997. Ahead of its time, it accurately predicted the rise of new genres of storytelling from the convergence of traditional media forms and computing. Taking the long view of artistic innovation over decades and even centuries, it remains forward-looking in its description of the development of new artistic traditions of practice, the growth of participatory audiences, and the realization of still-emerging technologies as consumer products. This updated edition of a book the New Yorker calls a "cult classic" offers a new introduction by Murray and chapter-by-chapter commentary relating Murray's predictions and enduring design insights to the most significant storytelling innovations of the past twenty years, from long-form television to artificial intelligence to virtual reality. Murray identifies the powerful new set of expressive affordances that computing offers for the ancient human activity of storytelling and considers what would be necessary for interactive narrative to become a mature and compelling art form. Her argument met with some resistance from print loyalists and postmodern hypertext enthusiasts, and it provoked a foundational debate in the emerging field of game studies on the relationship between narrative and

videogames. But since Hamlet on the Holodeck's publication, a practice that was largely speculative has been validated by academia, artistic practice, and the marketplace. In this substantially updated edition, Murray provides fresh examples of expressive digital storytelling and identifies new directions for narrative innovation.

Libraries as Dysfunctional Organizations and Workplaces Spencer Acadia,2022-11-30 Libraries as Dysfunctional Organizations and Workplaces expands the dysfunctional concept in the professional and academic LIS discourse by exposing the internal problematics of libraries, especially at the social and organizational levels. Including contributions written by LIS professionals and scholars, the book demonstrates that although many libraries do well at attending to users and managing external information they often fail at taking care of their own employees and addressing internal workplace issues. Acadia and the contributing authors explore the problem of dysfunctional libraries so that the LIS profession can come to terms with the systemic dysfunction in their institutions and begin solution-oriented progress toward new and sustainable functionality. The book analyzes the dysfunctional nature of modern libraries, while simultaneously proposing solutions to reduce and alleviate dysfunction. Through theory and application, it takes an explicit practice-based approach with the intent to inform and explain dysfunction as experienced in the library workplace at individual and structural levels and perspectives. Libraries as Dysfunctional Organizations and Workplaces brings the dysfunction discourse to the attention of LIS academics and scholars so that further theoretical and empirical research can proceed from and subsequently be addressed in library and information schools. The book will also be essential reading for librarians and LIS students currently working or preparing to work in public, college, and university libraries.

**The Routledge Handbook of Discourse and Disinformation** Stefania M. Maci,Massimiliano Demata,Mark McGlashan,Philip Seargeant,2023-11-30 This handbook offers a comprehensive overview of research into discourses of disinformation, misinformation, post-truth, alternative facts, hate speech, conspiracy theories, and fake news. Divided into two sections, it provides a detailed look at the methodological challenges and approaches for studying disinformation, along with a wide range of case studies covering everything from climate change denial to COVID-19 conspiracies. The studies address how discourses of disinformation are constructed and developed, what rhetorical and persuasive strategies they employ, how disinformation can be discerned from real news, and what steps we might take in order to create a more trustworthy news environment. Authored by leading experts from around the world, and showcasing the most up-to-date methodological approaches to the topic, the volume makes a significant contribution to current linguistic research on politics, and is an essential guide to the discourses of disinformation for advanced students and researchers of English language studies, linguistics, and media and communication studies.

**Religion Explained** Pascal Boyer,2007-03-21 Many of our questions about religion, says renowned anthropologist Pascal Boyer, are no longer mysteries. We are beginning to know how to answer questions such as Why do people have religion? Using findings from anthropology, cognitive science, linguistics, and evolutionary biology, Religion Explained shows how this aspect of human consciousness is increasingly amenable to coherent, naturalistic explanation. This brilliant and controversial book gives readers the first scientific explanation for what religious feeling is really about, what it consists of, and where it comes from.

*The World Made Meme* Ryan M. Milner,2018-04-13 How memetic media—aggregate texts that are collectively created, circulated, and transformed—become a part of public conversations that shape broader cultural debates. Internet memes—digital snippets that can make a joke, make a point, or make a connection—are now a lingua franca of online life. They are collectively created, circulated, and transformed by countless users across vast networks. Most of us have seen the cat playing the piano, Kanye interrupting, Kanye interrupting the cat playing the piano. In *The World Made Meme*, Ryan Milner argues that memes, and the memetic process, are shaping public conversation. It's hard to imagine a major pop cultural or political moment that doesn't generate a constellation of memetic texts. Memetic media, Milner writes, offer participation by reappropriation, balancing the familiar and the foreign as new iterations intertwine with established ideas. New commentary is crafted by the mediated circulation and transformation of old ideas. Through memetic media, small strands weave together big conversations. Milner considers the formal and social dimensions of memetic media, and outlines five basic logics that structure them: multimodality, reappropriation, resonance, collectivism, and spread. He examines how memetic media both empower and exclude during public conversations, exploring the potential for public voice despite everyday antagonisms. Milner argues that memetic media enable the participation of many voices even in the midst of persistent inequality. This new kind of participatory conversation, he contends, complicates the traditional culture industries. When age-old gatekeepers intertwine with new ways of sharing information, the relationship between collective participation and individual expression becomes ambivalent. For better or worse—and Milner offers examples of both—memetic media have changed the nature of public conversations.

**The Selfish Gene** Richard Dawkins,1989 Science need not be dull and bogged down by jargon, as Richard Dawkins proves in this entertaining look at evolution. The themes he takes up are the concepts of altruistic and selfish behaviour; the genetical definition of selfish interest; the evolution of aggressive behaviour; kinship theory; sex ratio theory; reciprocal altruism; deceit; and the natural selection of sex differences. 'Should be read, can be read by almost anyone. It describes with great skill a new face of the theory of evolution.' W.D. Hamilton, *Science*

**The Arrangement** Mary Balogh,2013 Description: Movie Lobby Card.

*Emotions Explained with Buff Dudes* Andrew Tsyston,2018-10-16 You know how, since the dawn of humanity, great

philosophers and poets have dedicated their entire lives to exploring concepts like love, life itself, logic, and sorrow? Well, those great philosophers and poets are dead now, so I win. — Shen Emotions Explained With Buff Dudes is your fully illustrated guide to the hyper-conflicted, tragicomic feelings of our age. Featuring the resilient, shaggy-haired Shen, this debut collection of Owlurd Comix is a tale of triumph and survival — of getting your ass kicked by sleep deprivation and student loans, but never losing hope. Most of all, it's an amusing, instructive journey through a vast array of emotions, including those best explained with dudes who are buff.

**The Curse of the Creeping Coffin (Give Yourself Goosebumps)** R. L. Stine, 2015-06-30 Reader beware--you choose the scare! GIVE YOURSELF GOOSEBUMPS! You're off to visit your grandmother, whose house backs up to a graveyard. At first the tombstones seem far away. But every day they move a little closer. Then you discover the headstones are disappearing. But the dead aren't gone -- their ghosts are moving. Right into your grandmother's house! If you decide to stay, you must battle a warrior ghost. If you decide to run, one of the kid ghosts follows you home. Will you be haunted...for the rest of your life? The choice is yours in this scary GOOSEBUMPS adventure that's packed with over 20 super-spooky endings!

**The Werewolf in the Living Room** R. L. Stine, 1999 It had the face of a wolf but the back and chest of a man. He stared at me with black, gleaming eyes. I stared in horror at his long, curved fangs as he curled back his thick lips. Then, before I could run, the werewolf raised his head in a fierce howl. And sank his fangs deep into my skin.

*Meme Media and Meme Market Architectures* Yuzuru Tanaka, 2003-07-10 This book provides an integrated view of the five kinds of enabling technologies in terms of knowledge media architectures: multimedia and hypermedia, object-oriented GUI and visual programming, reusable component software and component integration, network publishing and electronic commerce, and object-oriented and multimedia databases. Among many books on multimedia and hypermedia, few address knowledge. Of those that do, none focus on media for the editing, distribution, and management of knowledge the way this book does. It is written based on the hypothesis that knowledge media work as genes, with their network publishing repository, working as a gene pool to accelerate the evolution of knowledge shared in our societies.

Handbook of Research on Advanced Research Methodologies for a Digital Society Punziano, Gabriella, Delli Paoli, Angela, 2021-09-03 Doing research is an ever-changing challenge for social scientists. This challenge is harder than ever today as current societies are changing quickly and in many, sometimes conflicting, directions. Social phenomena, personal interactions, and formal and informal relationships are becoming more borderless and disconnected from the anchors of the offline "reality." These dynamics are heavily marking our time and are suggesting evolutionary challenges in the ways we know, interpret, and analyze the world. Internet and computer-mediated communication (CMC) is being incorporated into every aspect of daily life, and social life has been deeply penetrated by the internet. This is due to recent technological developments that increase the scope and range of online social spaces and the forms and time of participation such as Web

2.0, which widened the opportunities for user-generated content, the emergence of an “internet of things,” and of ubiquitous mobile devices that make it possible to always be connected. This implies an adjustment to epistemological and methodological stances for conducting social research and an adaption of traditional social research methods to the specificities of online interactions in the digital society. The Handbook of Research on Advanced Research Methodologies for a Digital Society covers the different strands of methods most affected by the change in a digital society and develops a broader theoretical reflection on the future of social research in its challenge to always be fitting, suitable, adaptable, and pertinent to the society to be studied. The chapters are geared towards unlocking the future frontiers and potential for social research in the digital society. They include theoretical, epistemological, and ontological reflections about the digital research methods as well as innovative methods and tools to collect, analyze, and interpret data. This book is ideal for social scientists, practitioners, librarians, researchers, academicians, and students interested in social research methodology and its developments in the digital scenario.

**Generating Creative Language - Theories, Practice and Evaluation** Mika Hämmäläinen, 2020-10-08 This thesis presents approaches to computationally creative natural language generation focusing on theoretical foundations, practical solutions and evaluation. I defend that a theoretical definition is crucial for computational creativity and that the practical solution must closely follow the theoretical definition. Finally, evaluation must be based on the underlying theory and what was actually modelled in the practical solution. A theoretical void in the existing theoretical work on computational creativity is identified. The existing theories do not explicitly take into account the communicative nature of natural language. Therefore, a new theoretical framework is elaborated that identifies how computational creativity can take place in a setting that has a clear communicative goal. This introduces a communicative-creative trade off that sets limits to creativity in such a communicative context. My framework divides creativity in three categories: message creativity, contextual creativity and communicative creativity. Any computationally creative NLG approach not taking communicativity into account is called mere surface generation. I propose a novel master-apprentice approach for creative language generation. The approach consists of a genetic algorithm, the fitness functions of which correspond to different parameters defined as important for the creative task in question from a theoretical perspective. The output of the genetic algorithm together with possible human authored data are used to train the apprentice, which is a sequence-to-sequence neural network model. The role of the apprentice in the system is to approximate creative autonomy. Evaluation is approached from three different perspectives in this work: ad-hoc and abstract, theory-based and abstract, and theory-based and concrete. The first perspective is the most common one in the current literature and its shortcomings are demonstrated and discussed. This starts a gradual shift towards more meaningful evaluation by first using proper theories to define the task being modelled and finally reducing the room for subjective interpretation by suggesting the use of concrete evaluation questions.

*Encyclopedia of Information Science and Technology, Fourth Edition* Khosrow-Pour, D.B.A., Mehdi, 2017-06-20 In recent years, our world has experienced a profound shift and progression in available computing and knowledge sharing innovations. These emerging advancements have developed at a rapid pace, disseminating into and affecting numerous aspects of contemporary society. This has created a pivotal need for an innovative compendium encompassing the latest trends, concepts, and issues surrounding this relevant discipline area. During the past 15 years, the Encyclopedia of Information Science and Technology has become recognized as one of the landmark sources of the latest knowledge and discoveries in this discipline. The Encyclopedia of Information Science and Technology, Fourth Edition is a 10-volume set which includes 705 original and previously unpublished research articles covering a full range of perspectives, applications, and techniques contributed by thousands of experts and researchers from around the globe. This authoritative encyclopedia is an all-encompassing, well-established reference source that is ideally designed to disseminate the most forward-thinking and diverse research findings. With critical perspectives on the impact of information science management and new technologies in modern settings, including but not limited to computer science, education, healthcare, government, engineering, business, and natural and physical sciences, it is a pivotal and relevant source of knowledge that will benefit every professional within the field of information science and technology and is an invaluable addition to every academic and corporate library.

**Creative Technologies for Multidisciplinary Applications** Connor, Andy M., 2016-03-29 Given that institutions of higher education have a predisposition to compartmentalize and delineate areas of study, creative technology may seem oxymoronic. On the contrary, the very basis of western thought is found in the idea of transcendent knowledge. The marriage of opposing disciplines therefore acts as a more holistic approach to education. *Creative Technologies for Multidisciplinary Applications* acts as an inspiration to educators and researchers who wish to participate in the future of such multidisciplinary disciplines. Because creative technology encompasses many applications with the realm of art, gaming, the humanities, and digitization, this book features a diverse collection of relevant research for the modern world. It is a pivotal reference publication for educators, students, and researchers in fields related to sociology, technology, and the humanities.
