Under Representation David Lloyd,2018-11-13 Under Representation shows how the founding texts of aesthetic philosophy ground the racial order of the modern world in our concepts of universality, freedom, and humanity. In taking on the relation of aesthetics to race, Lloyd challenges the absence of sustained thought about race in postcolonial studies, as well as the lack of sustained attention to aesthetics in critical race theory. Late Enlightenment discourse on aesthetic experience proposes a decisive account of the conditions of possibility for universal human subjecthood. The aesthetic forges a powerful “racial regime of representation” whose genealogy runs from enlightenment thinkers like Kant and Schiller to late modernist critics like Adorno and Benjamin. For aesthetic philosophy, representation is not just about depiction of diverse humans or inclusion in political or cultural institutions. It is an activity that undergirds the various spheres of human practice and theory, from the most fundamental acts of perception and reflection to the relation of the subject to the political, the economic, and the social. Representation regulates the distribution of racial identifications along a developmental trajectory: The racialized remain “under representation,” on the threshold of humanity and not yet capable of freedom and civility as aesthetic thought defines those attributes. To ignore the aesthetic is thus to overlook its continuing force in the formation of the racial and political structures down to the present. Across five chapters, Under Representation investigates the aesthetic foundations of modern political subjectivity; race and the sublime; the logic of assimilation and the stereotype; the subaltern critique of representation; and the place of magic and the primitive in modernist concepts of art, aura and representation. Both a genealogy and an account of our present, Under Representation ultimately helps show how a political reading of aesthetics can help us build a racial politics adequate for the problems we face today, one that stakes claims more radical than multicultural demands for representation.

Amusing Ourselves to Death Neil Postman,2005-12-27 What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman.” -CNN Originally published in 1985, Neil Postman’s groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one.” -Jonathan Yardley, *The Washington Post Book World*

Passion of the Western Mind Richard Tarnas,2011-10-19 [This] magnificent critical survey, with its inherent respect for

both the 'Westt's mainstream high culture' and the 'radically changing world' of the 1990s, offers a new breakthrough for lay and scholarly readers alike....Allows readers to grasp the big picture of Western culture for the first time. SAN FRANCISCO CHRONICLE Here are the great minds of Western civilization and their pivotal ideas, from Plato to Hegel, from Augustine to Nietzsche, from Copernicus to Freud. Richard Tarnas performs the near-miracle of describing profound philosophical concepts simply but without simplifying them. Ten years in the making and already hailed as a classic, THE PASSION OF THE WESERN MIND is truly a complete liberal education in a single volume.

Stiegler and Technics Christina Howells,2013-09-16 These 17 essays covers all aspects of Bernard Stiegler's work, from poststructuralism, anthropology and psychoanalysis to his work on the politics of memory, 'libidinal economy', technoscience and aesthetics, keeping a focus on his key theory of technics throughout. Stiegler brings together key concepts from Plato, Freud, Derrida and Simondon to argue that the human is 'invented' through technics rather than a product of purely biological evolution. Stiegler is a thinker at the forefront of our contemporary concerns with consumerism, technology, inter-generational division, political apathy and economic crisis. His ambitious project is to go beyond these sources of social distress to uncover and examine precisely 'what makes life worth living'. Contributors include: Stephen Barker, University of California Irvine and translator of Steigler; Richard Beardsworth, American University of Paris and translator of Stiegler; Miguel de Beistegui; University of Warwick; Marc Crepon, Ecole normale superieure and co-founder of Stiegler's think tank, Ars Industrialis and Daniel Ross, co-director of 'The Ister', the award-winning film on Heidegger, and translator of Stiegler.

Brilliant Blunders Mario Livio,2014-05-27 Drawing on the lives of five great scientists -- Charles Darwin, William Thomson (Lord Kelvin), Linus Pauling, Fred Hoyle and Albert Einstein -- scientist/author Mario Livio shows how even the greatest scientists made major mistakes and how science built on these errors to achieve breakthroughs, especially into the evolution of life and the universe--

Ultralearning Scott Young,2019-08-06 Now a Wall Street Journal bestseller. Learn a new talent, stay relevant, reinvent yourself, and adapt to whatever the workplace throws your way. Ultralearning offers nine principles to master hard skills quickly. This is the essential guide to future-proof your career and maximize your competitive advantage through self-education. In these tumultuous times of economic and technological change, staying ahead depends on continual self-education—a lifelong mastery of fresh ideas, subjects, and skills. If you want to accomplish more and stand apart from everyone else, you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn, as you did as a student, so you rerun old routines and old ways of solving problems. To counter that, Ultralearning offers powerful strategies to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H. Young incorporates the latest research about the most effective learning methods and the stories of other ultralearners like himself—among them Benjamin Franklin, chess grandmaster

Judit Polgár, and Nobel laureate physicist Richard Feynman, as well as a host of others, such as little-known modern polymath Nigel Richards, who won the French World Scrabble Championship—without knowing French. Young documents the methods he and others have used to acquire knowledge and shows that, far from being an obscure skill limited to aggressive autodidacts, ultralearning is a powerful tool anyone can use to improve their career, studies, and life. Ultralearning explores this fascinating subculture, shares a proven framework for a successful ultralearning project, and offers insights into how you can organize and execute a plan to learn anything deeply and quickly, without teachers or budget-busting tuition costs. Whether the goal is to be fluent in a language (or ten languages), earn the equivalent of a college degree in a fraction of the time, or master multiple tools to build a product or business from the ground up, the principles in Ultralearning will guide you to success.

The Essence of Photography Bruce Barnbaum,2014-11-04 There is a lot more to photography than simply picking up a camera, pointing it toward something, and tripping the shutter. Achieving a great photograph requires thought and preparation, an understanding of the photographic process, and a firm grasp of how light and composition affect a photo. There must be personal involvement and personal expression. There must be experimentation, with the recognition that only a small percentage of experiments end successfully. In this book, best-selling author and world-renowned photographer and teacher Bruce Barnbaum explores these seldom-discussed issues by drawing upon his personal experiences and observations from more than 40 years of photographing and teaching. In addition to photographs, Bruce also uses painting, music, and writing, as well as the sciences and even business, to provide pertinent examples of creative thinking. These examples serve as stepping-stones that will lead you to your own heightened ability to see and be creative. Creativity is a topic that is almost wholly ignored in formal education because most instructors think that it cannot be taught or learned. To the contrary, Bruce has proven that photographic seeing and creativity can be taught, learned, and improved. This book expands on the ideas that are central to Bruce's method of teaching photography, which he has used in workshops for the past 41 years. Included in the book are in-depth discussions on the following topics: Defining your own unique rhythm and approach as a photographer How to translate the scene in front of you to the final photograph The differences and similarities between how an amateur and a professional approach photography The differences between realism and abstraction, and the possibilities and limitations of each Learning to expand your own seeing and creativity through classes, workshops, and associating with other photographers Why the rules of composition should be ignored How to follow your passion When to listen to the critics and when to ignore them The book is richly illustrated with over 90 photographs taken by Bruce as well as other photographers. Seeing and creativity are difficult to teach, but not impossible. This very different, perhaps groundbreaking book is sure to inspire photographers of all skill levels-from beginners to seasoned professionals-to think deeply about the issues involved in creating successful photographs.

One Place after Another Miwon Kwon,2004-02-27 A critical history of site-specific art since the late 1960s. Site-specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality. Throughout the 1970s and 1980s, as site-specific art intersected with land art, process art, performance art, conceptual art, installation art, institutional critique, community-based art, and public art, its creators insisted on the inseparability of the work and its context. In recent years, however, the presumption of unrepeatability and immobility

encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces. *One Place after Another* offers a critical history of site-specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many permutations. Informed by urban theory, postmodernist criticism in art and architecture, and debates concerning identity politics and the public sphere, the book addresses the siting of art as more than an artistic problem. It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism. The book addresses the work of, among others, John Ahearn, Mark Dion, Andrea Fraser, Donald Judd, Renee Green, Suzanne Lacy, Inigo Manglano-Ovalle, Richard Serra, Mierle Laderman Ukeles, and Fred Wilson.

The Hormone Diaries Hannah Witton, 2019-06-11 When Hannah Witton started documenting her journey coming off the pill and re-getting her period, she wasn't anticipating the reaction, from people of all ages, that talking about it would bring. It exposed a glaring gap - the resources and the spaces to talk honestly about periods just aren't there. And with more and more research showing that your period and your hormones can affect literally every area of your life, this is a problem. *The Hormone Diaries* draws on both Hannah's own experiences and, through crowdsourcing on her social media platform, those of her fans too. It looks at the cultural differences in how periods are treated around the world and includes space for readers to write about their own experiences, creating the definitive period self-help book 50% of the world has been waiting for.

The Vital Question Nick Lane, 2016 A game-changing book on the origins of life, called the most important scientific discovery 'since the Copernican revolution' in *The Observer*.

Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (*Insider*, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula.

Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, *If only there were more hours in the day...*, *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

My Stoic Journal Simon Welch, 2021-10-02 You have power over your mind - not outside events. Realize this, and you will find strength. Marcus Aurelius The ancient Greek and Roman Stoic philosophers were avid Journalers, why? Because writing down our thoughts helps us understand our own thought processes, it is a way of studying the self and essentially, taking back control of our minds! Writing in a journal on a regular basis can give us greater insight into how we think - it helps us spot the patterns in our own thinking so we can track of our self-development. If we start to recognize the bad habits in our thinking through the practice of journaling, then we can take action and learn to alter our thinking and our mindset to stay focused and stay positive. Seneca used to ask himself the following questions at the end of the day every day: What ailment have I cured today? What failing have I resisted? Where have I failed? What duties did I forget to do? Where can I show improvement? When we are no longer able to change a situation, we are challenged to change ourselves. Viktor Frankl The Dichotomy of Control Stoics acknowledge that people don't have control over all, or even much, of what happens in life. And they emphasize that worrying about things outside of their control is simply unproductive, or even irrational to a person who wants to attain a sense of tranquility. The Stoics would have us remind ourselves daily - to differentiate between what is and is not under control - to not waste energy over uncontrollable adverse events. Where many people worry endlessly about things out of their control, the Stoics think their energy is better spent thinking of creative solutions to problems, rather than the issues themselves. This idea, influenced modern psychology, particularly in the form of Cognitive Behavioural Therapy or CBT - which is perhaps to this day the single most effective and commonly used technique in the treatment of an array of mild to moderate mental health disorders. So, by simply making a habit of recognizing your thoughts and writing them down in a journal everyday so that you can clearly set aside the things you can control and the things you can't, you are taking back control of your mind, freeing it from stress and anxiety and working towards a more pragmatic, and stoic, approach to life. A gem cannot be polished without friction, nor a man perfected without trials. Seneca

Dialectic of Enlightenment Max Horkheimer, Theodor W. Adorno, 1993 A major study of modern culture, *Dialectic of Enlightenment* for many years led an underground existence among the homeless Left of the German Federal Republic until its definitive publication in West Germany in 1969. Originally composed by its two distinguished authors during their Californian exile in 1944, the book can stand as a monument of classic German progressive social theory in the twentieth

century.>
