Ten Strategies for Building Community with Technology Bernie Potvin, Nicki Rehn, David Peat, 2014-06-16

Educators in online and other technology-rich environments consistently ask, "How can I build community among the learners in my class?" They know learning is strengthened by community, but aren't sure how to design a community in a learning environment where technology plays a significant role. *Ten Strategies for Building Community with Technology* answers their question with proven strategies developed over the authors' thirty years' experience designing and teaching online classes. The ten strategies demonstrate that technology is not an impediment to community, but instead a tool for building more effective learning environments than are possible with traditional, face-to-face classrooms. Used the right way, technology can provide more instructional time, more opportunities for students to reflect, more chances to share and connect, and more access to feedback. But these effective learning environments don't happen by chance. This book will give you all the background, tactics, examples and advice you need to design successful learning communities with technology. *Ten Models for Building Learning Communities* Transmission/Direct Instruction Guided Discovery Nurturing Apprenticeship Case Study Shared Praxis Insight-Generating Training Projects Inquiry

Using Technology with Classroom Instruction that Works Howard Pitler,Elizabeth Ross Hubbell,Matt Kuhn,2012 Learn how to improve instruction by * Collecting the right data--the right way. * Incorporating relevant data into everyone's daily life. * Resisting the impulse to set brand-new goals every year. * Never settling for good enough. * Anticipating changes--big and small, local and federal. * Collaborating and avoiding privatized practice. * Involving all stakeholders in identifying problems, setting goals, and analyzing data. * Agreeing on what constitutes high-quality instruction and feedback. The challenge is to understand that data--not intuition or anecdotal reports--are tools to be used in getting better at teaching students. And teaching students effectively is what schools are all about. Following the guidance in this book, overcome uncertainty and concerns about data as you learn to collect and analyze both soft and hard data and use their secrets for

instructional improvement in your school.

Practical Peer-to-Peer Teaching and Learning on the Social Web Hai-Jew, Shalin,2021-11-19 On the Social Web, people share their enthusiasms and expertise on almost every topic, and based on this, learners can find resources created by individuals with varying expertise. Through this trend and the wide availability of video cameras and authoring tools, people are creating DIY resources and sharing their knowledge, skills, and abilities broadly. While these resources are increasing in availability, what has not been explored is the effectiveness of these resources, peer-to-peer teaching and learning, and how well this content prepares learners for professional roles. Practical Peer-to-Peer Teaching and Learning on the Social Web explores the efficacies of online teaching and learning with materials by peers and provides insights into what is made available for teaching and learning by the broad public. It also considers intended and unintended outcomes of open-shared learning online and discusses practical ethics in teaching and learning online. Covering topics such as learner roles and instructional design, it is ideal for teachers, instructional designers and developers, software developers, user interface designers, researchers, academicians, and students.

Stronger Writing Skills for Teens Gregory Berry,2018-08-16 Stronger Writing Skills for Teens offers middle and high school teachers strategies, techniques and materials for teaching adolescent writing in a variety of modes. A practical and useful resource for classroom teachers, the book focuses on quality writing instruction within the modes of writing as defined by Common Core State Standards. Examples of student work are included to illustrate effectively designed assignments and strategies for writing and revising. It includes methods for teaching vocabulary and academic language to help students improve word choice and use of language in their writing. Tools for assessing and grading student writing are also included, as well as suggestions and resources for effectively using writing rubrics and scoring guides. Narrative, expository/explanatory, argument, and research writing are discussed, with specific strategies, suggested materials, and ways to approach the modes. Teachers will also find suggestions for helping students learn to incorporate multimodal text into their writing and successfully write in digital contexts, as well as methods for helping students master timed and on-demand writing.

HTML, CSS, Bootstrap, Php, Javascript and MySql Olga Maria Stefania Cucaro,2022-02-08 This book aims to initiate those who want to independently create a website, to the world of domains and programming linked to the web. The author conceived this work as a scientific work intended for educational and study use for all those who approach the study of client-side and server-side programming. In the first place the difference between the various domains existing on the network will be explained and at a later time we will try to explain the CSS and HTML and then enter the PHP programming (server side) and JavaScript (client side) with the creation of databases via phpMyAdmin. All this will be explained through an example website created specifically using a free Bootstrap for simplicity and basic convenience and programming a control panel with login connected to the site via database for inserting images directly from the web by uploading them to the database created with connected phpMyAdmin to the site. Obviously, after entering the world of databases and programming, you can apply this knowledge to any other need for iteration by the user required by the site project. The aim of this study is not to create simple web pages that today can be done easily with WordPress or other easy-to-use software, but for purely educational purposes to explain the use of databases and server and client-side programming to make a dynamic otherwise static site. In summary, this work can be useful for those who want to approach the fascinating world of website programming from the beginning.

Digital Feedback Methods Jennifer Schluer,2022-09-05 The crucial role of feedback in the learning process is undisputed. But how can feedback be exchanged in the digital age? This book equips teachers and learners with a research-based overview of digital feedback methods. This includes, for instance, feedback in text editors, cloud documents, chats, forums, wikis, surveys, mails as well as multimodal feedback in video conferences and recorded audio, video and screencast feedback. The book discusses the advantages and limitations of each digital feedback method and offers suggestions for their

practical application in the classroom. They can be utilized in online teaching as well as to enrich on-site teaching. The book also provides ideas for combining different feedback methods synergistically and closes with recommendations for developing dynamic digital feedback literacies among teachers and students.

Folksonomies. Indexing and Retrieval in Web 2.0 Isabella Peters,2009-12-23 In Web 2.0 users not only make heavy use of Col-laborative Information Services in order to create, publish and share digital information resources - what is more, they index and represent these re-sources via own keywords, so-called tags. The sum of this user-generated metadata of a Collaborative Information Service is also called Folksonomy. In contrast to professionally created and highly struc-tured metadata, e.g. subject headings, thesauri, clas-sification systems or ontologies, which are applied in libraries, corporate information architectures or commercial databases and which were developed according to defined standards, tags can be freely chosen by users and attached to any information resource. As one type of metadata Folksonomies provide access to information resources and serve users as retrieval tool in order to retrieve own re-sources as well as to find data of other users. The book delivers insights into typical applications of Folksonomies, especially within Collaborative Information Services, and discusses the strengths and weaknesses of Folksonomies as tools of knowl-edge representation and information retrieval. More-over, it aims at providing conceptual considerations for solving problems of Folksonomies and presents how established methods of knowledge representa-tion and models of information retrieval can successfully be transferred to them.
