Text Editing, Print and the Digital World Professor Kathryn Sutherland,Professor Marilyn Deegan,2012-10-01 Traditional critical editing, defined by the paper and print limitations of the book, is now considered by many to be inadequate for the expression and interpretation of complex works of literature. At the same time, digital developments are permitting us to extend the range of text objects we can reproduce and investigate critically - not just books, but newspapers, draft manuscripts and inscriptions on stone. Some exponents of the benefits of new information technologies argue that in future all editions should be produced in digital or online form. By contrast, others point to the fact that print, after more

than five hundred years of development, continues to set the agenda for how we think about text, even in its non-print forms. This important book brings together leading textual critics, scholarly editors, technical specialists and publishers to discuss whether and how existing paradigms for developing and using critical editions are changing to reflect the increased commitment to and assumed significance of digital tools and methodologies.

Architecture, Print Culture and the Public Sphere in Eighteenth-Century France Richard Wittman,2007 This book focuses on the complex ways in which architectural practice, theory, patronage, and experience became modern with the rise of a mass public and a reconfigured public sphere between the end of the seventeenth century and the French Revolution. Presenting a fresh theoretical orientation and a large body of new primary research, this book offers a new cultural history of virtually all the major monuments of eighteenth-century Parisian architecture, with detailed analyses of the public debates that erupted around such Parisian monuments as the east facade of the Louvre, the Place Louis XV [the Place de la Concorde], and the church of Sainte-Genevieve [the Pantheon]. Depicting the passage of architecture into a mediatized public culture as a turning point, and interrogating it as a symptom of the distinctly modern configuration of individual, society, and space that emerged during this period, this study will interest readers well beyond the discipline of architectural history.

The Magnetic Brackets Jesús Losada,2014-11-15 “The Magnetic Brackets ... is one of the liveliest and truest poetical testaments that a reader can tackle in these times of disbelief, of half-truths, of vacuity and passivity in thought. For this is one more gift from the book: where thought and feeling are perfectly merged.” — Antonio Colinas.

Fortran 2018 with Parallel Programming Subrata Ray,2019-08-22 The programming language Fortran dates back to 1957 when a team of IBM engineers released the first Fortran Compiler. During the past 60 years, the language had been revised

and updated several times to incorporate more features to enable writing clean and structured computer programs. The present version is Fortran 2018. Since the dawn of the computer era, there had been a constant demand for a “larger” and “faster” machine. To increase the speed there are three hurdles. The density of the active components on a VLSI chip cannot be increased indefinitely and with the increase of the density heat dissipation becomes a major problem. Finally, the speed of any signal cannot exceed the velocity of the light. However, by using several inexpensive processors in parallel coupled with specialized software and hardware, programmers can achieve computing speed similar to a supercomputer. This book can be used to learn the modern Fortran from the beginning and the technique of developing parallel programs using Fortran. It is for anyone who wants to learn Fortran. Knowledge beyond high school mathematics is not required. There is not another book on the market yet which deals with Fortran 2018 as well as parallel programming. FEATURES Descriptions of majority of Fortran 2018 instructions Numerical Model String with Variable Length IEEE Arithmetic and Exceptions Dynamic Memory Management Pointers Bit handling C-Fortran Interoperability Object Oriented Programming Parallel Programming using Coarray Parallel Programming using OpenMP Parallel Programming using Message Passing Interface (MPI) THE AUTHOR Dr Subrata Ray, is a retired Professor, Indian Association for the Cultivation of Science, Kolkata.
