With our rapidly changing world, what is learned one year may become obsolete the next. Map Skills, Grade 6 has a more practical approach. It focuses on the natural geography of the world, why maps are made like they are, and how to use them to find your way around. Students will learn to understand map symbols such as the legend, scale, directional compass, and grids. The will learn to differentiate between physical, political, thematic, and direction maps and how each type is useful for different information. Political boundaries and country names may change, but the skills learned in this book will last a lifetime.

Picturing America Stephen J. Hornsby,2017-03-23 Instructive, amusing, colorful—pictorial maps have been used and admired since the first medieval cartographer put pen to paper depicting mountains and trees across countries, people and objects around margins, and sea monsters in oceans. More recent generations of pictorial map artists have continued that traditional mixture of whimsy and fact, combining cartographic elements with text and images and featuring bold and arresting designs, bright and cheerful colors, and lively detail. In the United States, the art form flourished from the 1920s through the 1970s, when thousands of innovative maps were mass-produced for use as advertisements and decorative

objects—the golden age of American pictorial maps. *Picturing America* is the first book to showcase this vivid and popular genre of maps. Geographer Stephen J. Hornsby gathers together 158 delightful pictorial jewels, most drawn from the extensive collections of the Library of Congress. In his informative introduction, Hornsby outlines the development of the cartographic form, identifies several representative artists, describes the process of creating a pictorial map, and considers the significance of the form in the history of Western cartography. Organized into six thematic sections, *Picturing America* covers a vast swath of the pictorial map tradition during its golden age, ranging from “Maps to Amuse” to “Maps for War.” Hornsby has unearthed the most fascinating and visually striking maps the United States has to offer: Disney cartoon maps, college campus maps, kooky state tourism ads, World War II promotional posters, and many more. This remarkable, charming volume’s glorious full-color pictorial maps will be irresistible to any map lover or armchair traveler.

Judgmental Maps Trent Gillaspie,2016-11-08 Your City. Judged A sharp tongued and fierce witted full-color collection of maps of America’s greatest cities in all their brutally honest glory. When you move to a new city you look at a map to get you where you need to be, but a Google Map of San Francisco won’t tell you where you can get “Real Dim Sum” or where “The

Worst Trader Joes Ever” is. Or if you’re visiting Chicago, you might want to see the Magnificent Mile, but not know it’s right next to where “Suburbanites Buy Drugs” and “Retired Mafioso.” This is where Judgmental Maps comes in - a no holds barred look at city life that is at once a love letter and hate mail from the very people who live there. What started as a joke between comedian Trent Gillaspie and his friends in Denver, quickly grew into a viral sensation with a rabid and enthusiastic community labeling maps of their cities with names and descriptions we all think of, but are a bit too shy to say out loud. Collected here in a full color, beautifully packaged book with all new, never before published material, Judgmental Maps is laugh out loud funny from New York to Los Angeles, Minneapolis to Atlanta and offending everyone else in between.
