**Story Genius** Lisa Cron, 2016-08-09 Following on the heels of Lisa Cron's breakout first book, *Wired for Story*, this writing guide reveals how to use cognitive storytelling strategies to build a scene-by-scene blueprint for a riveting story. It’s every novelist’s greatest fear: pouring their blood, sweat, and tears into writing hundreds of pages only to realize that their

story has no sense of urgency, no internal logic, and so is a page one rewrite. The prevailing wisdom in the writing community is that there are just two ways around this problem: pantsing (winging it) and plotting (focusing on the external plot). Story coach Lisa Cron has spent her career discovering why these methods don't work and coming up with a powerful alternative, based on the science behind what our brains are wired to crave in every story we read (and it's not what you think). In *Story Genius* Cron takes you, step-by-step, through the creation of a novel from the first glimmer of an idea, to a complete multilayered blueprint—including fully realized scenes—that evolves into a first draft with the authority, richness, and command of a riveting sixth or seventh draft.

**The Montessori Toddler** Simone Davies, 2019-03-19 Announcing that rare parenting book that will not only help you become a more effective parent but actually change how you see your children. Here is how to set up Montessori-friendly spaces in your home. Principles for fostering curiosity in your child—and in yourself. Specific Montessori skills—the winter coat flip; getting your toddler to pour his or her own water and clean up whatever spills might occur. And it goes much deeper, showing how a parent can really be present, be the child's guide, and handle tantrums and problematic behavior without resorting to bribes, threats, or punishment and truly celebrate every stage. It's also that rare parenting book that's beautiful to look at, with a bright, airy design and simple color illustrations and photographs.

Fair Play Eve Rodsky, 2021-01-05 AN INSTANT NEW YORK TIMES BESTSELLER • A REESE'S BOOK CLUB PICK Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh\*t I Do List. Tired of being the “shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is *Fair Play*: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, *Fair Play* helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. “Winning” this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try *Fair Play*? Let's deal you in.

*The Zones of Regulation* Leah M. Kuypers,2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.
