*Blowing up the Rock: German, Italian and Spanish Sabotage attacks on Gibraltar during the Second World War* Bernard O'Connor,2020-01-05 During the Second World War, Gibraltar faced the threat of invasion by Italy, Germany, and Spain. The Abwehr, the German Intelligence Service, rather than use their own saboteurs, paid young Spanish men to undertake over sixty sabotage attacks on military installations and shipping with limited success. The Italian Decima Flotilla MAS, a specialist team of underwater frogmen, launched eight attacks which were relatively successful and Spanish Falangists made several unsuccessful attempts. The British Secret Intelligence Service endeavoured to stop or at least limit such attacks. Using contemporary files from the National Archives in Kew, autobiographies, biographies, histories and newspaper articles, this documentary history investigates the successes and failures of these attacks on Gibraltar and the roles played by intelligence officers, agents, double agents in discovering and preventing such acts. The book sheds light on an unusual and largely overlooked aspect of Gibraltar's history.

The Goblin Market Helen McCloy,2013-10-14 It's 1943, and down-on-his-luck American expat Philip Stark is on the Caribbean island of Santa Teresa. The prewar destination playground is deserted now except for diplomats and oil refinery workers. When a local correspondent dies, Stark sees a chance to make some money. Having worked for the same company in the past, he is hired to replace the dead man. But Stark doesn't think his predecessor died by accident. As he looks into the mystery, he encounters a rival correspondent, an enigmatic police officer and the mistress of the dead man - all of whom had a stake in seeing him dead.

Flag Marc Leepson,2007-04-01 The thirteen-stripe, fifty-star flag is as familiar an American icon as any that has existed in the nation's history. Yet the history of the flag, especially its origins, is cloaked in myth and misinformation. *Flag: An American Biography* rectifies that situation by presenting a lively, comprehensive, illuminating look at the history of the American flag from its beginnings to today. Journalist and historian Marc Leepson uncovers scores of little-known, fascinating facts as he traces the evolution of the American flag from the colonial period to the twenty-first century. *Flag* sifts through the historical evidence to---among many other things---uncover the truth behind the Betsy Ross myth and to discover the true designer of the Stars and Stripes. It details the many colorful and influential Americans who shaped the history of

the flag. Flag, as the novelist Nelson DeMille says in his preface, is not a book with an agenda or a subjective point of view. It is an objective history of the American flag, well researched, well presented, easy to read and understand, and very informative and entertaining. Our love for the flag may be incomprehensible to others, but at least we now have a comprehensive guide to its unfolding. ---The Wall Street Journal The fascination of history is in its details, and the author of Flag: An American Biography knows how to find them and turn them into compelling reading.... This book brings out the irony, humor, myth, and behind-the-scenes happenings that make our flag's 228-year history so fascinating. ---The Saturday Evening Post Timely and insightful. ---The Dallas Morning News

*The Zones of Regulation* Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.

Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
