Professional Construction Management and Project Administration William B. Foxhall, 1976

Professional Construction Management Donald S. Barrie, Boyd C Paulson, 1992 This text is intended for introductory courses on construction management, as well as more advanced, detailed courses on the subject. The authors aim to balance theoretical material with practical advice.

Successful Contract Administration Charles W. Cook, 2014-11-27 The success of every construction project begins with reading and understanding the contract. Contract Administrators and Project Managers for all parties in the construction process must realize the major impact their actions have on cost, schedule, and quality in relation to the contract terms and conditions. Written in a clear and accessible way from a Constructor's perspective, Successful Contract Administration guides the student through the critical issues of understanding contract law and obligations for effective project execution. Through examples, exercises, and case studies, this textbook will: Improve knowledge and comprehension of key contract elements Help the student apply knowledge to real case scenarios Improve the student's ability to analyze and create different scenarios for success Evaluate critical issues of responsibility and ethics in relation to contract administration. The text is supported by a companion website featuring additional resources for both students and instructors. Resources for the student include additional case studies, links to useful websites, video commentary and interviews for increased understanding of important chapter material, true/false sample quiz questions and a flashcard glossary to reinforce comprehension of key terms and concepts. Additional instructor material includes a testbank of questions, (including true/false, multiple choice, and sample essay questions), website links to contract documents and PowerPoint slides.

The CSI Construction Contract Administration Practice Guide Construction Specifications Institute, 2011-01-19 Get the

must-have reference on construction contract administration -- and the essential study aid for the Certified Construction Contract Administrator (CCCA) Exam. The CSI Construction Contract Administration Practice Guide: Takes an in-depth look at standard contract documents and their successful use in construction projects. Provides expert commentary on various standard forms and their use in documenting design decisions made during project construction and providing for clear project communications. Discusses the roles and responsibilities of all parties to construction agreements and their effective management. Packaged with the book is an access code which provides access to a password-protected Web site with bonus content, including a PDF of the printed book and copies of CSI format documents, such as UniFormat and SectionFormat/PageFormat. This easy-to-follow guide offers invaluable tips all construction professionals can immediately put to use for improving the overall skill and efficiency of document preparation that accurately conveys stated goals, ensuring that all interested individuals receive fair representation throughout the entire construction process. Part of the CSI Practice Guides, a library of comprehensive references specifically and carefully designed for the construction professional. Each book examines important concepts and best practices integral to a particular aspect of the building process.

Successful RFPs in Construction Richard Fria, 2005-04-08 The negotiated contract method for RFPs is a rapidly growing trend in construction. Traditionally, RFPs have gone through a competitive bid method – meaning that 100% of the design work is done without the input of contractors and with very little real cost information. With the negotiated contract method, only about 10% of the design work is done before a contractor is brought to the table, which means less paperwork and lower up-front costs. There are several advantages to the negotiated contract method:

- Because only a small part of the design work is done up-front (before a contractor is brought on board), no extensive re-design work has to be done when budget/schedule issues with the design become a factor.
- A complete team – architect/designer and contractor – is assembled earlier, making for a much more efficient process and outcome.
- The RFP process becomes a collaborative effort, rather than a competitive one. There is no other book on the shelf that either focuses specifically on RFPs in the construction industry, or features a step-by-step method for implementing the negotiated contract method. This is a step-by-step guide for managing the RFP process in a way that saves time, money, enhances team collaboration, and assures quality in construction. Focusing on the negotiated contract method (as opposed to the competitive bid method), the book takes readers from articulating the needs/wish list for a construction project, to the analysis of responses and interviews, through negotiations and finalization of the deal. This is a roadmap for:
- Preparing, understanding, and assessing the quality of information in an RFP.
- Gathering critical, project-specific information from free and up-to-date local databases.
- Adding value to the process by assisting consultants in marketing and project management capabilities.
- Selecting and working with a team early in the process to stay on-schedule and on-budget.
- Improving the materials selection process and the end-result overall quality of construction.
- Example and template forms make it easy to create a successful RFP process.

The Construction Contracts Book Daniel S. Brennan,2008 Most construction lawyers are familiar with the American Institute of Architects (AIA), Engineers Joint Contract Documents Committee (EJCDC) forms of agreements, and the newer ConsensusDOCS forms. The ConsensusDocs forms replace many of the forms previously issued by the Associated General Contractors of America (AGC). Now completely revised, this invaluable resource offers a topic-by-topic comparison of these forms by providing: - An easy-reference guide to how the AIA, ConsensusDOCS and EJCDC forms treat the most significant issues in owner/contractor/subcontractor and owner/design professional agreements - Proposed alternative language for situations where the form contract approach may not provide the best solution - List comparing the most significant provisions from each of these forms (on the CD-ROM)

Professional Ethics in Construction and Engineering Jason Challender,2022-08-11 Professional Ethics in Construction and Engineering A comprehensive and incisive how-to guide that walks readers through the implementation of robust ethical standards in everyday construction management and decision-making Recent and high-profile incidents—including the 2017 Grenfell Tower tragedy and the Lakanal House fire in 2009—have been attributed to failures in the building construction, design, and certification industries. Some commentators have suggested that, while professional construction organizations are bound by codes of ethics, such codes may be downplayed or sometimes even ignored in the day-to-day activities of construction professionals. Professional Ethics in Construction and Engineering is a practical and industry-aligned guide on ethical practice in construction management. The book addresses how existing ethical standards should be applied in daily practice and offers case studies and examples to illustrate their effective implementation. The author also provides a toolkit that can be employed by frontline managers facing common ethical dilemmas. Readers will find: Thorough discussions of how problematic and dangerous ethical situations arise and how they should be addressed In-depth explorations of conflicts between legal and moral expectations, as well as mismatches between clients’ business goals and the duties of contracting organizations Playbooks for how impactful decisions should be made and how to uphold ethical standards and values Comprehensive review of existing ethical standards and the legal requirements binding construction professionals found in organizations like RICS, RIBA, and the CIOB A must-read document for construction management practitioners, Professional Ethics in Construction and Engineering will also be invaluable to construction clients, contractors, surveyors, and architects, as well as students of construction-related disciplines at undergraduate and postgraduate level.

Submitting a Winning Bid Gustavo Cinca,2020-02-25 Submitting a Winning Bid. If the work or service awarded originated from a poor bid, you did not win a job, you won a complication. An industrial construction and assembly company is sustained over time when it executes profitable each work or service that is awarded to it. When the awarded work or service has its origin in a faulty offer, it is unlikely that the venture will become profitable. In order to start a lucrative business, it is essential that the bidder submits a correctly evaluated offer in each bidding process or competition involving. In the book

Submitting a Winning Bid defines the steps to follow to achieve a reliable bid. This manuscript is of particular interest to owners, shareholders and coordinators of tenders in construction and industrial assembly contractors or subcontractors, and in general to all members of organizations that carry out tasks related to the formulation of proposals or bids in tenders or price competitions. Submitting a Winning Bid. Guidelines to improve the accuracy of your offer with Examples. The submission of offers with prices far from the market average undermines the commercial relationship of the proposer with the client. When the bidder presents a budget that is too low and has the misfortune of being awarded the work, he will inexorably have to deal with negative financial results since the expenses will exceed the income. On the other hand, if the bid has a very high value compared to the competition's proposals, it will probably be out of the price competition. This situation, although less burdensome than the previous one, has an adverse effect on your assets due to the increase in general expenses. The conclusion is that when quoting, each step must be carefully analyzed in order to submit a reliable bid. Submitting a Winning Bid. The purpose of presenting a Winning Bid is to give the reader a complete and valuable guide to support them when budgeting. This publication details the main aspects to be considered in each of the stages of the elaboration of a proposal in order to achieve the desired reliable budget. In order to quote, it is necessary to have your own experience in construction and industrial assembly and to use emotional intelligence to reconcile criteria with other colleagues or specialists in order to deepen the knowledge about what is being quoted. Guidelines to Making Construction Bidding with Examples. This guide is based on the author's outstanding experience. The author of this book, worked during a large part of his professional life as a manager and construction director, on site, in different chemical process plants, refineries, gas pipelines, compression plants and thermal power plants in the country and abroad, finally managing to found and preside over a construction and assembly company. Throughout his career, the author has prepared and reviewed hundreds of estimates for bids for the refurbishment of industrial plants and new installations. Decide to implement the suggestions made in this publication and your economic proposals will surely be more precise.

Design & Construction of the Contract Package Concept Robert E. Bartz,2013-03-25 The overview of this book is to assist A/E Firms, Contractors and Utility owners to obtain the knowledge of how the Contract Package Concept can be developed and implemented for any type or size of project. The primary motivation for the use of the Contract Package Concept is to break the job into proper and efficient size packages which can be bid and awarded on a lump sum basis. In building a project of any size magnitude, it does not require a unique method of management. In managing these activities, construction management must be concerned with the manner and method of how to construct this facility in the most economical and beneficial manner. The theme of the book is to have the owner define his purpose by emphasizing the importance of focus and clarity which in time will assist the Project Organization to zero in on the vision to build a facility on schedule or ahead of schedule and within the budget or under the budget.
