Execution Larry Bossidy,Ram Charan,Charles Burck,2009-11-10 #1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."—The New York Times When *Execution* was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. *Execution* gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. *Execution* shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a

“vision” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

Filling Execution Gaps Todd C. Williams, 2017-10-23 "I expected good, but this is great." -Janet Pirus Phelps, Principle, Strategic CFO, Former CFO Papa Murphy's Pizza Gaps . . . holes in your organization where tasks fall and failure breeds. They inhibit your ability to implement strategic plans, lead people, and run successful projects. Daily, executives, middle managers, and project managers wrestle with "the big six": Absence of common understanding Disengaged executive sponsors Misalignment with goals Poor change management Ineffective governance Lackluster leadership Ignoring any of these gaps will hex any strategy or project. They regularly destroy hundreds of companies' ability to turn their corporate vision into business value—taking careers with them. *Filling Execution Gaps* addresses the sources of these gaps, and how to fill them. Without any one of these important functions, projects fail. Without change management, adoption suffers. Without common understanding, there is confusion. Without goals, business units, and capabilities aligned, execution falters. Without executive sponsorship, decisions languish. Too little governance allows bad things to happen, while too much governance creates overburdening bureaucracy. Without leadership at all levels of the organization, people are directionless. Using decades of experience, years of research, and interviews with hundreds of business leaders, Todd Williams illustrates how to fill these gaps, meet corporate goals, and increase value. Integrative Document & Content Management Len Asprey, Michael Middleton, 2003-01-01 Portals present unique strategic challenges in the academic environment. Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra-campus bridges as it is about user interfaces and content. *Designing Portals: Opportunities and Challenges* discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy, by taking the reader through the processes of conceptualization, design, and implementation of the portals (in different stages of development) at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere.
